Rules on Paper, Rules in Practice Sep 24 2022 The primary focus of this book is on a specific outcome of the rule of law: the practical enforcement of laws and policies, and the determinants of this enforcement, or lack thereof. Are there significant and persistent differences in implementation across countries? Why are some laws and policies more systematically enforced than others? Are “good†”? laws likely to be enacted, and if not, what stands in the way? We answer these questions using a theoretical framework and detailed empirical data and illustrate with case studies from Morocco, Tunisia and Jordan. We believe that the best way to understand the variation in the drafting and implementation of laws and policies is to examine the interests and incentives of those responsible for these tasks †“ policymakers and bureaucrats. If laws and their enforcement offer concrete benefits to these ruling elites, they are more likely to be systematically enforced. If they don't, implementation is selective, discretionary, if not nil. Our first contribution is in extending the application of the concept of the rule of law beyond its traditional focus on specific organizations like the courts and the police, to economic sectors such as customs, taxation and land inheritance, in a search for a direct causal relationship with economic development outcomes. Instead of limiting ourselves to a particular type of organization or a legalistic approach to the rule of law, we present a broader theory of how laws are made and implemented across different types of sectors and organizations. Our second contribution is in demonstrating how powerful interests affect implementation outcomes. The incentives elites have to build and support rule-of-law institutions derive from the distribution of power in society, which is partly a historical given. The point we make is that it is not deterministic. Realigning the incentive structures for reform among key actors and organizations, through accountability and competition, can dramatically improve the chances that rule-of-law institutions will take root. On the other hand, building the capacity of organizations without first changing institutional incentives is likely to lead to perverse outcomes.

Rules, Paper, Status Jul 22 2022 Whether motivated by humanitarianism or concern over "porous" borders, dominant commentary on migration in Europe has consistently focused on clandestine border crossings. Much less, however, is known about the everyday workings of immigration law inside borders. Drawing on in-depth ethnographic fieldwork in Italy, one of Europe's biggest receiving countries, *Rules, Paper, Status* moves away from polarized depictions to reveal how migration processes actually play out on the ground. Anna Tuckett highlights the complex processes of inclusion and exclusion produced through encounters with immigration law. The statuses of "legal" or "illegal," which media and political accounts use as synonyms for "good" and "bad," "worthy" and "unworthy," are not created by practices of border-crossing, but rather through legal and bureaucratic processes within borders devised by governing states. Taking migrants' interactions with immigration regimes as its starting point, this book sheds light on the productive nature of legal and bureaucratic encounters and the unintended consequences they produce. Situated in an immigration regime that is both exclusionary and flexible, *Rules, Paper, Status* argues that successfully navigating Italian immigration bureaucracy requires and induces culturally specific modes of behavior. Exclusionary laws, however, can transform this social and cultural learning into the very thing that endangers migrants' right to live in the country.
