This book covers the entire history, life and times of the famous British high-performance engineering company, from its 1958 foundation by Mike Costin and Keith Duckworth, through its often-exciting and always fascinating evolution, to its expansion and worldwide success in both motorsport and high-performance road car production. This book chronicles the life of Keith Duckworth OBE, the remarkable engineer famous for being co-founder of Cosworth Engineering and creating the most successful F1 engine of all time, the DFV. Although the company's engines are given due prominence, this isn't an intricate technical examination of their design, but a more rounded look at the life and work of their designer - work which included significant contributions to aviation, motorcycling, and powerboating.
