This two-volume set is assembled following the 2008 International Conference on Computational Science and Its Applications, ICCSA 2008, a

premium international event held in Perugia, Italy, from June 30 to July 3, 2008. The collection of fully refereed high-quality original works accepted as theme papers for presentation at ICCSA 2008 are published in this LNCS proceedings set. This outstanding collection complements the volume of workshop papers, traditionally published by IEEE Computer Society. The continuous support of computational science researchers has helped ICCSA to become a firmly established forum in the area of scientific computing and the conference itself become a recurring scientific and professional meeting that cannot be given up. The computational science field, based on fundamental disciplines such as mathematics, physics, and chemistry, is finding new computational approaches to foster the human progress in heterogeneous and fundamental areas such as aerospace and automotive industries, bioinformatics and

nanotechnology studies, networks and grid computing, computational geometry and biometrics, computer education, virtual reality, and art. Due to the growing complexity of many challenges in computational science, the use of sophisticated algorithms and emerging technologies is inevitable. Together, these far-reaching scientific areas help to shape this conference in the areas of state-of-the-art computational science research and applications, encompassing the facilitating theoretical foundations and the innovative applications of such results in other areas. In the fall of 1930, David Packard left his hometown of Pueblo, Colorado, to enroll at Stanford University, where he befriended another freshman, Bill Hewlett. After graduation, Hewlett and Packard decided to throw their lots in together. They tossed a coin to decide whose name should go first on the notice of incorporation, then cast about in search of products to sell. Today, the one-car garage in Palo Alto that housed their first workshop is a California historic landmark: the birthplace of Silicon Valley. And Hewlett-Packard has produced thousands of innovative products for millions of customers throughout the world. Their little company employs 98,400 people and boasts constantly increasing sales that reached \$25 billion in 1994. While there are many

successful companies, there is only one Hewlett-Packard, because from the very beginning, Hewlett and Packard had a way of doing things that was contrary to the prevailing management strategies. In defining the objectives for their company, Packard and Hewlett wanted more than profits, revenue growth and a constant stream of new, happy customers. Hewlett-Packard's success owes a great deal to many factors, including openness to change, an unrelenting will to win, the virtue of sustained hard work and a company-wide commitment to community involvement. As a result, HP now is universally acclaimed as the world's most admired technology company; its wildly successful approach to business has been immortalized as The HP Way. In this book, David Packard tells the simple yet extraordinary story of his life's work and of the truly exceptional company that he and Bill Hewlett started in a garage 55 years ago.

Are your social media efforts delivering real, tangible results while paying for themselves? Social media judo is born out of the philosophy of successes we have had creating programs using minimal client effort and achieving maximum results. This is exactly why social media works for marketing and why it drives ROI and is hyper-effective when done correctly. Social media and the resulting effect on all of us are driven by the momentum of real influencers working to inform and educate other buyers. Your job is to find a way to tap into this momentum and help propel your company to be greater than the sum of its parts. Social media judo will show how to do just that as well as how to create your own "judo moves" that will increase

sales cut marketing costs boost engagement and, most importantly pay for themselves with real revenue Ivy has helped dozens of other large and small companies such as AMD, AT&T, HP, Microsoft, ProFlowers, Time Inc. launch and grow their social media efforts. In addition, Ivy Worldwide's program "31 Days of the Dragon" for HP has won more awards for ROI than any other campaign. The campaign is considered to be one of the most successful of all time. Foreword by Chris Pirillo (Chris.Pirillo.com), one of the most influential bloggers ever and arguably one of the best online marketers ever born. Customer Praise for Ivy Worldwide "Do you want to know how to use disruptive marketing at its best to drive sales while giving your competitors serious heartburn? We used the principles in this book to create a long string of successful campaigns for HP, including the groundbreaking 31 Days of the Dragon program that re-wrote the rules for what is possible for social media

marketing. After reading this book you'll know why social media is worth the hype." - Scott Ballantyne Vice President, Hewlett-Packard Corp "Social Media Judo should be mandatory reading for any marketer looking to boost ROI and tap into the power of social media. The guys at Ivy and I used the concepts in this book to drive B2B programs that delivered ROI on a number of levels, the most important being leads and sales. Now, I cannot envision creating a campaign without identifying and using the judo moves described in this book." -Bruce Shaw Executive Director, Lenovo "Ivy Worldwide is a very unique agency and Social Media Judo is a unique book. They have succeeded in facilitating critical, high-profile launches. Unlike traditional agencies that are only able to measure ROI with soft marketing metrics, Ivy meets and exceeds marketing and business objectives. In addition, they have the requisite strategic, tactical and creative prowess to operate

effectively in the social media arena, which is a combination hard to find in just one agency. I strongly recommend listening to what they have to say." - Denise Lu Senior Campaign Manager, Adobe Systems" PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Not only are the keyboard and screen smaller, you have to deal with battery life, notebook security, connecting to the Internet at Wi-Fi hot spots, and figuring out how to enter numbers without a numeric keypad. How do you do what you need to do on your new notebook PC? Your First Notebook PC is the solution to your problems. This book focuses on how to shop for, set up, and use a new notebook PC. You'll learn all about different types of notebooks, unique notebook features, and useful notebook accessories. You'll also discover how to get the most out of your notebook at home, at the office, and on the road—and how to troubleshoot

any problems you might encounter! Your First Notebook PC shows you how to:

- Choose the right type of notebook for your needs
- Set up and configure a new notebook
- Use Windows Vista and its notebook-specific features
- Connect your notebook to a wireless home network and the Internet
- Share files and folders with other users—and sync your files between two PCs
- Use your notebook to listen to music and play DVD movies
- Connect your notebook to an office network—and use it for essential business operations
- Use your notebook to give PowerPoint presentations
- Connect your notebook to a public Wi-Fi hot spot—and send and receive email from any location
- Keep your notebook secure when traveling
- Extend the life of your notebook's battery
- Upgrade your notebook's hardware
- Troubleshoot common problems
