From the earliest years of sound film in America, Hollywood studios and independent producers of "race films" for black audiences created stories featuring African American religious practices. In the first book to examine how the movies constructed images of African American religion, Judith Weisenfeld explores these cinematic representations and how they reflected and contributed to complicated discourses about race, the social and moral requirements of American citizenship, and the very nature of American identity. Drawing on such textual sources as studio production files, censorship records, and discussions and debates about religion and film in the black press, as well as providing close readings of films, this richly illustrated and meticulously researched book brings religious studies and film history together in innovative ways. *Distributing Condoms and Hope* is a feminist ethnographic account of how youth sexual health programs in the racially and economically stratified city of "Millerston" reproduce harm in the marginalized communities they are meant to serve. Chris

A. Barcelos makes space for the stories of young mothers, who often recognize the narrow ways that public health professionals respond to pregnancies. Barcelos's findings show that teachers, social workers, and nurses ignore systemic issues of race, class, and gender and instead advocate for individual-level solutions such as distributing condoms and promoting "hope." Through a lens of reproductive justice, *Distributing Condoms and Hope* imagines a different approach to serving marginalized youth—a support system that neither uses their lives as a basis for disciplinary public policies nor romanticizes their struggles. *Tiptoes Lightly* lives in an acorn high up in the branches of a great oak tree. "The Festival of Stones" follows her adventures, and those of her friends, through the festivals of Michaelmas, Halloween, Martinmas, Advent and Christmas. At Michaelmas a real dragon appears, as does St. Michael, and Farmer John tells the story of 'The Most Beautiful Dragon in the Whole World' to his children. Other tales are told too. An angel tells the story of 'Martin's Light' at Martinmas, at the Festival of Animals Tiptoes recounts how the animals were sung into the world in 'The Myth of Ella-jah', and Farmer John reads 'The Burden Bull of Scotland' to his children on Christmas day. On the way Jeremy Mouse has a frightening encounter at Halloween (with a you-know-what-kind of vegetable) and almost drowns while sliding on ice (luckily he is saved by Mr.

Owl the Vegetarian). At the farm, the children meet the Borodat who lives in the barn, and on Christmas night June Berry dreams of her mother who has passed over the threshold. In the last chapter the world's first snow-mouse is made by Jeremy Mouse - helped by Tiptoes and the house fairies, Pins and Needles. "The Festival of Stones" is lavishly illustrated by the artist-author. The stories are reverent, humorous, sanguine and spiritual. They are innocent and magical tales, suitable for reading to young children or for young children to read. From everyday apps to complex algorithms, Ruha Benjamin cuts through tech-industry hype to understand how emerging technologies can reinforce White supremacy and deepen social inequity. Benjamin argues that automation, far from being a sinister story of racist programmers scheming on the dark web, has the potential to hide, speed up, and deepen discrimination while appearing neutral and even benevolent when compared to the racism of a previous era. Presenting the concept of the "New Jim Code," she shows how a range of discriminatory designs encode inequity by explicitly amplifying racial hierarchies; by ignoring but thereby replicating social divisions; or by aiming to fix racial bias but ultimately doing quite the opposite. Moreover, she makes a compelling case for race itself as a kind of technology, designed to stratify and sanctify social injustice in the architecture of everyday life.

This illuminating guide provides conceptual tools for decoding tech promises with sociologically informed skepticism. In doing so, it challenges us to question not only the technologies we are sold but also the ones we ourselves manufacture. Visit the book's free Discussion Guide [here](#). The book introduces a preliminary, integrative conceptual framework on the intersections between management and social justice with a view that the quest for social justice is not an endpoint rather an ongoing journey. With contributions from management scholars and practitioners, it highlights, examines, and explores the continuities and discontinuities, gains and losses, and struggles and successes in this quest for reimagining organizations as sites and vehicles for advancing social justice in the world. To nurture and facilitate flourishing individuals and collectives, we need bolder, more innovative, and more creative models of engagement. Further, we need models for speaking and learning from different perspectives and building common ground through shared values of equity, connectivity, and compassion and moral expansiveness while recognizing the complexities of the world we inhabit via our organizations and the need to develop nuanced understandings of the same. Contributing authors address questions such as: Are social justice and management

mutually exclusive concepts? How can we draw on effective management for advancing social justice aims? How do we bend the arc of organizational life towards more justice? What are the rights and obligations of organizations and their members to the world at large, and to their local communities and societies? Through its re-imagining of organizations and management as vehicles for social justice instead of just as tools of oppression, injustice, or regressive organizing in an extractive economy, this book brings together critical and positive organizational approaches challenging fundamental assumptions about how our society, people's collectives, and workplaces are organized with capacity building, incremental change, sustained change, institutionalized change, dynamic ongoing problem-solving/ assessment/ redesign, and more. Management scholars will learn the nuanced and complex intersections between management theories and practice and different types of justice/injustice in a global context both as antecedents to modern organizations and workplaces and the ways in which these intersectional actors advance and change the organizations and workplaces of the future. Use courageous conversations to build racial equity in your schools and districts! In this companion to his best-selling book, Glenn Singleton presents specific examples in which racism impedes student success and illustrates how to usher in courageous

conversations to ignite systemic transformation. Through first-person vignettes and an actual school district case study, this breakthrough handbook focuses on the powerful possibilities that are unleashed when you: Learn how other education leaders have addressed and improved race relations Explore urgent challenges in racial equity and courageous approaches to solving them Reflect on your personal role in the struggle to achieve racial equity Introduce culturally relevant curriculum, instruction, and assessment in your school or district Can today's college students confront race relations issues directly and make positive changes? Yes, they can. This book provides students with a fresh, practical approach to address these serious issues—as individuals and as members of groups—and set off a new positive revolution in race and ethnic relations. • Presents brand-new race and ethnic relations solution strategies for college students and universities in the United States • Carefully investigates several theoretical frameworks to provide readers with a better understanding of the numerous issues associated with race relations • Discusses a number of culturally sensitive topics associated with race and ethnic relations, such as race and intelligence, affirmative action programs, discrimination, Black Lives Matter, and immigration policies Rethinking the Color Line helps make sense of how race and ethnicity influence aspects of social life in ways

that are often made invisible by culture, politics, and economics. Charles A. Gallagher has assembled a collection of readings that are theoretically informed and empirically grounded to explain the dynamics of race and ethnicity in the United States. Students will be equipped to confidently navigate the issues of race and ethnicity, examine its contradictions, and gain a comprehensive understanding of how race and ethnic relations are embedded in the institutions that structure their lives. User-friendly without sacrificing intellectual or theoretical rigor, the Seventh Edition has been thoroughly updated to reflect the current debates and the state of contemporary U.S race relations. Included with this text The online resources for your text are available via the password-protected Instructor Resource Site. In *The Name of Hate* is the first book to offer a comprehensive theory of hate crimes, arguing for an expansion of the legal definitions that most states in the U.S. hold. Barbara Perry provides an historical understanding of hate crimes and provocatively argues that hate crimes are not an aberration of current society, but rather a by-product of a society still grappling with inequality, difference, fear, and hate. The salient features of the present edition are: All the Problems and Solutions have been thoroughly revised in the light of up-to-date amendments in Income tax Law and Rules for Assessment Year 2022-23. Almost all numerical questions

given at the end of the chapters of the authors' other publications on Income-tax (viz., *Income-tax Law and Accounts*, *Aaykar Vidhan evam Lekhe*, *Law and Practice of Income-tax*) have been solved in this book and the number printed within brackets at the end of the questions in other publications is the problem number of this book. The selection and sequence of the questions are well planned and systematic so as to cover all ticklish points within a reasonable number of questions. Wherever needed, detailed explanatory notes have been given at the end of solutions. Candidates preparing for C.A., Company Secretaries, Cost and Works Accountants, and Income-tax Departmental Examinations, will, particularly, find the book very useful. It will also be useful for candidates preparing for B.Com. and M.Com. Examinations of various Indian Universities. This book constitutes the proceedings of the 14th European Symposium on Research in Computer Security, ESORICS 2009, held in Saint-Malo, France, in September 2009. The 42 papers included in the book were carefully reviewed and selected from 220 papers. The topics covered are network security, information flow, language based security, access control, privacy, distributed systems security, security primitives, web security, cryptography, protocols, and systems security and forensics. This volume examines revolutionary constructs in literacy education

and demonstrates how they have been gentrified, whitewashed, and appropriated, losing their revolutionary edge so as to become palatable for the mainstream. Written by top scholars in literacy education, chapters cover key concepts that were originally conceived as radical theories to upset the status quo—including Third Space, Funds of Knowledge, Culturally Relevant Pedagogies, and more. Each chapter addresses how the core theory was culturally appropriated and de-fanged to support rather than take down racial and societal hierarchies. Critiquing the harmful impact of watering down these theories, the contributors offer ways to restore the edge to these once groundbreaking ideas, reject racist and assimilationist trends, and support the original vision behind these liberatory theories. In so doing, this volume adopts a truly radical, critical stance that is essential for researchers, scholars, and students in literacy education. Our utterance activates Gods promise! The mystery of the Kingdom is that, through our prophetic prayers and decrees, we can partner with God to change our world. Seasoned prophetic intercessor, Christy Johnston shares the revelation she received when God intervened through her prophetic declarations, releasing supernatural answers for herself, her family, and her nation. In this book you will find: Revelation of the authority you carry A renewed desire to seek the answers and solutions

hidden in God's heart A new expectancy for the Kingdom of Heaven on Earth A torch that ignites prophetic declarations Watch God transform your world as you partner with Him in prophetic prayer! In the Name of Elijah Muhammad tells the story of the Nation of Islam—its rise in northern inner-city ghettos during the Great Depression through its decline following the death of Elijah Muhammad in 1975 to its rejuvenation under the leadership of Louis Farrakhan. Mattias Gardell sets this story within the context of African American social history, the legacy of black nationalism, and the long but hidden Islamic presence in North America. He presents with insight and balance a detailed view of one of the most controversial yet least explored organizations in the United States—and its current leader. Beginning with Master Farad Muhammad, believed to be God in Person, Gardell examines the origins of the Nation. His research on the period of Elijah Muhammad's long leadership draws on previously unreleased FBI files that reveal a clear picture of the bureau's attempts to neutralize the Nation of Islam. In addition, they shed new light on the circumstances surrounding the murder of Malcolm X. With the main part of the book focused on the fortunes of the Nation after Elijah Muhammad's death, Gardell then turns to the figure of Minister Farrakhan. From his emergence as the dominant voice of the radical black Islamic community to his leadership of the Million Man

March, Farrakhan has often been portrayed as a demagogue, bigot, racist, and anti-Semite. Gardell balances the media's view of the Nation and Farrakhan with the Nation's own views and with the perspectives of the black community in which the organization actively works. His investigation, based on field research, taped lectures, and interviews, leads to the fullest account yet of the Nation of Islam's ideology and theology, and its complicated relations with mainstream Islam, the black church, the Jewish community, extremist white nationalists, and the urban culture of black American youth, particularly the hip-hop movement and gangs. Internationally recognized triathlon coach and best-selling author Joe Friel teams up with ultra-endurance guru Gordon Byrn in *Going Long*, the most comprehensive guide to racing long-course and Ironman-distance triathlons. Combining science with personal experience, Friel and Byrn prepare anyone, from the working age-grouper to the podium contender, for success in triathlon's ultimate endurance event. Whether you are preparing for your first long-course triathlon or your fastest, *Going Long* will make every hour of training count. 40 sport-specific drills to improve technique and efficiency Updates to mental training Key training sessions, workout examples, and strength-building exercises A simple approach to balancing training, work, and family obligations A new chapter on active

recovery, injury prevention and treatment *Going Long* is the best-selling book on Ironman training. Friel and Byrn guide the novice, intermediate, and elite triathlete, making it the most comprehensive and nuanced plan for Ironman training ever written. *Going Long* is the best resource to break through an Ironman performance plateau to find season after season of long-course race improvements. Burdened with a heritage of both Spanish and British colonization and imperialism, Guyana is today caught between its colonial past, its efforts to achieve the consciousness of nationhood, and the need of its diverse subgroups to maintain their own identity. *Stains on My Name, War in My Veins* chronicles the complex struggles of the citizens of Guyana to form a unified national culture against the pulls of ethnic, religious, and class identities. Drawing on oral histories and a close study of daily life in rural Guyana, Brackette E. Williams examines how and why individuals and groups in their quest for recognition as a "nation" reproduce ethnic chauvinism, racial stereotyping, and religious bigotry. By placing her ethnographic study in a broader historical context, the author develops a theoretical understanding of the relations among various dimensions of personal identity in the process of nation building. This study focuses on the exploitive nature of the word "Negro. Tracing its origins to the African slave trade, he shows how the label

"Negro" was used to separate African descendents and to confirm their supposed inferiority. " FINALIST FOR THE 2022 NATIONAL BOOK AWARD FOR NONFICTION A landmark biography by two prizewinning Washington Post reporters that reveals how systemic racism shaped George Floyd's life and legacy—from his family's roots in the tobacco fields of North Carolina, to ongoing inequality in housing, education, health care, criminal justice, and policing—telling the story of how one man's tragic experience brought about a global movement for change. "It is a testament to the power of His Name Is George Floyd that the book's most vital moments come not after Floyd's death, but in its intimate, unvarnished and scrupulous account of his life . . . Impressive." —New York Times Book Review "Since we know George Floyd's death with tragic clarity, we must know Floyd's America—and life—with tragic clarity. Essential for our times." —Ibram X. Kendi, author of *How to Be an Antiracist* "A much-needed portrait of the life, times, and martyrdom of George Floyd, a chronicle of the racial awakening sparked by his brutal and untimely death, and an essential work of history I hope everyone will read." —Henry Louis Gates, Jr., author of *The Black Church: This Is Our Story, This Is Our Song* The events of that day are now tragically familiar: on May 25, 2020, George Floyd became the latest Black person to die at the hands of the police, murdered outside of a

Minneapolis convenience store by white officer Derek Chauvin. The video recording of his death set off the largest protest movement in the history of the United States, awakening millions to the pervasiveness of racial injustice. But long before his face was painted onto countless murals and his name became synonymous with civil rights, Floyd was a father, partner, athlete, and friend who constantly strove for a better life. His Name Is George Floyd tells the story of a beloved figure from Houston's housing projects as he faced the stifling systemic pressures that come with being a Black man in America. Placing his narrative within the context of the country's enduring legacy of institutional racism, this deeply reported account examines Floyd's family roots in slavery and sharecropping, the segregation of his schools, the overpolicing of his community amid a wave of mass incarceration, and the callous disregard toward his struggle with addiction—putting today's inequality into uniquely human terms. Drawing upon hundreds of interviews with Floyd's closest friends and family, his elementary school teachers and varsity coaches, civil rights icons, and those in the highest seats of political power, Washington Post reporters Robert Samuels and Toluse Olorunnipa offer a poignant and moving exploration of George Floyd's America, revealing how a man who simply wanted to breathe ended up touching the world. Finalist for the 2020 Kirkus

Prize for Nonfiction | One of Time Magazine's 100 Must-Read Books of 2020 | Longlisted for the 2020 Porchlight Business Book Awards "An entertaining quest to trace the origins and implications of the names of the roads on which we reside." —Sarah Vowell, *The New York Times* Book Review When most people think about street addresses, if they think of them at all, it is in their capacity to ensure that the postman can deliver mail or a traveler won't get lost. But street addresses were not invented to help you find your way; they were created to find you. In many parts of the world, your address can reveal your race and class. In this wide-ranging and remarkable book, Deirdre Mask looks at the fate of streets named after Martin Luther King Jr., the wayfinding means of ancient Romans, and how Nazis haunt the streets of modern Germany. The flipside of having an address is not having one, and we also see what that means for millions of people today, including those who live in the slums of Kolkata and on the streets of London. Filled with fascinating people and histories, *The Address Book* illuminates the complex and sometimes hidden stories behind street names and their power to name, to hide, to decide who counts, who doesn't—and why. Never give in to the enemies of your life; instead, make them give up on you. Embark on utilizing these effective prayer strategies that are bound to cause commotion and havoc in the camp of the enemy. This book will teach

you some divine techniques on how to tap into the divine socket of the Power of Solutions. Almighty God Himself will download your breakthroughs as you declare war against stubborn situations militating against your liberty, which is in Christ Jesus. Some of the prayer declarations in this book will help mandate your unprecedented victory because your breakthrough is a settled case. This book is meat for the spiritual champions who have refused to become failures in the school of prayer. Exposes and challenges the common assumptions about whom and what Jews are, by presenting in their own voices, Jews of color from the Iberian Peninsula, Asia, Africa, and India. Kaye/Kantrowitz delves into the largely uncharted territory of Jews of color and argues that Jews are an increasingly multiracial people. From publisher description. This book constitutes the refereed proceedings of the Second International Conference on Information Systems Security, ICISS 2006, held in Kolkata, India in December 2006. The 20 revised full papers and five short papers presented together with four invited papers and three ongoing project summaries were carefully reviewed and selected from 79 submissions. The papers discuss in depth the current state of the research and practice in information systems security. Eschewing social scientific approaches, which tend to examine race and racism in terms of quasi-static ideal types, this book surveys differing historical

contexts from the era of scientific racism in the nineteenth-century to the post-racial racism of the post 9/11 period, and from Europe to the United States, in order to understand how racism has been articulated in differing situations. It is distinguished by the attention it pays to the ongoing power of racial discourse in the contemporary period as a legitimating factor in oppression. It exemplifies methodological openness, combining the work of historians, philosophers, religious scholars, and literary critics, and includes differing theoretical models in pursuing a critical approach to race: cultural studies; trauma theory and psychoanalysis; critical theory and consideration of the "new racism"; and postcolonialism and the literature on globalization. It brings together the work of leading academics with younger practitioners and is capped off by an interview with world-renowned intellectual Cornel West on black intellectuals in America. This book was previously published as a special issue of *Patterns of Prejudice*. This collection of chapters for K-12, college and university and community based organizations present voices from across the broad community of educators who share their successful empowerment practices using student centered processes inside and outside of the classroom. In any rotating machinery system, the bearing has traditionally been a critical member of the entire system, since it is the component that

permits the relative motion between the stationary and moving parts. Depending on the application, a number of different bearing types have been used, such as oil-lubricated hydrodynamic bearings, gas bearings, magnetic suspensions, rolling element bearings, etc. Hydrodynamic bearings can provide any desired load support, but they are limited in stiffness and the associated power loss may be quite large. Gas bearings are used for high-precision applications where the supported loads are relatively light, bearing power losses are very low, and the rotating speeds generally high. For super precision components where no frictional dissipation or bearing power loss can be tolerated, magnetic suspensions are employed; again, the load support requirements are very low. Rolling element bearings have been widely used for those applications that require greater bearing versatility, due to the requirements for high-load and high-stiffness characteristics, while allowing moderate power loss and permitting variable speeds. A study of the dynamic interaction of rolling elements is, therefore, the subject of this text. Texts covering the analysis and design methodology of rolling elements are very limited. Notable works include *Analysis of Stresses and Deflections* (Jones, 1946, Vols. I and II), *Ball and Roller Bearings, Their Theory, Design and Application* (Eschmann, Hasbargen, and Weigand, 1958), *Ball and Roller*

Bearing Engineering (Palmgren, 1959, 3rd ed.), Advanced Bearing Technology (Bisson and Anderson, 1965), and Rolling Bearing Analysis (Harris, 1966). The case for evidence and collaboration in pursuit of health equity In this second volume of the Culture of Health series, Advancing Health and Well-Being convenes experts from academia, policy, journalism, and community-based organizations, among other sectors, to examine how data and narrative can catalyze progress toward building a national Culture of Health. Tackling topics such as health inequity, mass incarceration, and climate change, Advancing Health and Well-Being does more than draw lines between cause and effect; its 70+ voices lend context and lived experience to critical conversations that may lack such elements. The result is a work that shows the power and promise of evidence and collaboration. Amid continued interest in population health and well-being, this book offers essential reading for those advancing such efforts, and those seeking an early grounding, in pursuit of a Culture of Health. Life goes on. In the Name of Justice is a story of people who live their lives in the shadow of the atrocities, coping with dreams, desires, and ambitions. Tommy Wilson travels across the United States in search of love, fun, education, and reconciliation. He has an ultimatum for his wife: "Love me or leave me." His journey has him confront the insanity,

which is modern life. He finds sex, drugs, fear, adventure, friendship, knowledge, harassment, imprisonment, and intimidation. Life is a challenge for those who stand against oppression, ignorance. and violence when racism, corruption, major indifference. and lunacy reign. Behind the headlines of 2014, life goes on. Gender, Race and Class in Media examines the mass media as economic and cultural institutions that shape our social identities. Through analyses of popular mass media entertainment genres, such as talk shows, soap operas, television sitcoms, advertising and pornography, students are invited to engage in critical mass media scholarship. A comprehensive introductory section outlines the book's integrated approach to media studies, which incorporates three distinct but related areas of investigation: the political economy of production, textual analysis and audience response. The readings include a dozen new original essays, edited for maximum accessibility. The book provides: - A comprehensive, critical introduction to Media Studies - An analysis of race that is integrated into all chapters - Articles on Cultural Studies that are accessible to undergraduates - An extensive bibliography and section on media resources - Expanded coverage of "queer" representations in mass media - A new section on the violence debates - A new section on the Internet Together with new section introductions, these provide a comprehensive

critical introduction to mass media studies. Elections aren't just important - they are revealing. They tell us things about who we are and how we behave. Written by leading political experts, Sex, Lies and Politics reveals what really makes us tick. At once funny, revealing and shocking, it covers everything you need to know about the voters and their quirks, foibles and sexual secrets, including when they lie (often to themselves), how they are swayed by tribal loyalties (even when judging cats and celebrities), and why you should keep quiet about your Brexit vote when moving house... Combining brand-new essays with fully updated pieces from the acclaimed Sex, Lies and the Ballot Box and More Sex, Lies and the Ballot Box, this witty and thought-provoking collection is a guaranteed conversation starter. If you want to discover which party's voters have the wildest private lives, read on. In this compelling book the author contends that social equity--specifically racial equity--is a nervous area of government. Over the course of history, this nervousness has stifled many individuals and organizations, thus leading to an inability to seriously advance the reduction of racial inequities in government. The author asserts that until this nervousness is effectively managed, public administration social equity efforts designed to reduce racial inequities cannot realize their full potential. This authoritative handbook examines the community, district, and

teacher leadership roles that affect urban schools. It will serve as a foundation for pedagogical and educational leadership practices that foster social justice, equity, and advocacy for those who have

been traditionally and historically underserved in education. The handbook's ten sections cover topics as diverse as curriculum, instruction, and educational outcomes; gender, race, and class; higher

education; and leadership preparation and support. Its twenty-nine chapters offer both American and international perspectives.
