Squee from the Margins Dec 06 2020 Rukmini Pande's examination of race in fan studies is sure to make an immediate contribution to the growing field. Until now, virtually no sustained examination of race and racism in transnational fan cultures has taken place, a lack that is especially concerning given that current fan spaces have never been more vocal about debating issues of privilege and discrimination. Pande's study challenges dominant ideas of who fans are and how these complex transnational and cultural spaces function, expanding the scope of the field significantly. Along with interviewing thirty-nine fans from nine different countries about their fan practices, she also positions media fandom as a postcolonial cyberspace, enabling scholars to take a more inclusive view of fan identity. With analysis that spans from historical to contemporary, Pande builds a case for the ways in which non-white fans have always been present in such spaces, though consistently ignored.

Yearning Aug 22 2019 For bell hooks, the best cultural criticism sees no need to separate politics from the pleasure of reading. *Yearning* collects together some of hooks's classic and early pieces of cultural criticism from the '80s. Addressing topics like pedagogy, postmodernism, and politics, hooks examines a variety of cultural artifacts, from Spike Lee's film *Do the Right Thing* and Wim Wenders's film *Wings of Desire* to the writings of Zora Neale Hurston and Toni Morrison. The result is a poignant collection of essays which, like all of hooks's work, is above all else concerned with transforming oppressive structures of domination.

I Love a Broad Margin to My Life Aug 14 2021 In her singular voice—both humble and brave, touching and humorous—Maxine Hong Kingston gives us a poignant and beautiful memoir-in-verse that captures the wisdom that comes with age. As she reflects on her sixty-five years, she circles from present to past and back, from lunch with a writer friend to the funeral of a Vietnam veteran, from her long marriage to her arrest at a peace march in Washington. On her journeys as writer, peace activist, teacher, and mother, she revisits her most beloved characters—Wittman Ah-Sing, the Tripmaster Monkey, and Fa Mook Lan, the Woman Warrior—and presents us with a beautiful meditation on China then and now. The result is a marvelous account of an American life of great purpose and joy, and the tonic wisdom of a writer we have come to cherish.

Ocean Margin Systems Feb 26 2020 Ocean margins are the transitional zones between the oceans and continents. They represent dynamic systems in which numerous processes shape the environment and result in impacting the utilization and hazard potentials for humans. These processes are influenced by a variety of steering mechanisms, from mountain building and climate on the land to tectonics and sea-level fluctuations in ocean margins. This book examines various aspects of regulation for the long-term development of ocean margins, of the impact of fluids and of the dynamics of benthic life at and below the seafloor in ocean margin systems.

Places on the Margin Dec 26 2019 The debate on modernity and postmodernity has awakened interest in the importance of the spatial for cultural formations. This book attempts to develop an alternative geography and sociology of space by examining 'places on the margin'.

Writing at the Margin Jul 13 2021 One of the most influential and creative scholars in medical anthropology takes stock of his recent intellectual odysseys in this collection of essays. Arthur Kleinman, an anthropologist and psychiatrist who has studied in Taiwan, China, and North America since 1968, draws upon his bicultural, multidisciplinary background to propose alternative strategies for thinking about how, in the postmodern world, the social and medical relate. *Writing at the Margin* explores the border between medical and social problems, the boundary between health and social change. Kleinman studies the body as the mediator between individual and collective experience, finding that many health problems—for example the trauma of violence or depression in the course of chronic pain—are less individual medical problems than interpersonal experiences of social suffering. He argues for an ethnographic approach to moral practice in medicine, one that embraces the infrapolitical context of illness, the responses to it, the social institutions relating to it, and the way it is configured in medical ethics. Previously published in various journals, these essays have been revised, updated, and brought together with an introduction, an essay on violence and the politics of post-traumatic stress disorder, and a new chapter that examines the contemporary ethnographic literature of medical anthropology.

Adjusted Margin Nov 17 2021 How xerography became a creative medium and political tool, arming artists and activists on the margins with an accessible means of making their messages public. This is the story of how the xerographic copier, or "Xerox machine," became a creative medium for artists and activists during the last few decades of the twentieth century. Paper jams, mangled pages, and even fires made early versions of this clunky office machine a source of fear, rage, dread, and disappointment. But eventually, xerography democratized print culture by making it convenient and affordable for renegade publishers, zinesters, artists, punks, anarchists, queers, feminists, street activists, and others to publish their work and to get their messages out on the street. The xerographic copier adjusted the lived and imagined margins of society, Eichhorn argues, by supporting artistic and political expression and mobilizing subcultural movements. Eichhorn describes early efforts to use xerography to create art and the occasional scapegoating of urban copy shops and xerographic technologies following political panics, using the post-9/11 raid on a Toronto copy shop as her central example. She examines New York's downtown art and punk scenes of the 1970s to 1990s, arguing that xerography—including photocopied posters, mail art, and zines—changed what cities looked like and how we experienced them. And she looks at how a generation of activists and artists deployed the copy machine in AIDS and queer activism while simultaneously introducing the copy machine's gritty, DIY aesthetics into international art markets. Xerographic copy machines are now defunct. Office copiers are digital, and activists rely on social media more than photocopied posters. And yet, Eichhorn argues, even though we now live in a post-xerographic era, the grassroots aesthetics and political legacy of xerography persists.

From Margin to Mainstream Oct 28 2022 This is a detailed and comprehensive account of women's participation in mainstream American politics at national, state, and local levels during the last 30 years. Hartmann traces their growing role in the political process and describes the issues around which they have mobilized--Equal Rights Amendment, the Equal Pay Act, Federal child care programs, and the appointment of women to high government posts. She notes how the black civil rights movement provided a new frame of reference for a women's movement, and discusses women's participation in the grassroots movements of the 1960s, in major women's organizations, such as the National Organization for Women and National Women's Political Caucus, and looks at women as political candidates and officeholders, and shapers of public policy. Along the Integral Margin Apr 22 2022 In recent years anthropologists have focused on informal, unfree, and other nonnormative labor arrangements and labeled them as "noncapitalist." In *Along the Integral Margin*, Stephen Campbell pushes back against this idea and shows that these labor arrangements are, in fact, important aspects of capitalist development and that the erroneous "noncapitalist" label contributes to obscuring current capitalist relations. Through powerful, intimate ethnographic narratives of the lives and struggles of residents of a squatter settlement in Myanmar, Campbell challenges narrow conceptions of capitalism and asserts that nonnormative labor is not marginal but rather centrally important to Myanmar's economic development. Campbell's narrative approach brings individuals who are often marginalized in accounts of contemporary Myanmar to the forefront and raises questions about the diversity of work in capitalism.

History in Management and Organization Studies Mar 21 2022 There has, in recent times, been an increasing interest in history, broadly defined, among management scholars. But what specifically a historical approach or perspective can contribute to research on organizational fields, organizations, strategy etc. and how exactly such historical research should be carried out remain questions that have been answered only partially, if at all. Building on the authors' prior and ongoing work, *History in Management and Organization Studies: From Margins to Mainstream* is unique in presenting a comprehensive and integrated view of how history has informed management research with a focus on organization theory and strategy. More specifically, the volume provides an overview of how the relationship between history and management scholarship has evolved from the 19th century until today, focusing mainly on the post-World War II period; and systematically surveys the kind of research programs within organization theory and strategy that have used historical data and/or history as a theoretical construct, while also identifying the remaining "blind spots". As a whole, it offers a kind of roadmap for management scholars and historians to situate their research and, hopefully, find new roads for others to travel. The book is intended for anybody conducting or planning to conduct historical research within management and organization studies, and aims, in particular, at becoming a standard feature of research methods courses in business schools and departments of management.

Plants at the Margin Mar 09 2021 Margins are by their very nature environmentally unstable - does it therefore follow that plant populations adapted for life in such areas will prove to be pre-adapted to withstand the changes that may be brought about by a warmer world? Biogeography, demography, reproductive biology, physiology and genetics all provide cogent explanations as to why limits occur where they do, and the purpose of this book is to bring together these different

avenues of enquiry. Crawford's numerous beautiful illustrations of plants in their natural habitats remind us that the environment remains essential to our understanding of plants and their function. This book is suited to students, researchers and anyone with an interest in the impact of climate change on our world.

Feminist Theory Nov 29 2022 When *Feminist Theory: From Margin to Center* was first published in 1984, it was welcomed and praised by feminist thinkers who wanted a new vision. Even so, individual readers frequently found the theory "unsettling" or "provocative." Today, the blueprint for feminist movement presented in the book remains as provocative and relevant as ever. Written in hooks's characteristic direct style, *Feminist Theory* embodies the hope that feminists can find a common language to spread the word and create a mass, global feminist movement.

Feminist Theory Dec 30 2022 In this updated text of sexual politics, bell hooks argues that the contemporary feminist movement must establish a new direction for the future. A leading cultural critic, she contends that feminism has not succeeded in creating a mass movement against sexism because the foundation of the women's movement has not fully accounted for the complexity and diversity of female experience. In order to fulfil its revolutionary potential, feminist theory must begin by consciously transforming its own definition to encompass the lives and ideas of women on the margin. This new edition includes an original preface by the author that brings it up to date.

Mothers on the Margin? May 31 2020 The Gospel of Matthew opens with a patrilineal genealogy of Jesus that intriguingly includes five women: Tamar, Rahab, Ruth, "she of Uriah," and Mary. In a gospel that has a strongly Jewish and male-orientated outlook, why are women incorporated? In particular, why include these four Old Testament women alongside Mary? Rejecting traditional as well as feminist views, Anne Clements undertakes a close literary reading of the narratives to discern how each woman is characterized and presented. All are significant scriptural figures on the margins of Israelite society. From this intertextual world established by Matthew, Clements explores

why Matthew may have named these women in the opening genealogy and what implications their inclusion may have for the ongoing gospel narrative. *Mothers on the Margin?* argues that Matthew's Gospel contains a counter narrative focused on women. The presence of the five women in the genealogy indicates that the birth of the Messiah will bring about a crisis in Israel's identity in terms of ethnicity, marginality, and gender. The women signal that Matthew's Gospel is concerned with the construal of a new identity for the people of God.

Advances in Large Margin Classifiers Dec 18 2021 The book provides an overview of recent developments in large margin classifiers, examines connections with other methods (e.g., Bayesian inference), and identifies strengths and weaknesses of the method, as well as directions for future research. The concept of large margins is a unifying principle for the analysis of many different approaches to the classification of data from examples, including boosting, mathematical programming, neural networks, and support vector machines. The fact that it is the margin, or confidence level, of a classification--that is, a scale parameter--rather than a raw training error that matters has become a key tool for dealing with classifiers. This book shows how this idea applies to both the theoretical analysis and the design of algorithms. The book provides an overview of recent developments in large margin classifiers, examines connections with other methods (e.g., Bayesian

inference), and identifies strengths and weaknesses of the method, as well as directions for future research. Among the contributors are Manfred Opper, Vladimir Vapnik, and Grace Wahba.
