Fascism, Communism and the Consolidation of

Democracy Dec 19 2021

Authoritarian and totalitarian systems of individual countries have long been studied independently of each other. Only in recent years has a comparative perspective in the regional, chronological and system-oriented sense been applied, thus allowing many phenomena to be correctly understood and assessed. In the present anthology Mussolini's Fascism, National Socialism, and Communism are examined comparatively. Similarities, connections, and mutual influences in these dictatorships are sought. Finally, the transition from dictatorship to democracy is examined. With this collection of essays the editors intend to give impulse for inter-European comparative research on dictatorships and democracy. Gerhard Besier is director of the Hannah Ahrendt Institute for the Research on Totalitarianism at Technical University of Dresden (Germany). Katarzyna Stoklosa

is a researcher at the Hannah Ahrendt Institute for the Research on Totalitarianism at Technical University of Dresden. Francesca Piombo is a researcher at the Hannah Ahrendt Institute in Dresden.

Press * to Engage Jul 14 2021

Is employee engagement a myth or an opportunity? It all depends on your perspective. While not a step-by-step guide, this is employee engagement broken down into bite-size pieces. It is a perspective - certainly not the only perspective - on demystifying the topic of employee engagement, regardless of whether you are an employee or employer. Designed as a light read, it draws on easy and practical examples, designed to entice you into loving the topic as much as the author. A one-person company or a cast of thousands, engagement matters, so press to engage. [The Rakess](#) Mar 22 2022 Named one of the Best Romance of 2020 by EW, Washington Post, NPR, and Bookpage! Meet the SOCIETY OF SIRENS—three radical,

libertine ladies determined to weaponize their scandalous reputations to fight for justice and the love they deserve... She's a Rakes on a quest for women's rights... Seraphina Arden's passions include equality, amorous affairs, and wild, wine-soaked nights. To raise funds for her cause, she's set to publish explosive memoirs exposing the powerful man who ruined her. Her ideals are her purpose, her friends are her family, and her paramours are forbidden to linger in the morning. He's not looking for a summer lover... Adam Anderson is a wholesome, handsome, widowed Scottish architect, with two young children, a business to protect, and an aversion to scandal. He could never, ever afford to fall for Seraphina. But her indecent proposal—one month, no strings, no future—proves too tempting for a man who strains to keep his passions buried with the losses of his past. But one night changes everything... What began as a fling soon forces them to confront painful

secrets—and yearnings they thought they'd never have again. But when Seraphina discovers Adam's future depends on the man she's about to destroy, she must decide what to protect... her desire for justice, or her heart. **The Witcher Notebook** Nov 17 2021 Geralt the Witcher -- revered and hated -- holds the line against the monsters plaguing humanity in this collection of adventures in the NYT bestselling series that inspired the blockbuster video games. Geralt is a Witcher, a man whose magic powers, enhanced by long training and a mysterious elixir, have made him a brilliant fighter and a merciless assassin. Yet he is no ordinary murderer: his targets are the multifarious monsters and vile fiends that ravage the land and attack the innocent. But not everything monstrous-looking is evil and not everything fair is good...and in every fairy tale there is a grain of truth. Andrzej Sapkowski, winner of the World Fantasy Lifetime Achievement award, started an international

phenomenon with his Witcher series. The Last Wish short story collection is the perfect introduction to this one of a kind fantasy world. Informal Reasoning and Education Apr 30 2020 Based on extensive reasoning acquisition research, this volume provides theoretical and empirical considerations of the reasoning that occurs during the course of everyday personal and professional activities. Of particular interest is the text's focus on the question of how such reasoning takes place during school activities and how students acquire reasoning skills.

[Treaty on the Functioning of the European Union - A Commentary](#) Feb 27 2020 The Commentary on the Treaty on the Functioning of the European Union (four volumes) is a major European project that aims to contribute to the development of ever closer conceptual and dogmatic standpoints with regard to the creation of "Europeanised research on Union law". Following on from the Commentary on the Treaty of the European Union, this book presents detailed explanations, article by article, of all the

provisions of the TFEU, discussing the application of Union law in the national legal orders and its interpretation by the Court of Justice of the EU. The authors are academics and practitioners from twenty-eight European states and different legal fields, some from a constitutional law background, others experts in the field of international law and EU law. Reflecting the various approaches to European legal culture, this book promotes a system concept of European Union law toward more unity notwithstanding its rich diversity grounded in national traditions.

Gandhian Thought Jul 26

2022 If there is only one book

about Mohandas Karamchand Gandhi that you need to read today, make Gandhian Thought, New World, New Dimensions by Ravindra Kumar be the book. There are many Gandhian scholars around the world but Kumar is peerless. What sets Kumar apart from the other scholars is that like Gandhi he is Indian, and he understands the culture and customs behind the teachings and the philosophy. One can never study Gandhi and try to separate him from his ethnology. He is a noteworthy researcher. Kumar's interpretation of Gandhi and his ideas is outstanding. Kumar, an educator who has authored over a hundred books, has emerged as one of the great thinkers of our time, and a leading Gandhian scholar. In this book he articulates on Satyagraha, the Sustainable Culture of Peace and how the Gandhian philosophy applies in current international conflicts, Sudan, Myanmar, Iraq, Iran, and other countries. The book also addresses the fundamental

question, is Gandhi relevant today? This book should be a required reading for all individuals who are interested in peace and the Gandhian theory. This book is a necessary read.

Englishness Revisited May 31 2020 What is Englishness? Is there such a thing as a national temperament, is there a character or an identity which can be claimed to be specifically English? This collection of articles seeks to answer these questions by offering a kaleidoscopic vision of Englishness since the

eighteenth century, a vision that acknowledges stereotypes while at the same time challenging them. Englishness is defined in contrast to Britishness, the Celtic fringe—Scotland in particular—Europe and the Continent at large. The effects of the Empire and of its loss are examined together with other socio-economic factors such as the two World Wars, de-industrialization and the different waves of immigration. Through a careful analysis of the arts, literature, philosophy, historiography, cultural and political studies produced in England and on the Continent over the last three centuries, a composite image of Englishness emerges, somewhere between centre and periphery, tradition and innovation, transience and timelessness, rurality and urbanity, commitment and isolation. Englishness is thus revealed as a protean concept, one which, whether it is a historical or political construct, a genuine emanation of a national desire or a

simulacrum, retains its fascination and this volume offers keys to understanding its diverse expressions.

Integrated Power And Desalination Plants Oct 05 2020 Application of advanced computer-oriented techniques are necessary in the synthesis, design analysis and operation of a complex integrated plant to produce power and freshwater, by desalting seawater or brackish water, at higher efficiency and lower cost. These are the two vital commodities to maintains sustainability of life, particularly in the arid regions where natural freshwater supply is either totally lacking or has become scarce. Even in the regions with polluted water resources, such a system is required to support life. At the same time, the available energy should be put to maximum use and life-cycle analysis is essential to ensure sustainability of the systems. The contributors of this book, experts in their own respective fields, outline the various techniques enriched by their experience. The contents of the book would, therefore, be of great interest not only to designers and operators of

dual-purpose power-desalination plants but also to educators and researchers as well serve as a valuable source of information to those engaged in other areas of processing industry. The book is motivated by the growing importance of integrated power and desalination plants in general and in their respective regions in particular, and the long felt need for an authoritative book on the subject. After a long gap of more than two decades following the publication of "Principles of Desalination" Spiegler and Laird in 1980, this book would be a welcome addition to the literature in the field to serve as a valuable guide and reference to all those who are concerned with the integration of power and desalination plants. It will also serve as a valuable source of information to those in the processing industry in general. A. Black Sep 15 2021 Perfect for personal use, or for your whole office. Get yours today!
