## Modification Work Orders Product Liability Operations Manual for Owners and Managers of Multi-Unit Residential Buildings

In Sugar Grove, New Hampshire, people are serious about their maple syrup—especially Dani Greene, whose family owns the Greener Pastures sugarhouse. But when murder disrupts the small-town sweetness, Dani pores over clues to draw out a killer... Despite being a fourth-generation syrup maker, Dani isn't stuck in the past. She's starting a new agricultural cooperative that reduces costs for every syrup producer who joins. Everyone considers it a sweet deal except the die-hard curmudgeon Frank Lemieux—and when a saboteur starts targeting supporters, everyone suspects Frank. But it turns out they're barking up the wrong tree when Dani finds Frank murdered in his own sugarhouse. As the sabotage continues, she realizes that Frank was framed. With the help of her family, and a handsome official from the Fish and Game Department, Dani must catch the killer before another syrup maker kicks the bucket. Recipes Included! Since its emergence in early 2020, the COVID-19 crisis has affected every part of the world. Well beyond its health effects, the pandemic has wrought major changes in people's everyday lives as they confront restrictions imposed by physical distancing and consequences such as loss of work, working or learning from home and reduced contact with family and friends. This edited collection covers a diverse range of experiences, practices and representations across international contexts and cultures (UK, Europe, North America, South Africa, Australia and New Zealand). Together, these contributions offer a rich account of COVID society. They provide snapshots of what life was like for people in a variety of situations and locations living through the first months of the novel coronavirus crisis, including discussion not only of health-related experiences but also the impact on family, work, social life and

leisure activities. The socio-material dimensions of quotidian practices are highlighted: death rituals, dating apps, online musical performances, fitness and exercise practices, the role of windows, healthcare work, parenting children learning at home, moving in public space as a blind person and many more diverse topics are explored. In doing so, the authors surface the feelings of strangeness and challenges to norms of practice that were part of many people's experiences, highlighting the profound affective responses that accompanied the disruption to usual cultural forms of sociality and ritual in the wake of the COVID outbreak and restrictions on movement. The authors show how social relationships and social institutions were suspended, re-invented or transformed while social differences were brought to the fore. At the macro level, the book includes localised and comparative analyses of political, health system and policy responses to the pandemic, and highlights the differences in representations and experiences of very different social groups, including people with disabilities, LGBTQI people, Dutch Muslim parents, healthcare workers in France and Australia, young adults living in northern Italy, performing artists and their audiences, exercisers in Australia and New Zealand, the Latin cultures of Spain and Italy, Asian-Americans and older people in Australia. This volume will appeal to undergraduates and postgraduates in sociology, cultural and media studies, medical humanities, anthropology, political science and cultural geography. This book analyzes the theory and practice of products liability litigation, whether the issue is drugs, food, chemicals, or any of the 100s of other products that may be the subject of litigation.
