Laser-Doppler Blood Flowmetry Sep 05 2020 The dance along the artery The circulation on the lymph Are figured in the drift of stars. T. S. Eliot Die Methode ist alles. Carl Ludwig In physiology a spirit of finesse is required. Claude Bernard Armed with modern Doppler instrumentation, scientists can now quantify the red blood cell's "dance along the artery" as well as "the drift of stars. " In disciplines of science and medicine ranging from cardiology to astronomy, the Doppler principle now

provides invaluable velocity measurements in the microcosm of capillary beds and in the cosmos. The newest application of the ubiquitous Doppler principle, laser-Doppler velocimetry, has been used to measure blood flow in tissue for just a few years, but we perceived that, like most new techniques, the birth of laser-Doppler blood flowmetry was not easy, nor was it likely to pass through infancy and reach maturity without difficulty. In physiology and medicine, better techniques for measuring blood flow are constantly in demand, but they often exhibit an unfortunate boom-and-bust cycle: widespread acceptance and uncritical use are soon followed by studies delineating the limits of the method's validity. The technique is then abandoned for the next more fashionable one, thus proving Ludwig's dictum that a given method is everything or nothing depending upon whether one can believe the data it yields.

A-Z Meridian Manual Jun 14 2021 This 155 page Meridian A - Z Manual was created to assist practitioners, who are expert in a specific healing art (chiropractic, Rolfing, physical therapy, naturopathic medicine, MD's, DO's, licensed massage), in applying an additional, simple and beneficial treatment for their patients using the meridian system with confidence and accuracy. The meridian system in the human body is the basis for many different healing modalities. There are specific acupuncture points along the meridians. These points are electro-magnetic in character and together they form the matrix within which the body functions. They also act as a network of communication between the physical and the more subtle energetic bodies. The stimulation of specific points along the meridian system relates to the specific area within the body that is in need of healing. A variety of methods may be used to stimulate these points; the use of needles, acupressure, electrical stimulation, micro-current, press pads, or magnets etc. My personal favorite is the use of Low Level Laser Therapy with its amazing regenerative and cellular communication benefits combined with the use of specific points, along the meridians, to achieve some of the most

beneficial clinical applications, ever! This process works because the point being stimulated lies on a meridian whose energy also passes through the injured or diseased part of the body; the use of the laser on a specific acupuncture point can be transmitted along the meridian to a place within the body that is in need of healing. This manual will also be beneficial to those who have dedicated their professional careers to that of being an expert licensed acupuncturist by providing an incredibly useful resource (reminder) to use in their day to day treatment procedures.
