Global Tuberculosis Report 2017 Aug 24 2019
WHO's Global Tuberculosis Report provides a
comprehensive and up-to-date assessment of
the TB epidemic and of progress in care and
prevention at global, regional and country
levels. This is done in the context of
recommended global TB strategies and
associated targets, and broader development
goals. For the period 2016-2035, these are
WHO's End TB Strategy and the United
Nations' (UN) Sustainable Development Goals
(SDGs), which share a common aim: to end the
global TB epidemic. The main data sources for

the report are annual rounds of global TB data
collection implemented by WHO's Global TB
Program since 1995 and databases maintained
by other WHO departments, UNAIDS and the
World Bank. In WHO's 2017 round of global TB
data collection, 201 countries and territories
that account for over 99% of the world's
population and TB cases reported data.

Managing as Designing Dec 29 2019 The
premise of this book is that managers should
act not only as decision makers, but also as
designers. In a series of essays from a
multitude of disciplines, the authors develop a
theory of the design attitude in contrast to the
more traditionally accepted and practiced
decision attitude.

Cyber Risks and Insurance Sep 17 2021 "Full of
tips, case studies, tables and checklists this
new title sets out the parameters of liability in
respect of potential and actual cyber insurance
claims and examines the significant areas
where such claims will have the greatest
impact. Covering First and Third party
insurance, it provides the answers to questions
such as: What is the extent to which a data
breach can be protected or mitigated against by
having suitable insurance in place? How does
having insurance interplay with obligations
under the GDPR? To what extent can insurance

be used to safeguard driverless cars, drones and other AI-machines? How can insurance companies assist when hackers hold companies to ransom after stealing data? How can insurance assist with smart contracts on the blockchain and for potential coding errors? How can insurance mitigate against the hacking of online systems of manned ships?"--

Crossing the Global Quality Chasm Jun 14 2021 In 2015, building on the advances of the Millennium Development Goals, the United Nations adopted Sustainable Development Goals that include an explicit commitment to achieve universal health coverage by 2030. However, enormous gaps remain between what is achievable in human health and where global health stands today, and progress has been both incomplete and unevenly distributed. In order to meet this goal, a deliberate and comprehensive effort is needed to improve the quality of health care services globally. **Crossing the Global Quality Chasm: Improving Health Care Worldwide** focuses on one particular shortfall in health care affecting global populations: defects in the quality of care. This study reviews the available evidence on the quality of care worldwide and makes recommendations to improve health care quality globally while expanding access to preventive and therapeutic services, with a focus in low-resource areas. **Crossing the Global Quality Chasm** emphasizes the organization and delivery of safe and effective care at the patient/provider interface. This

study explores issues of access to services and commodities, effectiveness, safety, efficiency, and equity. Focusing on front line service delivery that can directly impact health outcomes for individuals and populations, this book will be an essential guide for key stakeholders, governments, donors, health systems, and others involved in health care.

An Unfair Start Feb 08 2021 This report focuses on educational inequalities in 41 of the world's richest countries, all of which are members of the Organisation for Economic Co-operation and Development (OECD) and/or the European Union (EU). Using the most recent data available, it examines inequalities across childhood -- from access to preschool to expectations of post-secondary education -- and explores in depth the relationships between educational inequality and factors such as parents' occupations, migration background, the child's gender and school characteristics. The key feature of the report is the league table, which summarizes the extent of educational inequalities at preschool, primary school and secondary school levels.

African Health Leaders Oct 26 2019 Most accounts of health and healthcare in Africa are written by foreigners. **African Health Leaders: Making Change and Claiming the Future** redresses the balance. Written by Africans, who have themselves led improvements in their own countries, the book discusses the creativity, innovation and leadership that has been involved tackling everything from HIV/AIDs, to

maternal, and child mortality and neglected tropical diseases. It celebrates their achievements and shows how, over three generations, African health leaders are creating a distinctively African vision of health and health systems. The book reveals how African Health Leaders are claiming the future - in Africa, but also by sharing their insights and knowledge globally and contributing fully to improving health throughout the world. It illustrates how African leadership can enable foreign agencies and individuals working in Africa to avoid all those misunderstandings and misinterpretations of culture and context which lead to wasted efforts and frustrated hopes. **African Health Leaders** challenges Africans to do more for themselves; build on success; tackle weak governance, corrupt systems and low expectations and claim the future. It sets out what Africa needs from the rest of the world in the spirit of global solidarity - not primarily in aid, but through investment, collaboration, partnership and co-development. It concludes with a vision for improvement based on three foundations: an understanding that 'health is made at home'; the determination to offer access to health services for everyone; and an insistence on the pursuit of quality.

The Cantonese Made Easy Vocabulary Oct 19 2021 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United

States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. Poverty as Ideology Jan 28 2020 Winner of the International Studies in Poverty Prize awarded by the Comparative Research Programme on Poverty (CROP) and Zed Books. Poverty has become the central focus of global development efforts, with a vast body of research and funding dedicated to its alleviation. And yet, the field of poverty studies remains deeply ideological and has been used to justify wealth and power within the prevailing world order. Andrew Martin Fischer clarifies this deeply political character, from conceptions and measures of poverty through to their application as policies. Poverty as Ideology shows how our dominant approaches to poverty studies have, in fact, served to reinforce the

prevailing neoliberal ideology while neglecting the wider interests of social justice that are fundamental to creating more equitable societies. Instead, our development policies have created a 'poverty industry' that obscures the dynamic reproductions of poverty within contemporary capitalist development and promotes segregation in the name of science and charity. Fischer argues that an effective and lasting solution to global poverty requires us to reorient our efforts away from current fixations on productivity and towards more equitable distributions of wealth and resources. This provocative work offers a radical new approach to understanding poverty based on a comprehensive and accessible critique of key concepts and research methods. It upends much of the received wisdom to provide an invaluable resource for students, teachers and researchers across the social sciences. Understanding the Insurance Industry - 2020 Edition Apr 24 2022 An Overview for Those Interested In the Insurance Industry. AM Best Company publishes Understanding the Insurance Industry annually explain how the insurance industry operates, generates revenue and provides opportunities for people of a wide range of talents and interests. It's also designed to be an easy-to-follow introduction to the insurance industry for students, new employees, prospects and those who would like to learn more about one of the world's most interesting and important financial service industries. We've designed this book in six

sections: the overview, property/casualty sector (also known as nonlife insurance), life, health, reinsurance and alternative risk transfer, and the function of AM Best in the industry.

Delivering Quality Health Services: A Global Imperative Jun 02 2020 This report describes the current situation with regard to universal health coverage and global quality of care, and outlines the steps governments, health services and their workers, together with citizens and patients need to urgently take.

Risk, Surprises and Black Swans Nov 27 2019 Risk, Surprises and Black Swans provides an in depth analysis of the risk concept with a focus on the critical link to knowledge; and the lack of knowledge, that risk and probability judgements are based on. Based on technical scientific research, this book presents a new perspective to help you understand how to assess and manage surprising, extreme events, known as 'Black Swans'. This approach looks beyond the traditional probability-based principles to offer a broader insight into the important aspects of uncertain events and in doing so explores the ways to manage them. This book recognises the fundamental issues surrounding risk assessment and risk management to help you to understand and prepare for black swan events. Complete with international examples to illustrate ideas and concepts Integrates risk management and resilience based thinking Suitable for a variety of applications including engineering, finance and security.

Atlas of Sustainable Development Goals

2018 Jul 04 2020 The Atlas of Sustainable Development Goals 2018 is a visual guide to the trends, challenges and measurement issues related to each of the 17 Sustainable Development Goals. The Atlas features maps and data visualizations, primarily drawn from World Development Indicators (WDI) - the World Bank's compilation of internationally comparable statistics about global development and the quality of people's lives. Given the breadth and scope of the SDGs, the editors have been selective, emphasizing issues considered important by experts in the World Bank's Global Practices and Cross Cutting Solution Areas. Nevertheless, The Atlas aims to reflect the breadth of the Goals themselves and presents national and regional trends and snapshots of progress towards the UN's seventeen Sustainable Development Goals related to: poverty, hunger, health, education, gender, water, energy, jobs, infrastructure, inequalities, cities, consumption, climate, oceans, the environment, peace, institutions, and partnerships.

[Nutrition for Developing Countries](#) Jun 26 2022

Nutrition is an essential component of the work of all health and community workers, including those involved in humanitarian assistance, and yet it is often neglected in their basic training. Drawn from the experiences of an international editor team with extensive field experience,

Nutrition for Developing Countries brings together the essential basics of nutrition in an easily accessible form which is accurate, up-to-date and practical, and suitable for a wide range of readers at different levels. The book covers the whole life cycle, including pregnancy, breastfeeding, complementary feeding, older children, adolescents, adults and the elderly, with an emphasis on the most vulnerable women and children. The fully revised and updated edition addresses both the long standing problems of undernutrition and malnutrition, and the growing epidemic of overnutrition and obesity, which are responsible for the rapid increase in non-communicable diseases of later life. Generously illustrated, Nutrition for Developing Countries explains in clear simple language, and practical detail, how nutrition workers can help families with nutrition problems, including many ideas for exercises for training nutrition workers.

Creating Collaborative Advantage Dec 09

2020 Inter-organizational collaboration is becoming increasingly significant as a means of achieving organizational objectives in turbulent environments. Yet it is not an easy process to implement successfully. Drawing on the work of authors with a high level of relevant experience, this volume provides a thought-provoking and accessible introduction to the theory and practice of 'creating collaborative advantage'. The first part of the book develops a framework of key dimensions for understanding collaboration. Different

perspectives highlight the diversity of rationales and contexts involved, and the range of elements which need to be considered and addressed when embarking on collaborative endeavours. The second section focuses in more detail on collaboration in practice. It examines the problems that can occur when different 'stakeholders', who frequently hold different aims, cultures, procedures, professional languages and power resources, work across organizational boundaries. The last section addresses specifically the processes of acting as a facilitator to collaborative groups. It discusses how and why a third party facilitator role can be helpful, and explores the various processes and techniques that can be used.

[Good Health and Well-Being](#) Dec 21 2021 The problems related to the process of industrialisation such as biodiversity depletion, climate change and a worsening of health and living conditions, especially but not only in developing countries, intensify. Therefore, there is an increasing need to search for integrated solutions to make development more sustainable. The United Nations has acknowledged the problem and approved the "2030 Agenda for Sustainable Development". On 1st January 2016, the 17 Sustainable Development Goals (SDGs) of the Agenda officially came into force. These goals cover the three dimensions of sustainable development: economic growth, social inclusion and environmental protection. The Encyclopedia of the UN Sustainable Development Goals

comprehensively addresses the SDGs in an integrated way. The Encyclopedia encompasses 17 volumes, each one devoted to one of the 17 SDGs. This volume addresses SDG 3, namely "Ensure healthy lives and promote well-being for all at all ages" and contains the description of a range of terms, to grow a better understanding and foster knowledge. Ensuring healthy lives and promoting the well-being for all at all ages is essential to sustainable development. Significant strides have been made in increasing life expectancy and reducing some of the common killers associated with child and maternal mortality. Major progress has been made on increasing access to clean water and sanitation, reducing malaria, tuberculosis, polio and the spread of HIV/AIDS. However, many more efforts are needed to fully eradicate a wide range of diseases and address many different persistent and emerging health issues. Concretely, the defined targets are: Reduce the global maternal mortality ratio to less than 70 per 100,000 live births End preventable deaths of newborns and children under 5 years of age, with all countries aiming to reduce neonatal mortality to at least as low as 12 per 1,000 live births and under-5 mortality to at least as low as 25 per 1,000 live births End the epidemics of AIDS, tuberculosis, malaria and neglected tropical diseases and combat hepatitis, water-borne diseases and other communicable diseases Reduce by one third premature mortality from non-communicable diseases through prevention and

treatment and promote mental health and wellbeing Strengthen the prevention and treatment of substance abuse, including narcotic drug abuse and harmful use of alcohol Halve the number of global deaths and injuries from road traffic accidents Ensure universal access to sexual and reproductive health-care services, including for family planning, information and education, and the integration of reproductive health into national strategies and programmes Achieve universal health coverage, including financial risk protection, access to quality essential health-care services and access to safe, effective, quality and affordable essential medicines and vaccines for all Substantially reduce the number of deaths and illnesses from hazardous chemicals and air, water and soil pollution and contamination Strengthen the implementation of the World Health Organization Framework Convention on Tobacco Control in all countries, as appropriate Support the research and development of vaccines and medicines for the communicable and non-communicable diseases that primarily affect developing countries, provide access to affordable essential medicines and vaccines, in accordance with the Doha Declaration on the TRIPS Agreement and Public Health, which affirms the right of developing countries to use to the full the provisions in the Agreement on Trade-Related Aspects of Intellectual Property Rights regarding flexibilities to protect public health, and, in particular, provide access to medicines for all Substantially increase health

financing and the recruitment, development, training and retention of the health workforce in developing countries, especially in least developed countries and small island developing states Strengthen the capacity of all countries, in particular developing countries, for early warning, risk reduction and management of national and global health risks Editorial Board Mohamed Walid Abdullah Meherun Ahmed Monica de Andrade Masoud Mozafari Giorgi Pkhakadze Tony Wall Catherine Zeman/div/div Global Catastrophic Biological Risks Mar 24 2022 This volume focuses on Global Catastrophic Biological Risks (GCBRs), a special class of infectious disease outbreaks or pandemics in which the combined capacity of the world's private and government resources becomes severely strained. These events, of which the 1918 influenza pandemic is emblematic, cause severe disruptions in the normal functioning of the world, exact heavy tolls in terms of morbidity and mortality, and lead to major economic losses. GCBRs can be caused by any type of microorganism, and myriad contextual factors can influence their impact. Additionally, there are cascading questions that arise in connection with GCBR prediction, preparation, and response. This book gathers contributions from thought leaders who discuss the multi-faceted approaches needed in order to address this problem. From understanding the special characteristics of various microbes to financing

challenges, the volume provides an essential primer on a neglected but highly relevant topic. Physicians, scientists, policymakers, public health practitioners and anyone with an interest in the field of pandemics, emerging infectious disease, biosecurity, and global health security will find it a valuable and insightful resource.

World Fertility Patterns 2015 Data Booklet Oct 07 2020 This data booklet summarises and presents key fertility indicators on world fertility patterns from the latest population estimates and projections, World Population Prospects 2015. The relevant data and evidence are made available in an easily accessible manner.

7 Biblical Truths You Won't Hear in Church Oct 31 2022 Encourages disaffected Christians who have given up on expecting anything out of their faith, launching them on a path of new understanding that can deepen their friendship with and appreciation of the Father, as well as refresh their enthusiasm. Original.

The Cumulative Book Index Aug 29 2022
Framework for a Public Health Emergency Operations Centre Sep 25 2019 The Framework for a Public Health Emergency Operations Centre (PHEOC framework) document is intended to be used by practitioners of public health; health policy makers; and authorities and agencies responsible for managing emergencies, incidents, or events where the health of

populations is at risk. This document provides high-level methodical guidance for designing, developing, and strengthening of public health emergency operations centers. This interim document outlines the key concepts and essential requirements for developing and managing a public health EOC (PHEOC). The overall approach is generic and based on widely acknowledged elements of all-hazards emergency management. It provides an outline for developing and managing a PHEOC to achieve a goal-oriented response to public health emergencies and unity of effort among response agencies. The document will be revised as necessary. Practical guidance on specific aspects of the PHEOC framework will be developed and published separately. A public health emergency is here defined as an occurrence, or imminent threat, of an illness or health condition that poses a substantial risk of a significant number of human fatalities, injuries or permanent or long-term disability. Public health emergencies can result from a wide range of hazards and complex emergencies. Experience has shown that timely implementation of an EOC provides an essential platform for the effective management of public health emergencies. Public health emergencies involve increased incidence of illness, injury and/or death and require special measures to address increased morbidity, mortality and interruption of essential health services. For such emergencies, a multi-agency, multi-jurisdictional response is often required,

working with the national disaster management organization. When normal resources and capacities are exceeded, support from outside the affected areas will also be required. External assistance could include national, cross-border, regional or international resources.

INSPIRE Handbook Sep 05 2020 INSPIRE is a resource to help governments, international agencies, and non-government organisations prevent and respond to violence against children. It was developed by 10 international and U.S.-based agencies and includes strategy documents and implementation tools. This handbook provides guidance on how to choose and implement interventions based on specific needs and context, and is organised around the 7 key INSPIRE strategies: implementation and enforcement of laws; norms and values; safe environments; parent and caregiver support; income and economic strengthening; response and support services; and education and life skills. The handbook also provides an overview of implementation and impact indicators, drawn from the companion document 'INSPIRE indicator guidance and results framework'.
The Healthcare Manifesto Mar 31 2020 A book for executives, companies, human resource people, and anyone who manages employee healthcare and benefits. Did you know you really can control your healthcare/health insurance spend? You also CAN: improve the quality of the care given to your employees and their family members. provide a richer plan for

employees ?simultaneously reduce the cost for those benefits. Not just by 5% or 10%, but up to more than 40% less cost than competitors. Finally, you can be the bridge and hero to your company and employees just by reading and implementing 1 or 2 principles this book outlines. So please get started today.

Pregnant in the Time of Ebola May 26 2022 This comprehensive account of the deadliest Ebola outbreak in history examines its devastating effects on West Africa's most vulnerable populations: pregnant women and children. Noted experts across disciplines assess health care systems' responses to the epidemic in Liberia, Guinea, and Sierra Leone, emphasizing key areas such as pregnancy, prenatal services, childbirth, neonatal care, and survivor health among pregnant and non-pregnant women. The 30 chapters hone in on gender-based social issues exacerbated during the outbreak, from violence against women and girls to barriers to female education. At the same time, chapters pinpoint numerous areas for service delivery and policy improvements for more coordinated, effective, and humane actions during future pandemics. A sampling of the topics: Ebola virus disease: perinatal transmission and epidemiology Comprehensive clinical care for children with Ebola virus disease Maternal and reproductive rights: Ebola and the law in Liberia Ebola-related complications for maternal, newborn, and child health service delivery and utilization in Guinea The Ebola epidemic halted female genital

cutting in Sierra Leone—temporarily Maternity care for Ebola at Médecins Sans Frontières centers Stigmatization of pregnant women with and without Ebola Exclusion of women and infants from Ebola treatment trials Role of midwives during the Ebola epidemic Pregnant in the Time of Ebola is a powerful resource for public health specialists, anthropologists, social scientists, physicians, epidemiologists, nurses, midwives, and governmental and non-governmental agency staff studying the effects of the epidemic on women and children as a result of the most widespread Ebola outbreak to date.

The Discipline of Market Leaders May 02 2020 Why is it that Casio can sell a calculator more cheaply than Kellogg's can sell a box of corn flakes? Why can FedEx "absolutely, positively" deliver your package overnight but airlines have trouble keeping track of your bags? What does your company do better than anyone else? What unique value do you provide to your customers? How will you increase that value next year? As customers' demands for the highest quality products, best services, and lowest prices increase daily, the rules for market leadership are changing. Once powerful companies that haven't gotten the message are faltering, while others, new and old, are thriving. In disarmingly simple and provocative terms, Treacy and Wiersema show what it takes to become a leader in your market, and stay there, in an ever more sophisticated and demanding world.

Marriage Intentions Feb 29 2020 This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Cumulative Book Index Sep 29 2022 A world list of books in the English language. *Books and Pamphlets, Including Serials and Contributions to Periodicals* Apr 12 2021 Business Model Generation Dec 01 2022 Business Model Generation is a handbook for visionaries, game changers, and challengers striving to defy outmoded business models and

design tomorrow's enterprises. If your organization needs to adapt to harsh new realities, but you don't yet have a strategy that will get you out in front of your competitors, you need Business Model Generation. Co-created by 470 "Business Model Canvas" practitioners from 45 countries, the book features a beautiful, highly visual, 4-color design that takes powerful strategic ideas and tools, and makes them easy to implement in your organization. It explains the most common Business Model patterns, based on concepts from leading business thinkers, and helps you reinterpret them for your own context. You will learn how to systematically understand, design, and implement a game-changing business model--or analyze and renovate an old one. Along the way, you'll understand at a much deeper level your customers, distribution channels, partners, revenue streams, costs, and your core value proposition. Business Model Generation features practical innovation techniques used today by leading consultants and companies worldwide, including 3M,

Ericsson, Capgemini, Deloitte, and others. Designed for doers, it is for those ready to abandon outmoded thinking and embrace new models of value creation: for executives, consultants, entrepreneurs, and leaders of all organizations. If you're ready to change the rules, you belong to "the business model generation!"
