Strengthening the International Monetary System - Taking Stock and Looking Ahead Feb 27 2020 The current IMS has survived for over forty years, underpinning strong growth in GDP and in the international exchange of goods and capital, one of its core objectives. As a result, interdependence among the world's economies has grown dramatically, making the existence of a sound system ever more important. At the same time, the system has exhibited many symptoms of instability—frequent crises, persistent current account imbalances and exchange rate misalignments, volatile capital flows and currencies, and unprecedentedly large reserve accumulation. These symptoms have come to a head since the 2008 crisis and brought renewed international momentum to the idea of attempting to reform the IMS. Yet the debate so far suggests little consensus on the underlying problems, let alone on the solutions. This paper identifies four root causes to these problems: inadequate global adjustment mechanisms to prevent inconsistent or imprudent policies among systemic countries; lack a comprehensive oversight framework for growing cross-border capital flows, covering both source and recipient countries; inadequate systemic liquidity provision mechanisms; and structural challenges in the supply of safe assets.

This Is Hope: Green Vegans and the New Human Ecology Sep 03 2020 This is Hope compares the outcomes of two human ecologies; one is tragic, the other is full of promise. As Will explains in his Introduction, 'Our human ecology is the expression of everything we do and is represented by every interaction we have on earth...it consists of the multitude of relationships we have with other people, other species, and our physical environment'. He describes our current human ecology in depth to illustrate how we are living inappropriately, cruelly, and unsustainably. This is obsolete and has been for a long time; it is the cause of our overpopulation, our overconsumption of resources, the poverty of ecosystems and people, and our disregard for the rights of individuals from other species. This is Hope proposes a new human ecology to replace it.

Studies on the Teaching of Asian Languages in the 21st Century Dec 07 2020 In recent years, there has been an increasing demand for, and rapid development in, the learning and teaching of Asian languages as a foreign language throughout the world. Many governments recognize that Asian languages are of strategic economic importance, and thus they are now offered as a foreign language by a great number of schools and higher education institutions. This book contains chapters written by different authors from several countries on key issues and problems in the teaching of the Chinese, Russian, Farsi, Japanese and Malaysian languages, and some comparative studies. The contributors here explore future directions in the teaching of Asian languages in the 21st century. The ten chapters of the book have been prepared by the authors using the scholarly papers they presented at the Second International Symposium on Asian Languages and Literatures (ADES), which was held on 3-4 May 2012 at Erciyes University, Kayseri, Turkey, under the title of "Teaching of Asian Languages in the 21st Century".

Stalin's Genocides Sep 23 2019 The chilling story of Stalin's crimes against humanity Between the early 1930s and his death in 1953, Joseph Stalin had more than a million of his own citizens executed. Millions more fell victim to forced labor, deportation, famine, bloody massacres, and detention and interrogation by Stalin's henchmen. Stalin's Genocides is the chilling story of these crimes. The book puts forward the important argument that brutal mass killings under Stalin in the 1930s were indeed acts of genocide and that the Soviet dictator himself was behind them. Norman Naimark, one of our most respected authorities on the Soviet era, challenges the widely held notion that Stalin's crimes do not constitute genocide, which the United Nations defines as the premeditated killing of a group of people because of their race, religion, or inherent national qualities. In this gripping book, Naimark explains how Stalin became a pitiless mass killer. He looks at the most consequential and harrowing episodes of Stalin's systematic destruction of his own populace—the liquidation and repression of the so-called kulaks, the Ukrainian famine, the purge of nationalities, and the Great Terror—and examines them in light of other genocides in history. In addition, Naimark compares Stalin's crimes with those of the most notorious genocidal killer of them all, Adolf Hitler.
