Carnes shows how role-immersion games channel students' competitive (and sometimes mischievous) impulses into transformative learning experiences. His discussion is based on interviews with scores of students and faculty who have used a pedagogy called Reacting to the Past, which features month-long games set during the French revolution, Galileo's trial, the partition of India, and dozens of other epochal moments in disciplines ranging from art history to the sciences. These games have spread to over three hundred campuses around the world, where many of their benefits defy expectations. "[Minds on Fire is] Carnes's beautifully written apologia for this fascinating and powerful approach to teaching and learning in higher education. If we are willing to

open our minds and explore student-centered approaches like Reacting [to the Past], we might just find that the spark of student engagement we have been searching for in higher education's mythical past can catch fire in the classrooms of the present.”

—James M. Lang, *Chronicle of Higher Education* “This book is a highly engaging and inspirational study of a ‘new’ technique that just might change the way educators bring students to learning in the 21st century.” —D. D. Bouchard, *Choice*

This book provides examples of the ways in which 9-12 grade mathematics teachers from across North America are engaging in research. It offers a glimpse of the questions that capture the attention of teachers, the methodologies that they use to gather data, and the ways in which they make sense of what

they find. The focus of these teachers' investigations into mathematics classrooms ranges from students' understanding of content to pedagogical changes to social issues. Underlying the chapters is the common goal of enabling students to develop a deep understanding of the mathematics they learn in their classrooms. This book is a collage of ideas designed for eighth through twelfth grade students and their parents to have better relationships with one another and with the entire school community, to help and support their communities in different ways, and to appreciate the value of the experiences offered within and outside their communities. For many, the road to law school success seems blocked by obstacles and filled

with potholes. But learning the law and getting good grades on your law school exams is really not that difficult. You just need someone to show you the way. "The 1L Success Guide" was written by someone who graduated FIRST in his law school class. He shares the methods by which he learned the law and aced his law school exams, earning NINE high-paper awards in the process. If you want to understand how to succeed in law school and get the high grades you will need to land top jobs, read this book. *** From the Introduction: Why must law school feel like Special Forces hazing? By the end of the first semester, you are totally beaten down mentally and physically, and then they throw the exams at you. And, by the way, who is hiding the keys to the kingdom? Why does it feel like there is a secretive law school society that refuses to impart to you the method for actually succeeding? I have one thing to say about all that: It is stupid nonsense. That is why I wrote this book. It is what I wish I

could have read before I started law school. Inside these pages I will show you how to prepare for and succeed during your first semester of law school, which culminates with those terrifying exams. It actually is not that difficult once you know what to do. I promise. Although the information in this book is targeted to students in their first semester of law school, this information will be useful to anyone needing some extra figuring out the law school beast. If you had a tough time your first semester and are looking for guidance to help you improve, you will find it in this book. But first, why should you listen to me? I remember how scared and disoriented I felt when I took my first set of law school final exams. My first semester of law school consisted of hours and hours studying, outlining, reviewing, practicing, and memorizing in the hope that I was doing something right. During that semester, I essentially ignored my wife and young child and gained twenty pounds from

stress eating and lack of sleep. I went from the relaxed dude with a cool wife and new son, to the stressed out jerk who is always thinking about what needs to get done instead of enjoying life. It sucked. Then, after I took those first exams, after those two weeks of hell on earth, I was so shaken that I thought I had failed each and every exam. I could not respond to any of the questions with a solid answer, so I just tried to analyze every issue I saw (or thought I saw). My answers seemed ambiguous and unfinished. I knew I was screwed. Once I had completed all my first semester exams, I told my wife as I guzzled a beer how much I hated law school and how I was thinking about dropping out, returning to my prior career, and looking for a teaching position. Here's the rub. When I got my grades for first semester exams, I saw that, contrary to what I believed, I had actually done very well on the tests. In fact, I was ranked first in my class! *** I can't guarantee that you will finish first in your class if

you read this book, but I can guarantee the book will provide you with an overview of what it takes to do well in law school. Whether you put in the work to achieve great things is up to you. Assessment for Learning (AfL) has become an established idea within higher education, based on the evidence that assessment is one of the most powerful drivers of student learning and thus can be harnessed as a means to improve learning. Assessment for Social Justice looks at assessment in higher education through the lens of critical pedagogy and social justice, and offers new insights to both fields of enquiry. The starting premise, adopted from AfL, is that the way in which we form and practice assessment can and should influence the social justice outcomes of higher education. Looking at a number of different theories of social justice, Jan McArthur explores how alternative theories provide the foundations for different types of assessment practice. The theories explored

include the works of John Rawls, Theodor Adorno, Amartya Sen, Martha Nussbaum, Nancy Fraser and Axel Honneth. McArthur then explores different examples of assessment and how these embody, or constrain, alternative theories of social justice. She provides a theoretically rigorous understanding of assessment as a social practice, and as a vehicle both for and against social justice. Assessment for social justice is explored in two complementary ways - the justice of assessment within higher education, and assessments that promote greater social justice - and in doing so this book contributes to ongoing debates about the nature and purposes of higher education. Professors Fischl and Paul explain law school exams in ways no one has before, all with an eye toward improving the reader's performance. The book begins by describing the difference between educational cultures that praise students for "right answers," and the law school

culture that rewards nuanced analysis of ambiguous situations in which more than one approach may be correct. Enormous care is devoted to explaining precisely how and why legal analysis frequently produces such perplexing situations. But the authors don't stop with mere description. Instead, *Getting to Maybe* teaches how to excel on law school exams by showing the reader how legal analysis can be brought to bear on examination problems. The book contains hints on studying and preparation that go well beyond conventional advice. The authors also illustrate how to argue both sides of a legal issue without appearing wishy-washy or indecisive. Above all, the book explains why exam questions may generate feelings of uncertainty or doubt about correct legal outcomes and how the student can turn these feelings to his or her advantage. In sum, although the authors believe that no exam guide can substitute for a firm grasp of substantive material, readers who devote

the necessary time to learning the law will find this book an invaluable guide to translating learning into better exam performance. "This book should revolutionize the ordeal of studying for law school exams... Its clear, insightful, fun to read, and right on the money." — Duncan Kennedy, Carter Professor of General Jurisprudence, Harvard Law School "Finally a study aid that takes legal theory seriously... Students who master these lessons will surely write better exams. More importantly, they will also learn to be better lawyers." — Steven L. Winter, Brooklyn Law School "If you can't spot a 'fork in the law' or a 'fork in the facts' in an exam hypothetical, get this book. If you don't know how to play 'Czar of the Universe' on law school exams (or why), get this book. And if you do want to learn how to think like a lawyer—a good one—get this book. It's, quite simply, stone cold brilliant." — Pierre Schlag, University of Colorado School of Law (Law Preview Book Review on The Princeton

Review website) Attend a Getting to Maybe seminar! Click here for more information. In the last decade, the development of new technologies has made innovation a fundamental pillar of education. Teaching innovation includes the evolution of both teaching and learning models to drive improvements in educational methodologies. Teaching innovation is a pioneer in the understanding and comprehension of the different teaching methodologies and models developed in the academic area. Teaching innovation is a process that seeks validation in the academic and teaching communities at universities in order to promote the improvement and its practices and uses in the future characterized by digital development and data-based methods. Teaching Innovation in University Education: Case Studies and Main Practices features the major practices and case studies of teaching innovation developed in recent

years at universities. It is a source on study cases focused on teaching innovation methodologies as well as on the identification of new technologies that will help the development of initiatives and practices focused on teaching innovation at higher education institutions. Covering topics such as didactic strategics, service learning, and technology-based gamification, this premier reference source is an indispensable resource for pre-service teachers, lecturers, students, faculty, administrators, libraries, entrepreneurs, researchers, and academicians. Aimed at scientists and engineers, this book is an exciting intellectual journey through the mathematical worlds of Euclid, Newton, Maxwell, Einstein, and Schrodinger-Dirac. While similar books present the required mathematics in a piecemeal manner with tangential references to the relevant physics and engineering, this textbook serves the interdisciplinary needs of engineers, scientists

and applied mathematicians by unifying the mathematics and physics into a single systematic body of knowledge but preserving the rigorous logical development of the mathematics. The authors take an unconventional approach by integrating the mathematics with its motivating physical phenomena and, conversely, by showing how the mathematical models predict new physical phenomena. Like previous volumes in the "Educational Innovation in Economics and Business" series, this one is genuinely international in terms of its coverage. It reflects the worldwide interest in, and commitment to, innovation in business education with a view to enhancing the learning experience of both undergraduates and postgraduates. It should prove of value to anyone engaged directly in business education. Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook"

implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning. In *Ditch That Textbook*, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. *Ditch That Textbook* is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms. We have an uneasy relationship with the relentless deluge of information gushing out of academia and our media outlets. To turn it off is escapist, but to attempt to cognitively grapple with it is overwhelming. In *Unforgettable: Enabling Deep and Durable Learning*, a nationally recognized master teacher gives professors and their students the means to chart a clear path through this information explosion. Humans crave explanatory patterns,

and this book enables teachers to think deeply about their academic disciplines to find and articulate their core explanatory principles and to engage their students in a compelling way of thinking. An alternative title for this book could be *Why the Best College Teachers Do What They Do* because the author articulates a compelling rationale that will equip faculty to create and deliver transformative courses. Students in transformative courses grapple with essential questions and gain mental muscle that equips them for real world challenges. Any law school graduate will tell you that when picking your outline tool you need to pick the best because your outlines are the most important study tool you will use throughout your law school career. A brilliant transplant surgeon brings compassion and narrative drama to the fearful reality that every doctor must face: the inevitability of mortality. "Uncommonly moving ... A revealing and heartfelt book." —Atul Gawande, #1 New York bestselling author of *Being Mortal* When Pauline Chen began medical school, she dreamed of saving lives. What she could not predict was how much death would be a part of her work. Almost immediately, she found herself wrestling with medicine's most profound paradox—that a profession

premised on caring for the ill also systematically depersonalizes dying. Final Exam follows Chen over the course of her education and practice as she struggles to reconcile the lessons of her training with her innate sense of empathy and humanity. A superb addition to the best medical literature of our time. Does your classroom run the way you want? Most people enter the teaching profession wanting to make a difference in young people's lives. However, more and more teachers feel lost, frustrated, and overwhelmed with everything they're required to do. It's hard to be successful without a clear plan on getting control of your classroom, empowering your students, and making the learning experience more enjoyable for you and your students. These 18 chapters are crucial for any educator who wants to take their teaching to the next level. Teacher, Principal, Director, Dean, and YouTube/TikTok teacher, Tyler Tarver knows that education is more than

just standing in front of students lecturing them on a specific topic - it's a culture of learning that educators foster to train the next generation. If you are attempting to be the best educator you can in the environment you're in, you need ideas and encouragement from someone who's been exactly where you are. Even if you had the time, money, and support we know teachers deserve, we know that applying any knowledge always has a greater impact when you're able to give personal and practical application to the ideas you know matter. Besides sitting through 60+ hours a year of professional development, there is another way to incrementally improve your teaching week after week. Spoiler Alert: It can also be fun. Tyler Tarver learned how to create the culture he wanted in his classroom. He was able to pass this on to any educator who wanted to get excited about teaching and have a deeper impact on their students. He wrote *The Baller Teacher Playbook* to teach

others what it takes to expand your teaching and create a community of happy and engaged learners. These short, weekly chapters and accompanying resources will add enormous value to your classroom and the school you work for. In this 18-week guide, readers will be introduced to the top areas where truly successful teachers and their students excel: Reason vs Excuses: How do you overcome the hurdles inherent in education? Fun: How do you get yourself and students excited about learning? Creativity: How do you create a culture where every day is unexpected but not chaotic? Positivity: How can we roll with the punches but not have to fake it? Authenticity: How can I be myself but genuinely connect with young people? Leadership: How do I get my students to lead without me? Collaboration: How do I work with my administrators, colleagues, and parents to better every student's education? Diversity: How do I

help build empathy and understanding among myself and my students?
Development: How am I always getting better? Plus more! The Baller Teacher Playbook is the must-have guide for anyone who feels lost or overwhelmed by the current educational climate, even if they have been teaching for years. Learn from a fellow educator who had their fair share of mistakes and successes through the simple but effective tactics shared in these pages. Take things further: If you want to move forward even faster as an educational professional, read a chapter once a week with your team, and come together at weekly meetings to discuss experience, ideas, triumphs, and a community of educators trying to improve themselves and their classroom. While filling in for a resident director who has disappeared under suspicious circumstances, Alison Bergeron works with her boyfriend, Detective Bobby Crawford, to find the missing man so that she can end the unwanted assignment. Edgar Frances Poree Jr., a lifelong resident of Louisiana, looks back at his struggles, disappointments, and successes in this memoir that examines the African American experience in the South. As a Black male, he dealt with deeply rooted prejudices, religious discrimination, and conflict with older members of the

Black community. He constantly faced inner turmoil, but he remained steadfast in his focus to achieve his goals and navigate the transition from segregation to integration. Poree learned to be resourceful early, convincing the owner of a nearby grocery store to give him a job cleaning the store and organizing the shelves. He went on to start his own business polishing hardwood floors while in the seventh grade. His love for music eventually helped him earn a scholarship at Xavier University in New Orleans, and from there he was on his way. From his teaching career to his successes as a business executive and civic leader, Poree shares his memories of real people, real places, and real divisions. His hope is that you'll be emboldened, encouraged and inspired to achieve your own dreams. A favorite classroom prep tool of successful students that is often recommended by professors, the Examples & Explanations (E&E) series

provides an alternative perspective to help you understand your casebook and in-class lectures. Each E&E offers hypothetical questions complemented by detailed explanations that allow you to test your knowledge of the topics in your courses and compare your own analysis. Here's why you need an E&E to help you study throughout the semester: Clear explanations of each class topic, in a conversational, funny style. Features hypotheticals similar to those presented in class, with corresponding analysis so you can use them during the semester to test your understanding, and again at exam time to help you review. It offers coverage that works with ALL the major casebooks, and suits any class on a given topic. The Examples & Explanations series has been ranked the most popular study aid among law students because it is equally as helpful from the first day of class through the final exam. Any law school graduate will tell

you that when picking your outline tool you need to pick the best because your outlines are the most important study tool you will use throughout your law school career. Developed by legendary study aid author Steve Emanuel, Emanuel® Law Outlines (ELOs) are the #1 outline choice among law students. An ELO ensures that you understand the concepts as you learn them in class and helps you study for exams throughout the semester. Here's why you need an ELO from your first day of class right through your final exam: ELOs help you focus on the concepts and issues you need to master to succeed on exams. They are easy to understand: Each ELO contains comprehensive coverage of the topics, cases, and black letter law found in your specific casebook, but is explained in a way that is understandable. The Quiz Yourself and Essay Q&A features help you test your knowledge throughout the semester. Exam Tips alert you to the issues and fact patterns

that commonly pop up on exams. The Capsule Summary provides a quick review of the key concepts covered in the full Outline—perfect for exam review!
