This book discusses issues such as global financial

crisis and global governance, food security, energy sustainability, the global financial system, trade and protectionism, and growth and employment. Since the outbreak of the financial as well as national debt crises in the Euro zone, the focus of the G20 has shifted back to addressing short-term issues. These issues range from the dynamic effects of global imbalances and the appropriate degree of financial sector regulation to questions of austerity versus growth and the lack of a comprehensive framework for managing the international monetary system. A further issue is the relevance of the

G20 agenda for emerging market economies. Global economic recovery still remains fragile and downside risks to global growth remain. Additionally, much of the agenda of the Seoul Development Consensus for shared growth launched in 2010 has yet to be fulfilled. A key discussion point in the book, therefore, is how to make a tangible and significant difference in peoples' lives by implementing an agenda of inclusive growth. Canada's six-year military mission in Afghanistan's Kandahar province was one of the most intense and challenging moments in

Canadian foreign affairs since the Korean War. A complex war fought in an inhospitable environment, the Afghanistan mission tested the mettle not just of Canada's soldiers but also of its politicians, public servants, and policy makers. In *Adapting in the Dust*, Stephen M. Saideman considers how well the Canadian government, media, and public managed the challenge. Building on interviews with military officers, civilian officials, and politicians, Saideman shows how key actors in Canada's political system, including the prime minister, the political parties, and parliament, responded to the

demands of a costly and controversial mission. Some adapted well; others adapted poorly or - worse yet - in ways that protected careers but harmed the mission itself. *Adapting in the Dust* is a vital evaluation of how well Canada's institutions, parties, and policy makers responded to the need to oversee and sustain a military intervention overseas, and an important guide to what will have to change in order to do better next time. In *Smart Chicks on Screen: Representing Women's Intellect in Film and Television*, Laura Mattoon D'Amore brings together a collection of essays

that examine the disparate portrayals of beauty and brains in film and television. This text will be of interest to scholars of film and television, communications, and women's studies, to name a few. The economic crisis has had severe and negative impacts on the EU over the last decade. This book focuses on a neglected dimension by examining European political entrepreneurship in times of economic crisis with particular emphasis on EU member-states, institutions and policies. The main focus is on the role that the political entrepreneur can play in promoting

entrepreneurship and growth. It is argued that the political entrepreneur and political entrepreneurship can positively influence the conditions for entrepreneurial activity and business. This is the first volume to consider the popular literary category of Early Readers - books written and designed for children who are just beginning to read independently. It argues that Early Readers deserve more scholarly attention and careful thought because they are, for many younger readers, their first opportunity to engage with a work of literature on

their own, to feel a sense of mastery over a text, and to experience pleasure from the act of reading independently. Using interdisciplinary approaches that draw upon and synthesize research being done in education, child psychology, sociology, cultural studies, and children's literature, the volume visits Early Readers from a variety of angles: as teaching tools; as cultural artifacts that shape cultural and individual subjectivity; as mass produced products sold to a niche market of parents, educators, and young children; and as aesthetic objects, works of

literature and art with specific conventions. Examining the reasons such books are so popular with young readers, as well as the reasons that some adults challenge and censor them, the volume considers the ways Early Readers contribute to the construction of younger children as readers, thinkers, consumers, and as gendered, raced, classed subjects. It also addresses children's texts that have been translated and sold around the globe, examining them as part of an increasingly transnational children's media culture that may add to or supplant regional, ethnic,

and national children's literatures and cultures. While this collection focuses mostly on books written in English and often aimed at children living in the US, it is important to acknowledge that these Early Readers are a major US cultural export, influencing the reading habits and development of children across the globe. Both yesterday's suffragists and today's feminists have battled for women to vote and hold office, and their successes have made it possible for countries such as Argentina, Brazil, Germany, Iceland, Liberia, and the United Kingdom to

have female heads of state. Despite these notable advances, women are still largely underrepresented in parliaments and governments around the world. Why, after so many years of feminist struggle, are women still obstructed from full political citizenship by a glass ceiling? Manon Tremblay's 100 Questions about Women and Politics discusses electoral politics in Canada and abroad, focusing on women's rights to vote and run for office in legislative elections, political parties, voting systems, electoral quotas for women, and participation in parliaments and governments. Against a

background of observations taken from academic research, Tremblay uses an innovative approach by dividing her book into 100 questions and answers to address a range of important issues. Are electorates sexist or lesbophobic? Are family responsibilities a real obstacle to women's engagement in politics? What strategies are available to increase the number of female politicians? Are gender quotas democratic? Once elected to office, do women represent women? How does women's political citizenship in Canada compare to that in other

countries? A timely book on the unfinished work of representative democracy, 100 Questions about Women and Politics takes a comprehensive yet concise approach to demystifying the major issues dominating the study of gender and government. 3. 6 Practice Papers Consociational power sharing is often perceived to be the method of conflict

management that is most likely to succeed in deeply divided societies. The case of Northern Ireland in particular is heralded by many as a consociational success story. Since the signing of the Good Friday (Belfast) Agreement in 1998, significant conflict transformation has taken place in the form of a considerable reduction in levels of violence and the establishment of power sharing between unionists and nationalists. This book looks at what consociational power sharing achieves after its implementation - specifically, whether it can work to overcome existing identities

in divided societies, or whether it simply freezes divisions. It argues that if consociational power sharing is facilitating a move towards a genuinely shared society, this would be demonstrated in the focus of the election campaigns of Northern Ireland's political parties, which would be almost exclusively based around socio-economic issues affecting the whole population, rather than narrow single identity concerns. However, the book claims that, on the whole, this has not been realised. Although election campaigns are today less strident than they were in the pre-1998 era, it remains the case that they usually

foreground single identity symbolism, as it is this that resonates with voters. Whilst consociational power sharing has been very successful in reducing levels of violent conflict and facilitating elite level cooperation between unionists and nationalists, it has been much less successful in reducing divisions within wider society to facilitate a genuinely shared Northern Irish identity. By establishing an important middle ground between consociational proponents and critics, this research will be of significant interest to students and scholars of ethnic politics, political

sociology, conflict management, and divided societies more generally. The book deals with the secession/separation of territorial entities and the legal consequences that derive from it both for the parent state and for the seceded/separated entity or the entity that intends to secede/separate. This subject is approached from the triple perspective of international law, comparative law, and Spanish law. International law, because it is this legal system which contains the general legal framework within which this issue must be dealt with. Thus, for example, the legal basis of the right to self-

determination, the constituent elements of the state, the recognition of states and governments, succession in the matter of treaties, succession in membership of International Organisations, etc. Moreover, international law is also the reference invoked by secessionist/independentist political projects within states in an attempt to provide a legal basis for the legality of their claim. Comparative law, in order to find out not only how most state constitutions deal with secession or independence of their territories, but also the jurisprudence

handed down by national courts on the matter (USA, Canada, Italy, France, Spain, among others). And finally, Spanish Law, because the perspective chosen to address the object of study is from the perspective of Spain. The continual rise of English as a global lingua franca has meant that English literature, both as a discipline and as a tool in ESL and EFL classrooms, is being used in varied ways outside the inner circle of English. This edited collection provides an overview of English literature education in the Asia-Pacific in global times, bringing to international

attention a rich understanding of the trends, issues and challenges specific to nations within the Asia-Pacific region. Comprising contributions from Australia, China, Hong Kong, India, Indonesia, Malaysia, Philippines, Singapore and Vietnam, the collection addresses the diversity of learners in different national, cultural and teaching contexts. In doing so, it provides insights into historical and current trends in literature education, foregrounds specific issues and challenges in policymaking and implementation,

presents practical matters concerning text selection, use of literature in the language classroom, innovative practices in literature education, and raises pressing and important questions about the nature, purpose and importance of literature education in global times. The Free Spirit Pony Diaries..... or perhaps this should be titled 'The journal of a slightly 'odd' horsewoman, her infinitely patient 'other half', 13 independent ponies (including the 'just a bit too big to be ponies' ones), 3 hilarious pigs and 5 very energetic Jack Russells'. When I first moved to East Sussex, UK over a

decade ago, with 7 ponies in tow to 'start a riding school', little did I know that the ponies had other ideas..... 12 years later and we are on a very different path - a far better and more rewarding one but one which has challenges all of its own! Inside the covers of this book you'll find our journey between November 2011 and December 2014, exactly as it happened and as it was recorded - the ups and downs; the tears and the laughter, but most of all, you'll find the story of how our horses reminded me of what it really means to love horses. This book investigates, and explains, the extent

to which different liberal democracies have resorted to the use of force since the 9/11 terrorist attacks. The responses of democratic states throughout the world to the September 2001 terrorist attacks have varied greatly. This book analyses the various factors that had an impact on decisions on the use of force by governments of liberal democratic states. It seeks to explain differences in the security policies and practices of Australia, Canada, France, Germany and the UK regarding the war in Afghanistan, domestic counterterrorism measures and the Iraq War. To this

end, the book combines the concepts of strategic culture and securitisation into a theoretical model that disentangles the individual structural and agential causes of the use of force by the state and sequentially analyses the impact of each causal component on the other. It argues that the norms of a strategic culture shape securitisation processes of different expressions, which then bring about distinct modes of the use of force in individual security policy decisions. While governments can also deviate from the constraints of a strategic culture,

this is likely to encounter a strong reaction from large parts of the population which in turn can lead to a long-term change in strategic culture. This book will be of much interest to students of strategic culture, securitisation, European politics, security studies and IR in general. The job interview is probably the most important step you will take in your job search journey. Because it's always important to be prepared to respond effectively to the questions that employers typically ask at a job interview Petrogav International has prepared this eBooks that will help you to get a

Big History is a new field on a grand scale: it tells the

story of the universe over time through a diverse range of disciplines that spans cosmology, physics, chemistry, astronomy, geology, evolutionary biology, anthropology, and archaeology, thereby reconciling traditional human history with environmental geography and natural history. Weaving the myriad threads of evidence-based human knowledge into a master narrative that stretches from the beginning of the universe to the present, the Big History framework helps students make sense of their studies in all disciplines by illuminating the

structures that underlie the universe and the connections among them. Teaching Big History is a powerful analytic and pedagogical resource, and serves as a comprehensive guide for teaching Big History, as well for sharing ideas about the subject and planning a curriculum around it. Readers are also given helpful advice about the administrative and organizational challenges of instituting a general education program constructed around Big History. The book includes teaching materials, examples, and detailed sample exercises. This book is also an engaging

first-hand account of how a group of professors built an entire Big History general education curriculum for first-year students, demonstrating how this thoughtful integration of disciplines exemplifies liberal education at its best and illustrating how teaching and learning this incredible story can be transformative for professors and students alike. While the EU legitimacy crisis and the Great Recession prevail, certain European Union principles and policies have to be implemented in the member states. This volume explores the diverse processes, stages and subjects of implementation in a

variety of social policies to identify different institutional dynamics and actor behaviours at play. The individual contributions examine the transposition of the patients' rights directive to the Europeanisation of pension reforms; the role of national parliaments in transposing social Europe; judicial Europeanisation; and the multi-level enforcement of EU decisions. Theoretically, the contributions in this book highlights the fact that implementation is often conditioned by domestic politics or comes as a 'random walk' due to organisational and cognitive constraints.

Empirically, the volume has three main findings. First, the constitutive components of the EU tend to have a contradictory impact on the EU's social policies and the national welfare systems. Second, crises influence the implementation of social Europe, at times leading to a modification of fundamental principles and content, but not across the board. Third, as a result, there is evidence of differentiated Europeanisation. This book was originally published as a special issue of *West European Politics*. The job interview is probably the most important step you will take in your job search journey.

Germany After the 2013 Elections: Breaking the Mould of Post-Unification Politics? provides a comprehensive analysis of this election and its wider implications for post-unification German politics. International specialists on German and EU politics examine the domestic and international context of the election and reflect on its possible consequences. In the first part of the volume, a number of contributors

analyse the policy environment in which the election took place while the second part deals with voters, parties and leaders' strategies in the run-up to, and the aftermath, of the 2013 election. This collection of essays explores current developments in privacy law, including reform of data protection laws, privacy and the media, social control and surveillance, privacy and the Internet, and privacy and the courts. It places these developments into a broader international context, with a particular focus on the European Union, the United Kingdom, Australia and New Zealand.

Adopting a comparative approach, it creates an important resource for understanding international trends in the reform of privacy and data protection laws across a variety of contexts. Written by internationally recognised experts, Emerging Challenges in Privacy Law: Comparative Perspectives provides an accessible introduction to contemporary legal and policy debates in privacy and data protection law. It is essential reading for academics, policy makers and practitioners interested in current challenges facing privacy and data protection law

Auditing has hit the headlines over recent years, and for all the wrong reasons, and in today's environment, the result of negligent auditing can be serious resulting in sizeable fines and even withdrawal of

audit registration which can be costly in terms of fee income. Frequently Asked Questions in International Standards on Auditing presents the relevant standards in a concise and jargon-free way, enabling auditors to appreciate the reasoning behind the standards and undertake audit work effectively. This book focuses on the main areas of the auditing standards and also addresses some key areas where audit firms are failing and which have been flagged up by audit regulators. The FAQs cover the main parts of each standard, and each question will be answered in a practical context,

with worked examples showing how the standards are applied in real situations. The mass killing of Ottoman Armenians is today widely recognized, both within and outside scholarly circles, as an act of genocide. What is less well known, however, is that it took place within a broader context of Ottoman violence against minority groups during and after the First World War. Among those populations decimated were the indigenous Christian Assyrians (also known as Syriacs or Chaldeans) who lived in the borderlands of present-day Turkey, Iran, and Iraq. This volume is the first

scholarly edited collection focused on the Assyrian genocide, or “Sayfo” (literally, “sword” in Aramaic), presenting historical, psychological, anthropological, and political perspectives that shed much-needed light on a neglected historical atrocity. Latin America, a region that is constantly recognized as one of the top economies in the world, is growing at an amazing rate. Although Latin America is doing very good, it is facing a severe problem—the local talent is not receiving the correct attention. Every time I talk to managers of large

multinational corporations and professors about the talent and human resources in Latin America, I always seem to find a consensus: most of the local talent is not well trained. According to them, key positions inside mid and largesized companies are rarely occupied by local talent. Corporations fill the hole with foreign talent which is more expensive and difficult to find. This could be Latin America’s Achilles’ heel. I personally understand that developing Leadership, Management skills and Entrepreneurship takes time, and that in some cases, that time will be wasted, but it amuses me

how some companies complain about the talent and they don’t take the time to develop it. They rely on employees from other companies to fill the empty spots. Companies in Latin America need to start working proactively and not reactively. Over the last 10 years, economic growth averaged 4.2%, and 70 million people escaped poverty. Macroeconomic stability, open-trade policies and pro-business investment climates have supported and will continue to support strong growth in the years to come. Crucially, economic gains are being broadly shared. Latin America grew by 50

million people between 2003 and 2009, an increase of 50%. For a region long riven by wealth inequality, this is a remarkable achievement. The importance of family and personal relationships also impacts the workplace. For example, it is more common in Latin America to seek employment with family members, hire family members, and look to the family for help in times of need. In addition, many Latin Americans feel more comfortable doing business with people they know personally, and developing that relationship is often considered an essential first step. Americans who try

to move things along more quickly and “get to the point” may become frustrated and/or offend Latin Americans. This means that establishing business contacts and closing deals are best done in person, and may take more time than is customary in the U.S. Quotes from the Buddha are everywhere: on Facebook, Instagram, coffee mugs, posters. There's only one problem: the Buddha didn't actually say most of them. This humorous and informative book takes these fake Buddha quotes as a launching point for a discussion on what the Buddha really did say, and

is a great entry point for those interested in learning more about Buddhism-- what it is, and what it isn't. Bodhipaksa, a well-known Buddhist teacher and the founder of fakebuddhaquotes.com, takes a look at some of the quotes that are erroneously attributed to the Buddha, explains the ways in which these disagree (or sometimes agree) with Buddhist teachings, and offers some genuine examples of the Buddha's words. The perfect gift for the Buddhist in your life and an essential addition to any Buddhist library, *I Can't Believe It's Not Buddha!* is at once humorous and

scholarly, and a timely antidote to the "fake news" that can surround some of the Buddha's teachings. This book offers you a brief, but very involved look into the operations in the drilling of an oil & gas wells that will help you to be prepared for job interview at oil & gas companies. From start to finish, you'll see a general prognosis of the drilling process. If you are new to the oil & gas industry, you'll enjoy having a leg up with the knowledge of these processes. If you are a seasoned oil & gas person, you'll enjoy reading what you may or may not know in these pages. This course provides a non-technical overview

of the phases, operations and terminology used on offshore drilling platforms. It is intended also for non-drilling personnel who work in the offshore drilling, exploration and production industry. This includes marine and logistics personnel, accounting, administrative and support staff, environmental professionals, etc. No prior experience or knowledge of drilling operations is required. This course will provide participants a better understanding of the issues faced in all aspects of drilling operations, with a particular focus on the unique aspects of offshore

operations. Since taking power in 2010, the Coalition Government in the United Kingdom has pushed through a drastic program of cuts to public spending, all in the name of austerity. The effects on large segments of the population, dependent on programs whose funding was slashed, have been devastating and will continue to be felt for generations. This timely book by journalist Mary O'Hara chronicles the real-world effects of austerity, removing it from the bland, technocratic language of politics and showing just what austerity means to ordinary lives. Drawing on hundreds of hours

of first-person interviews with a wide range of people and, in the paperback edition, featuring an updated afterword by the author, the book explores the grim reality of living amid the biggest reduction of the welfare state in the postwar era and offers a compelling corrective to narratives of shared sacrifice. To date, it was not necessary to demonstrate an additional therapeutic benefit. This changed with the Act on the Reform of the Market for Medicinal Products (AMNOG), which entered into force on the 1st of January 2011. It brought about a fundamental change in the balance of power on the pharmaceutical market. This study therefore sets out to answer the following question: What impact does

the early benefit assessment in the context of the AMNOG have on the stakeholders of the healthcare system? To answer this question, this survey first presents the theoretical foundations of the law, of the early benefit assessment and the bodies involved. It then takes stock of the decisions taken to date before describing the impact on the selected stakeholders. An old case makes Detective Inspector Louisa Smith some new enemies in this spellbinding second installment of New York Times bestselling author Elizabeth Haynes's Briarstone crime series that

combines literary suspense and page-turning thrills. Ten years ago, 15-year-old Scarlett Rainsford vanished while on a family holiday in Greece. Was she abducted, or did she run away from her severely dysfunctional family? Lou Smith worked the case as a police constable, and failing to find Scarlett has been one of the biggest regrets of her career. No one is more shocked than Lou to learn that Scarlett has unexpectedly been found during a Special Branch raid of a brothel in Briarstone. Lou and her Major Crime team are already stretched working two troubling cases: nineteen-year-old Ian Palmer was

found badly beaten; and soon after, bar owner Carl McVey was found half-buried in the woods, his Rolex and money gone. While Lou tries to establish the links between the two cases, DS Sam Hollands works with Special Branch to question Scarlett. What happened to her? Where has she been until now? How did she end up back here? And why is her family—with the exception of her emotionally fragile younger sister, Juliette—less than enthusiastic about her return? When another brutal assault and homicide are linked to the McVey murder, Lou's cases collide, and the clues all point in

one terrifying direction. As the pressure and the danger mount, it becomes clear that the silent, secretive Scarlett holds the key to everything. Die internationale Strafjustiz hat sich auf der weltpolitischen Bühne etabliert. Der Internationale Strafgerichtshof (IStGH) arbeitet schwere Menschenrechtsverletzungen in derzeit neun afrikanischen Staaten auf und hat Vorermittlungen zu den Konfliktherden Palästina und Ukraine eingeleitet. Aufgrund der Komplexität der Materie und den oftmals andauernden kriegesischen Auseinandersetzungen, steht die internationale

Strafjustiz vor besonderen Herausforderungen. Sich diesen zu stellen ist Aufgabe von Anklage und Verteidigung. In der wissenschaftlichen und medialen Wahrnehmung steht jedoch - wie bereits im Falle des Jugoslawien- und Ruandatribunals - die IStGH-Anklagebehörde im Vordergrund. Nur selten werden Rolle und Schwierigkeiten der Angeklagten sowie der Verteidigung beleuchtet. Die Autorinnen und Autoren aus Praxis und Wissenschaft widmen sich in Beiträgen in deutscher und englischer Sprache diesem Blick hinter die Kulissen der internationalen

Strafgerichte. DSR 2016: Volume 2 reports on Argentina - Measures Relating to Trade in Goods and Services (WT/DS453). Proceedings of the Twenty-Second World Congress on Anti-Aging Medicine & Regenerative Biomedical Technologies, sponsored by the American Academy

of Anti-Aging Medicine (A4M). This book investigates the emergence of an EU strategic intelligence community as a complex multi-dimensional networked construction. It examines the constitution, structure and performance of EU intelligence arrangements as part of security policies of the European Union. Intelligence security has become a remarkable feature of the European integration processes. This study assess the ability of EU Member States, as well as relevant institutions and agencies, to

develop effective, legitimate and accountable institutions and mechanisms for collection, transmission, processing and exchange of intelligence. In this regard, synergy is a key indicator that validates the ability to create the European strategic intelligence community in the EU's legal and institutional framework. This groundbreaking

project constructs a comprehensive model of the intelligence community as a distorted epistemic community tailored to singularities of EU security policies and systemic arrangements provided by EU institutions and agencies.
