26th Annual Conference on Composites, Advanced Ceramics, Materials, and Structures - A May 26 2022 This volume is part of the Ceramic Engineering and Science Proceeding (CESP) series. This series contains a collection of papers dealing with issues in both traditional ceramics (i.e., glass, whitewares, refractories, and porcelain enamel) and advanced ceramics. Topics covered in the area of advanced ceramic include bioceramics, nanomaterials, composites, solid oxide fuel cells, mechanical properties and structural design, advanced ceramic coatings, ceramic armor, porous ceramics, and more.

**Proceedings of the 26th International Symposium on Advancement of Construction Management and Real Estate** Jul 16 2021 This book of CRIOCM 2021 (26th International Conference on Advancement of Construction Management and Real Estate) presents the latest developments in real estate and construction management around the globe. The conference was organized by the Chinese Research Institute of Construction Management (CRIOCM) working in close collaboration with Tsinghua University. Written by international academics and professionals, the book discusses the latest achievements, research findings and advances in frontier disciplines in the field of construction management and real estate. Covering a wide range of topics, including building information modeling, big data, geographic information systems, housing policies, management of infrastructure projects, intelligent construction and smart city, real estate finance and economics and urban planning and sustainability, the discussions provide valuable insights into the implementation of advanced construction project management and real estate market in China and abroad. The book offers an outstanding resource for academics and professionals.

Advances in Blow Moulding Process Optimization Dec 21 2021 This report provides a review of the development and current understanding of blow moulding technology. The history and technology of blow moulding are reviewed and details are given on the research carried out in order to better understand the fundamental phenomena affecting the different stages of the process, and their interdependence in controlling final part characteristics. An additional indexed section containing several hundred abstracts from the Rapra Polymer Library database provides useful references for further reading.
