"Always surprises and always entertains."--Jonathan Maberry, ROT AND RUINA fantasy collection for young adults. Contains the Writers of the Future Award-winning story "The Vampire Shortstop" and other 11 other tales of fantasy and the supernatural, including the Makers series in which children control the essential forces of the world. www.hauntedcomputer.com Angela Poe has been sixteen for four hundred years, and has lived all of her life throughout Europe. To escape the Underworld, she settles in a small town in Tennessee, where she befriends two boys...Now evil threatens their lives, when the day, the becomes night. A new collection of vivid, lucid stories from an accomplished Irish writer takes its title from the story of a Belfast man who is kidnapped at gunpoint by the IRA when he is out walking his dog Stage Lighting: The Fundamentals is written specifically for introductory stage lighting courses. The book begins with an examination of the nature of light, perception, and color, then leads into a conversation of stage lighting equipment and technicians. Lamps, luminaries, controls/dimming, and electricity form the basis of these chapters. The book also provides a detailed explanation and overview of the lighting design process for the theatre and several other traditional forms of entertainment. Finally, the book explores a variety of additional areas where lighting designers can find related future employment, such as concert and corporate lighting, themed design, architectural and landscape lighting, and computer animation. New for this edition: enlarged full-color illustrations, photographs, light plots and examples of lighting design; updated information on LED lighting and equipment; expanded discussion of the practical use of color as a designer; expanded discussion of psychological/perceptual effects of color; new discussion of color mixing through light sources that make use of additive mixing; expanded discussion of industry professions; expanded discussion and illustrations relating to photometrics; expanded discussion and examples of control protocols and new equipment; and updated designer profiles along with the addition of still more designer profiles. A unique horror/comedy. A Zombie outbreak occurs in a small Outback Australian town. An Australian Army veteran turned tour guide must lead his American group to safety. He is aided by an attractive Ex U.S Army female Captain and a knockabout cast of Australian locals armed with an unusual array of arms and equipment. Warning: Strong violence and explicit use of Australian humour. Check out the book soundtrack through spotify: https://open.spotify.com/playlist/5eKqvd2r7yWDXeeLnWapjU?si=mCSXJ9W_S7Sz51rj4dXhV

Jimmy Blackburn grows up in the Midwest believing the things that adults tell him. He questions his teachers and they lie to him. He questions his parents and his father beats him. He questions the world and it hurts him. And so Jimmy Blackburn becomes a killer. In this novel we meet many of Blackburn's twenty-one victims. They include law enforcers, writers, adulterers, auto mechanics, and other liars. This is an exceptional novel, at once riotously funny and searingly potent: a vision of America through the eyes of the central bogeyman of our culture. The truck's role in American society changed dramatically from the 1960s through the 1980s, with the rise of off-roaders, the van craze of the 1970s and minivan revolution of the 1980s, the popularization of the SUV as family car and the diversification of the pickup truck into multiple forms and sizes. This comprehensive reference book follows the form of the author's popular volumes on American cars. For each year, it provides an industry overview and, for each manufacturer, an update on new models and other news, followed by a wealth of data: available powertrains, popular options, paint colors and more. Finally, each truck is detailed fully with specifications and measurements, prices, production figures, standard equipment and more. The book's organization follows a layered approach that builds on basic principles: Light as a Medium (Part 1), Tools of a Lighting Designer (Part 2), Design Fundamentals (Part 3), and Lighting Applications (Part 4). This presents students with a practical and logical sequence when learning basic concepts. The full spectrum of the lighting design process is presented in detail, giving students an example of how one might develop a lighting design from script analysis through concept and plot development, and all the way to an opening. This detailed process with a step-by-step design approach gives students a plan to work from, which they can later modify as they mature and gain confidence as designers. The text contains a more comprehensive discussion of basic technology, light as a physical phenomena, and methodology of designs than is found in most introductory texts, bridging the gap between introductory and advanced lighting courses. The text will appeal to theatrical designers who want to venture into areas of lighting like architectural or virtual lighting design, while at the same time gaining a solid grounding in the fundamentals of lighting design. Lighting Design will also benefit illuminating engineers who want to move away from mere computational approaches in lighting and on to explore techniques along the design approaches of theatrical lighting design. The final 9 chapters cover many specialty areas of lighting design, highlighting the unique and shared qualities that exist between the different aspects of these elements. Discussions involve traditional entertainment areas like theatre, as well as lesser known facets of the industry including film/video, landscape lighting, retail/museum lighting, virtual lighting, concert, spectacle performances, and architectural lighting. Models of design tasks demonstrate the actual use and development of plots/sections, schedules, photometrics tables, and cut sheets, rather than simply talking about what they are. This hands-on approach provides students with a firm understanding of how to actually use these tools and processes. Betrayed by one of your own... When the defection of an Iranian nuclear scientist is compromised, CIS spymaster Justin Hall suspects this was an inside job. Unsure who he can trust within his agency, he begins a dangerous game, and soon becomes ensnared in a web of lies and deceit. When a piece of intelligence points to his former boss, Justin is left with no other choice but to go rogue, forging alliances with a sinister Russian oligarch and Yemeni insurgents. How will Justin find out who has put the entire agency in jeopardy and is working with the enemy, when they anticipate his every move? Reviews ????? "I can honestly say that not only is the character one of the best, but the author, Ethan Jones is becoming one of the best writers in this genus." ????? "Iranian Protocol is a thriller that reaches out and grabs you by the throat. And that's just the prologue." "It read authentic, real and compelling . . . a story that was both hardboiled yet believable." --ANDREW KAPLAN, bestselling author "I've enjoyed all the Justin Hall thrillers, but I have to say, they just keep getting better." --MARC CAMERON, New York Times bestselling author The Justin Hall Series Iranian Protocol is the third novel in this best-selling series with hundreds of five-star reviews and thousands of sales and downloads. Each book is a self-contained clean story without cliffhangers and can be enjoyed on its own. The only edge-of-your-seat action and adventure series with terrorist subterfuge and clandestine special operations that will keep you begging for more. If you like Ludlum, le Carré, Fleming, or Flynn, you'll love Iranian Protocol. Scroll up, click and get lost in the action-packed, captivating world of Justin Hall now! *Iranian Protocol was previously released as Fog of War. 'Characters all but leap off the page with believability in these marvellous stories of life (and death) in Belfast' Sunday Times Melding his native Irish sensibilities to those of his adopted west-coast Scotland, these tales attend to life's big events: love and loss, separation and violence, death and betrayal. But the stories teem with smaller significant moments too – private epiphanies, chilling exchanges, intimate encounters. Each of these extraordinary stories – with their wry, self-deprecating humour, their elegance and subtle wisdom – gets to the very heart of life. From the New York Times–bestselling author of The Ninja comes the first “authentic and engrossing” thriller in the series featuring Jake Maroc (Los Angeles Times). Jake Maroc, a top agent for the secret US government agency known as the Quarry, is a martial arts expert on a quest for vengeance. Nichiren, Jake's deadliest adversary, is a cold-blooded assassin with a deadly secret. And Shi Zilin is a Communist minister, a cunning survivor of turmoil. But only one can be the Jian: the ultimate master of strength and wisdom. Like stones in wei qi, the Chinese game of strategy, four ancient pieces of jade determine their fate. All three men are part of a grand scheme, but as the Communist Chinese, the KGB, and the Americans maneuver for position, only the Jian will determine who controls Hong Kong, the glittering gateway to China. From the author of the Nicholas Linnear novels and the continuing adventures of Robert Ludlum's Jason Bourne, this thriller is “brilliant . . . Perhaps no other piece of fiction since Shogun illuminates the mind, machinations, and mores of Eastern peoples with the style and intensity of Jian” (The Miami Herald). There are few industry sectors in the world today with more potential than renewable and hydrogen energy. Clean, green and renewable energy technologies are receiving immense emphasis from investors, environmentalists, governments and major corporations. Today's high prices for crude oil, coal and natural gas will increase the demand for renewables of all types. A wide variety of technologies are being researched, developed and implemented on a global basis, from Stirling engines to wind power, from advanced nuclear plants to geothermal and fuel cells. Our analysis also includes tar sands (oil sands), oil shale, fuel cells, clean coal, distributed power, energy storage, biofuels and much more. You'll find a complete overview, industry analysis and market research report in one superb, value-priced package. It contains thousands of contacts for business and industry leaders, industry associations, Internet sites and other resources. This book also includes statistical tables, an industry glossary and thorough indexes. The corporate profiles section of the book includes our proprietary, in-depth profiles of the 250 leading companies in all facets of the alternative, renewable and hydrogen energy business. Here you'll find complete profiles of the hot companies that are making news today, the largest, most successful corporations in the business. Purchasers of either the book or PDF version can receive a free copy of the company profiles database on CD-ROM, enabling key word search and export of key information, addresses, phone numbers and executive names with titles for every company profiled. Around the world, an increasing number of strange events forces humanity to confront their greatest question: are we alone? What do sightings of cryptids, strange objects in the sky, and the disappearances of key scientists have in common? The aliens are indeed real, and they have been waiting until the time is right. The nations of Earth are now in a race against time- can they find out what the true intentions of these beings might be before it's too late? If you're into UFO conspiracies, political and technological thrillers, and epic, edge of your seat adventures, check out this complete, action-packed trilogy from John Triptych. Carmakers release new models every year with advanced technology to attract consumer interest and to satisfy increasingly stringent government regulations. Some of these technologies are firsts or leading-edge, and they start trends that more companies will soon follow. Snapshots of the direction of the automotive industry, along with OEM and supplier perspectives, are presented in these articles that have been collected by the Editors of Automotive Engineering whose aim is to provide the reader with a complete overview of the key advances that took place over the course of one model year. • Provides a single source for information on the key engineering trends of one year. • Allows the reader to skip to chapters that cover specific car models that interest them, or read about all models from beginning to end. • Includes plenty of big, full-color images and the facts about the most recent technology and engineering innovations. Each car manufacturer has its own chapter exploring new models in-depth. The yearly trends and innovations that make the automotive industry fascinating to both the engineer and the customer are all captured in the imagery and easy-reading of this full-color book. Patricia may be well-traveled – but this is a mystery with a dangerous destination. Patricia always viewed the world from the end of her pen. Her feet hop from place to place; her exotic experiences are filling the pages faster than stamps on her passport. Someday, she aspires to land a big-time publishing deal. At a stopover in Atlanta, she is shocked to discover the body of a local businessman, Peter, dumped in a camp in the outskirts of the city. For the first time, her wings are clipped as the lead detective; Brian Johnston launches an investigation into Peter's death – firmly suspecting that cause of death was murder. Patricia and Brian band together in his murder investigation, slowly uncovering leads to a shady underbelly behind Peter's flashy 'successful' exterior, and the illicit dealings he was determined to keep from prying eyes. As the details begin to piece together, someone intends to step in and silence them. By any means necessary. From New York Times bestselling author Diane Chamberlain comes a novel of chilling intrigue, a decades-old disappearance, and one woman's quest to find the truth... "A novel about arts and secrets...grippingly told...pulls readers toward a shocking conclusion."—People magazine, Best New Books North Carolina, 2018: Morgan Christopher's life has been derailed. Taking the fall for a crime she did not commit, her dream of a career in art is put on hold—until a mysterious visitor makes her an offer that will get her released from prison immediately. Her assignment: restore an old post office mural in a sleepy southern town. Morgan knows nothing about art restoration, but desperate to be free, she accepts. What she finds under the layers of grime is a painting that tells the story of madness, violence, and a conspiracy of small town secrets. North Carolina, 1940: Anna Dale, an artist from New Jersey, wins a national contest to paint a mural for the post office in Edenton, North Carolina. Alone in the world and in great need of work, she accepts. But what she doesn't expect is to find herself immersed in a town where prejudices run deep, where people are hiding secrets behind closed doors, and where the price of being different might just end in murder. What happened to Anna Dale? Are the clues hidden in the decrepit mural? Can Morgan overcome her own demons to discover what exists beneath the layers of lies? "Chamberlain, a master storyteller, keeps readers hooked, with a story line that leavens history and social commentary with romance and mystery."—Lexington Dispatch In 2018 almost half of all vehicles made in North America were produced at foreign-owned plants, and the sector was on track to monopolize the market. Despite this, the industry has been overlooked compared with its domestic counterpart, both in scholarship and popular memory. Redressing this neglect, America's Other Automakers provides a new history of the foreignowned auto sector, the first to extensively draw on archival sources and to articulate the human agency of participants, including workers, managers, and industry recruiters. Timothy J. Minchin challenges the view that the industry's growth primarily reflected incentives, stressing human agency and the complexity of individual stories instead. Deeply human in its approach, the book also explores the industry's impact on grassroots communities, showing that it had more costs than supporters acknowledged. Drawing on a wide range of primary and secondary sources, America's Other Automakers uncovers significant tensions over unionization, reports of discriminatory hiring, and unease about the industry's rapid growth, critically exploring seven large assembly facilities and their impact on the communities in which they were built. "Dangers untold isn't your normal horror anthology; not a vampire, zombie or werewolf to be found. Filled with unusual monsters and unexpected terror, Dangers untold is a series of seventeen short stories from horror industry professionals who have a different take on what makes good horror"--Page 4 of cover. "Schaffer is the real deal. His writing will knock you out." —J.A. Konrath WHEN EVIL KNOWS YOUR NAME Nothing fascinates rookie cop Carrie Santero more than serial killers. Now she's hunting down the sickest, most twisted psychopath she's ever faced—an “omnikiller.” Unpredictable, unrelenting. A death machine beyond all evil. As the body count rises, Carrie enlists the help of Jacob Rein, a brilliant, embittered former detective who has gone to the darkest corners of the killing mind. What he knows—what he can never know—could lead Carrie to the point of no return. The place she can no longer avoid. The place that has never stopped calling her . . . “A killer who sets a new standard for lethal danger.”—Lisa Scottoline “A stylish, attention-getting thriller. . . the most engaging pair of detectives I've seen in a long while.” —David Morrell “Gruesome and honest. Readers will find themselves fascinated.” —Booklist “Schaffer's knowledge of detective work is evident.” —Library Journal In Japan it's called the "Ghosn Shock"—the stunning arrest of Carlos Ghosn, the jet-setting CEO who saved Nissan and made it part of a global automotive empire. Even more shocking was his daring escape from Japan, packed into a box and put on a private jet to Lebanon after months spent in a Japanese detention center, subsisting on rice gruel. This is the saga of what led to the Ghosn Shock and what was left in its wake. Ghosn spent two decades building a colossal partnership between Nissan and Renault that looked like a new model for a global business, but the alliance's shiny image fronted an unsteady, tense operation. Culture clashes, infighting among executives and engineers,

dueling corporate traditions, and government maneuvering constantly threatened the venture. Journalists Hans Greimel and William Sposato have followed the story up close, with access to key players, including Ghosn himself. Veteran Tokyo-based reporters, they have witnessed the end of Japan's bubble economy and attempts at opening Japan Inc. to the world. They've seen the fraying of keiretsu, Japan's traditional skein of business relationships, and covered numerous corporate scandals, of which the Ghosn Shock and Ghosn's subsequent escape stand above all. Expertly reported, Collision Course explores the complex suspicions around what and who was really responsible for Ghosn's ouster and why one of the top executives in the world would risk everything to escape the country. It explains how economics, history, national interests, cultural politics, and hubris collided, crumpling the legacy of arguably the most important foreign businessman ever to set foot in Japan. This gripping, unforgettable narrative, full of fascinating characters, serves as part cautionary tale, part object lesson, and part forewarning of the increasing complexity of doing global business in a nationalistic world. The killer is back with a vengeance. A decade has passed since his murder conviction but now he's escaped prison, his whereabouts unknown. In the meantime, Sam Middleton struggles to cope with his wife's recent death, certain that the killer is to blame. Could his daughter's family be next? While Sam is in London doing a book promotion, Inspector Clive Hogarth is in pursuit of a serial rapist that's been plaguing the City. Can Hogarth piece everything together before Sam's whole world comes crashing down? Steers buyers through the the confusion and anxiety of new and used vehicle purchases like no other car-and-truck book on the market. "Dr. Phil," along with George Iny and the Editors of the Automobile Protection Association, pull no punches. When Jennifried McNeal semi-retired, she looked forward to spending more time with her grown children and their families. Instead, it appeared as if she would see them less. In Amy's Real Life, she shares the story of her daughter, Amy; Amy's husband, Dillon; and the couple's two middle-school-aged sons as they faced the joys and challenges of a three year, overseas assignment in Japan. Culled from the journal McNeal kept before and during the move and throughout their international stay, she narrates the sometimes funny and sometimes emotional adventures as they learned about the culture, language, and even transportation. This story includes many of the family's life experiences in the United States as well as of the Japanese people who treated them with generosity and kindness. Offering insights into one family's life adapting to a new country during a worldwide pandemic, Amy's Real Life tells how God's hand guided them throughout. Do you remember LITTLE HOUSE ON THE PRAIRIE and THE WALTONS? Then, this book is for you. It is about "old times" in the South. Listen to some newspaper reviewer comments. "Greens book is a MUST READ for anyone interested in the way things were and for anyone interested in reading a good story...From the first page to the last page, you will be hard pressed to put it down." - Stephen H. Smith, "The Soperton News." "These are 149 pages of heartwarming and heart-rending happenings of his family and friends over the years. Read the book. It is an inspiration." - Dr. Kemp Mabry, "The Statesboro Herald." The 16-year-old was lucky. She at least survived her encounter with Dayton Leroy Rogers to detail its horrors. But a long list of other women were not as fortunate. Their stories had to be painstakingly pieced together by police from the corpses on the most shocking trail of terror ever left by a serial killer. The Man Who Loved to Kill Women--Dayton Leroy Rogers was known in Portland, Oregon as a respected businessman and devoted husband and father. But at night he abducted women, forced them into sadistic bondage games, and thrilled in their pain, terror and mutilation. His murderous spree was stopped only after, in plain view, he slashed to death his final victim...and when a hunter accidentally stumbled onto the burial grounds of seven other women Rogers had killed one-by-one in the depths of the Molalla Forest did police realize they were dealing with a killer whose bloodlust knew no bounds. This is the shocking true story of the horrifying crimes, capture, and conviction of Dayton Leroy Rogers, Oregon's mild-mannered businessman by day--vicious serial killer by night. BYRON CAN SEE THE FUTURE. Just a few maddening seconds. Never able to change anything. It's a curse she's been running from for years. Just like she ran away from home where her mother died the day she was born. Where her father blamed her. But when her father dies suddenly, Byron is finally able to come home. A quick visit, she thinks—collect her inheritance, say hello to her childhood best friend, Chase, and be gone before morning. Except Chase is missing...and no one seems to be looking for her. Desperate to find her friend, Byron instead uncovers a pattern of young women who've vanished from this town over the years—a pattern that points to her dead parents, and to the mysterious source of her visions. Now, with a kidnapper closing in, Byron must learn to break her curse and change the future she's seen. Her life—and Chase's—depends on it. *** "A riveting thriller with a provocative central mystery...Byron's story is as searing as her welding torch." - Holly M. Wendt, author of "The Bolton Strid" and "The Rogers Ladder" "In the vein of Dean Koontz's Odd Thomas, Slip delivers a thriller-mystery with a hint of the paranormal and a protagonist that will take a bite out of you from page one. Byron's adventures are only just beginning." - Gwendolyn N. Nix, author of I Have Asked To Be Where No Storms Come Something is wrong in Idaho Falls. Bodies are appearing, stripped of their skin and disposed of in public places. There are no witnesses to the murders and no suspects. Brad Vansicle and Jeff 'Tark' Tarkelson are detectives in this small town and they have watched with growing horror as the murders increase in frequency. Unable to find any viable suspects all they can do is document the murders, collect what little evidence there is and wait for the killer to make a mistake. The Regs, a group of friends that eat at the North Highway Café every night, are talking about the day and life in general. Tonight one of The Regs is lost in his own world. He is lost in the horror of what he witnessed the night before; he doesn't know that what he has seen will pull this group of six friends into a terrifying secret. Before last night he was happy in his life. Before last night he was unaware. Now he knows about the dark. The Dark of Light. Number of Exhibits: 1 Court of Appeal Case(s): G006953 In UFO Frontier, Cincinnati-based Ufologist Kenny Young's body of work is revealed including his investigations into Jackie Gleason and "The Pickled Men", pre-Roswell UFO crashes, the 1997 "Phoenix Lights", phantom blasts, mystery planes, weird creatures, stealth aerospace technology, crop circles, police and government UFO incidents, and private industry involvement. Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models.
