Twenty years ago, a first novel appeared and instantly announced the arrival of a master storyteller. T. R. Pearson's A Short History of a Small Place was hailed as "an absolute stunner" (Jonathan Yardley, The Washington Post) and its hero, young Louis Benfield, was dubbed "a youth not as wry as Holden Caulfield, but certainly as observant, and with a bigger, even sadder heart" (Fran Schumer, The New York Times). Now, older but not necessarily wiser, Louis Benfield returns in Glad News of the Natural World. In order to get a sense of the larger world, he has moved to New York City from his hometown of Neely, North Carolina. Louis is a modern-day Candide, looking for love and experience in all the wrong places. However, when tragedy strikes, he finds the maturity to be more than man enough for the job. Whether catching up with Louis Benfield and the denizens of Neely or meeting them for the first time, readers will find Glad News of the Natural World hilarious and heartbreaking, warm and wise. From The New York Times bestselling author of THE ORGANIZED MIND and THIS IS YOUR BRAIN ON MUSIC, a primer to the critical thinking that is more necessary now than ever. This deluxe eBook features six videos from Daniel Levitin, with more examples, anecdotes, and added visual guides. We are bombarded with more information each day than our brains can process—especially in election season. It's raining bad data, half-truths, and even outright lies. New York Times bestselling author Daniel J. Levitin shows how to recognize misleading announcements, statistics, graphs, and written reports revealing the ways lying weasels can use them. It's becoming harder to separate the wheat from the digital chaff. How do we distinguish misinformation, pseudo-facts, distortions, and outright lies from reliable information? Levitin groups his field guide into two categories—statistical information and faulty arguments—ultimately showing how science is the bedrock of critical thinking. Infoliteracy means understanding that there are hierarchies of source quality and bias that variously distort our information feeds via every media channel, including social media. We may expect newspapers, bloggers, the government, and Wikipedia to be factually and logically correct, but they so often aren't. We need to think critically about the words and numbers we encounter if we want to be successful at work, at play, and in making the most of our lives. This means checking the plausibility and reasoning—not passively accepting information, repeating it, and making decisions based on it. Readers learn to avoid the extremes of passive gullibility and cynical rejection. Levitin's charming, entertaining, accessible guide can help anyone wake up to a whole lot of things that aren't so. And catch some lying weasels in their tracks! Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Determine the proper part numbers with this detailed, accurate, year-by-year guide showing you the right way to do a full-scale restoration. Over 1,000 photos, part numbers, codes and color charts from original factory literature point out what goes where, what parts are good or bad, and the best way to put them together. 2nd ed. For Cheryl Mendelson, laundering is the best part of housekeeping. It's full of physical pleasures—the look of favorite clothes restored to freshness and beauty, the tactile satisfaction of crisp linens in beautifully folded stacks. Good laundering preserves things you love and protects your pocketbook. It doesn't take much time or effort. What it takes is knowledge, and Laundry is the comprehensive, entertaining, and inspiring book on the art of laundering. Culled from the bestselling Home Comforts, with revised and updated information and a new introduction, Laundry is an indispensable guide to caring for all the cloth in one's home: from kitchen rags to bedding, hand-washables, and baby clothes to vintage linens. Mendelson offers detailed guidance on when to disregard labels, removing stains, making environmentally informed choices, sewing, and storing clothing and fabrics. A much-needed antidote to the standard-issue how-to manual, Laundry celebrates the satisfactions of ironing, folding, and caring for clothes and linens. Both pragmatic and eloquent, Mendelson provides beginning and veteran homemakers with a seamless combination of reliable instruction, time-tested advice, and fascinating personal narrative. As a farm girl in Pennsylvania, Mendelson—who is a philosopher, lawyer, and professor, as well as a homemaker, wife, and mother—received a classic domestic education from her grandmothers, aunts, and mother. Laundry combines the best of the traditional lore they taught her with the latest in technical and scientific information. Writing with infectious love and respect for her subject, Mendelson is sure to instill in readers a newfound affection and appreciation for the art of laundering. Includes Part 1, Number 1: Books and Pamphlets, Including Serials and Contributions to Periodicals (January - June)
