The twenty-first-century telecommunications landscape is radically different from the one that prevailed as recently as the last decade of the twentieth century. Robert Litan and Hal Singer argue that given the speed of innovation in this sector, the Federal Communications Commission's outdated policies and rules are inhibiting investment in the telecom industry, specifically in fast broadband networks. This pithy handbook presents the kind of fundamental rethinking needed to bring communications policy in line with technological advances. Fast

broadband has huge societal benefits, enabling all kinds of applications in telemedicine, entertainment, retailing, education, and energy that would have been unthinkable a few years ago. Those benefits would be even greater if the FCC adopted policies that encouraged more broadband providers, especially wireless providers, to make their services available in the roughly half of the country where consumers currently have no choice in wireline providers offering download speeds that satisfy the FCC's current standards. The authors' recommendations include allowing broadband providers to charge for premium delivery services; embracing a rule-of-reason approach to all matters involving vertical arrangements; stripping the FCC of its merger review authority because both the Federal Trade Commission and the Justice Department have the authority to stop anticompetitive mergers; eliminating the FCC's ability to condition spectrum purchases on the identity, business plans, or spectrum holdings of a bidder; and freeing telephone companies from outdated regulations that require them to maintain both a legacy copper network and a modem IP network. These changes and others advanced in this book would greatly enhance consumer welfare with respect to telecommunications services and the applications built around them. When the people of Lego City put on a road race in which anything with wheels can compete, from racing cars to a bear on a bicycle, twins Taylor and Tyler will do everything to win, including cheat. Go on the ride of your life with the racing legend himself \*\*with a thrilling NEW CHAPTER on John's dramatic 2017 crash\*\* 'Then I was there myself, just another face in the crowd, watching the bikes fly by. The smells, the noise and the speed were all there for me to experience. It was like a massive injection in my head and it just blew my mind. I knew within seconds that I was

going to be a TT racer. I didn't know how or what I was going to have to do to achieve this, and my dad wasn't going to be keen. Everyone around me was aware of the dangers, but from that moment I knew I had to do it.' John McGuinness is one of the all-time giants of road racing, with a huge host of victories to his name. But his easy humour and down-to-earth attitude off the bike have always kept people guessing: what's the truth about the man inside the helmet, that has kept him at the top of such a sport for over 20 years? His autobiography tells the whole story, from his humble beginnings in Morecambe and getting his first bike at the age of 3, to working as a bricklayer and cockle fisherman before deciding to follow his dream, and finally to his many victories in the most dangerous sporting event on the planet. He tells of what it takes to be a champion in such an exacting sport, and to keep winning even though all logic tells you to stop - and when so many of your fellow racers are paying the ultimate price for doing it. This thrilling autobiography gets into the head of the man who stares death in the face, and doesn't even flinch. Does listening to music while driving a car enhance driver safety or place the driver at increased risk of accidents? This is the first full-length text to explore the subject. A great deal of work has been done to investigate and reduce driver distraction and inattention, but this book is the first to focus on in-cabin aural backgrounds of music as a contributing factor to human error and traffic violations. #1 BESTSELLING COMPLETE GUIDE & WALKTHROUGH No.1 Need For Speed Unbound: Complete Guide & Walkthrough Beginner's Guide Tips and Tricks With the brand new Lakeshore City ready for you to race around, and a brand new risk vs reward racing system, there are a lot of layers to Need for Speed Unbound. This book covers Joan Newton Cuneo's life, and her roles (from 1905 to 1915) as the premier female racer in the United States and spokeswoman for

women drivers and good roads. Beginning with her family history and marriage to Andrew Cuneo, it traces her life in New York society, the birth of her children, and Joan's growing interest in automobile touring and racing and partnership with Louis Disbrow, her racing mechanic. The book covers Joan's experiences in three Glidden Tours, including her notes on the 1907 tour, her first races, and her rivals. It also looks at the growth and change of automobile culture and the battles for control of racing among the American Automobile Association, the Automobile Club of America, and the American Automobile Manufacturers Association—which ended in banishing women racers shortly after Joan's greatest racing victories at New Orleans (in 1909). The book then follows Joan's attempts to continue racing, the end of her marriage, her move to the Upper Peninsula, and her remarriage and death. The book also includes a chapter on her female rivals in racing and touring. \*UNOFFICIAL GUIDE\* Advanced Tips & Strategy Guide. pulling and squatting - but without converting this maximal strength to speed and power. However, the 'holy grail' for most athletes is power, and plyometrics is the best way to achieve this. Plyometrics for Speed and Power will guide you through the basics of plyometric training through to sport-specific drills that will enhance your performance. This new book covers the history of plyometrics and the science behind it; foundation strength; plyometric equipment; warm-up techniques and performance testing. This complete guide to the basics of plyometric training through to sport-specific drills will enhance your performance, speed and power and will be of interest to all coaches and athletes. Superbly illustrated with 420 colour photographs and 30 diagrams. Looks at the history of automobile racing and the people and drivers who make it possible. Axell James is the oldest of the James brothers. He was forced to grow up after their mother passed away but luckily he always had one constant in his life, Sadie. Sadie moved to town during their senior year of high school. She caught Axell's attention immediately. Sadie somehow calmed the raging storm for Axell. However, her fear of losing him through racing causes them to be torn apart. After a couple of months Axell realizes the only thing he really needs in his life is Sadie so he walks away from racing. Now, years later they are married and living their happily ever after until Sadie's past comes back to haunt them. Axell has always had Sadie on pedestal, believing she is perfect but when the lies from her past catch up to them he'll realize she is far from perfect. As the truth comes out, Sadie must go back to South Carolina to take care of things. In her absence and in light of the lies surrounding Axell's life he finds himself returning the race scene he left so many years ago. Tragedy will strike Axell and Sadie once again but will their love be able to survive? Even 30 years after his death, Steve McQueen remains an icon of cool. His image continues to appear in advertising and pop culture, and car, motorcycle, and racing fans embrace him as one of their own. Now comes this volume featuring rare photography and chronicling McQueen's fascination with and passion for all things internal-combustion powered. McQueen's movie characters always had a great motorcycle or

car—from the 650cc "BMW" motorcycle (a disguised Triumph) in *The Great Escape* (1963) to the Gulf Porsche 917 race car he raced in Le Mans (1971). His need for speed propelled him from Hollywood into a number of top off-road motorcycle races, including the Baja 1000, Mint 400, and Elsinore Grand Prix. Determined to be ahead of the pack, McQueen trained vigorously, weight lifting, running, and studying martial arts. *Steve McQueen A Passion for Speed* reflects a life lived in the moment and with the pedal to the metal. *Turbo the snail* is speeding into movie theaters in 2013—and into this book that comes with a Turbo-shaped viewer pre-loaded with 8 cool movie images! This fun interactive storybook is timed to tie into the release of the new DreamWorks film, *Turbo*. This story of a little snail with BIG dreams of racing in the Indy 500 is sure to be both an entertaining and inspiring tale for kids of all ages. Children will love viewing the eight colorful images in the picture viewer as they read along with the story. To succeed in today's ever-accelerating world, speed is the name of the game. Forget "slow and steady wins the race." The key to getting ahead is not fighting or hiding from speed, but embracing speed and using its power to your advantage. As Vince Poscente demonstrates in this rewarding and, yes, fast-paced book, speed has a unique ability to enrich your life. He empowers you to take control of your time, your tasks, your priorities, and your talents, and start making life everything you want it to be. Twenty new tips—exclusive to this paperback edition—show you how to:

- recognize the difference between repetitive chores and passionate pursuits, and assign the appropriate amount of time and energy to each
- mentally shatter the outdated idea that work, home, and leisure should be completely separate, and create a new, purpose-driven model of organizing your time
- discover how to control interruptions, including how and when to accept them—by learning when to multitask and when to focus

Speed provides amazing benefits—you become more conscious of how you spend your time, understand your authentic purpose, and find yourself more flexible and open to new opportunities. When you harness the power of speed, your life and work become less stressful, less busy, and more balanced. What are you

waiting for? Praise for The Age of Speed: "The Age of Speed is your bible to surf the speed tsunami that's overtaking business and life." -Scott Cook, chairman and co-founder, Intuit "Thought-provoking . . . It's time to make peace with the whoosh of your 24/7 lifestyle." -Time "[Vince Poscente's] counterintuitive notion of embracing speed rather than coping with it will change the way people live and work." -Stephen M. R. Covey, author of The Speed of Trust

Tobey Marshall is a mechanic struggling to save his family-owned garage. While he and his team skillfully build and race muscle cars on the side, it's not enough to keep the doors open. He reluctantly partners with his longtime rival, a wealthy, arrogant ex-professional racer, Dino Brewster. But just as a major sale to car broker Julia Bonet looks as though it will save Tobey's business, a disastrous, unsanctioned race results in Dino framing Tobey for manslaughter. Two years later, Tobey is fresh out of prison and eager for revenge. To take Dino down, he plans to enter the high-stakes De Leon race—the biggest contest of underground racing in the world—to get the money to reclaim his family business and expose Dino's deception. But getting there won't be easy, as Tobey must run a high-octane, pedal-to-the-floor gauntlet, dodging cops coast to coast and dealing with fallout from a dangerous bounty on his car. Luckily, with his team—and the surprisingly resourceful Julia—on his side, he just might defy the odds . . . Provides practical and inspirational advice for both experienced and novice runners, covering such topics as training, injury prevention, and finding joy in running.
