The Performance Jul 10 2021 A novel about three women at turning points in their lives, and the one night that changes everything. One night, three women go to the theater to see a play. Wildfires are burning in the hills outside, but inside the theater it is time for the performance to take over. Margot is a successful, flinty professor on the cusp of retirement, distracted by her fraught relationship with her adult son and her ailing husband. After a traumatic past, Ivy is now a philanthropist with a seemingly perfect life. Summer is a young drama student, an usher at the theater, and frantically worried for her girlfriend whose parents live in the fire zone. While the performance unfolds on stage, so does the compelling trajectory that will bring these three women together, changing them all. Deliciously intimate and yet emotionally wide-ranging, *The Performance* is a novel that both explores the inner lives of women as it

underscores the power of art and memory to transform us.

Recognizing Wrongs Sep 24 2022 Two preeminent legal scholars explain what tort law is all about and why it matters, and describe their own view of tort's philosophical basis: civil recourse theory. Tort law is badly misunderstood. In the popular imagination, it is "Robin Hood" law. Law professors, meanwhile, mostly dismiss it as an archaic, inefficient way to compensate victims and incentivize safety precautions. In *Recognizing Wrongs*, John Goldberg and Benjamin Zipursky explain the distinctive and important role that tort law plays in our legal system: it defines injurious wrongs and provides victims with the power to respond to those wrongs civilly. Tort law rests on a basic and powerful ideal: a person who has been mistreated by another in a manner that the law forbids is entitled to an avenue of civil recourse against the wrongdoer. Through tort law, government fulfills its political obligation to provide this law of wrongs and redress. In *Recognizing Wrongs*, Goldberg and Zipursky systematically explain how their "civil recourse" conception makes sense of tort doctrine and captures the ways in which the law of torts contributes to the maintenance of a just polity.

Recognizing Wrongs aims to unseat both the leading philosophical theory of tort law—corrective justice theory—and the approaches favored by the law-and-economics movement. It also sheds new light on central figures of American jurisprudence, including former Supreme Court Justices Oliver Wendell Holmes, Jr., and Benjamin Cardozo. In the process, it addresses hotly contested contemporary issues in the law of damages, defamation, malpractice, mass torts, and products liability.

Apocalypse Never Jan 24 2020 Now a National Bestseller! Climate change is real but it's not the end of the world. It is not even our most serious environmental problem. Michael Shellenberger has been fighting for a greener planet for decades. He helped save the world's last unprotected redwoods. He co-created the predecessor to today's Green New Deal. And he led a successful effort by climate scientists and activists to keep nuclear plants operating, preventing a spike of emissions. But in 2019, as some claimed "billions of people are going to die," contributing to rising anxiety, including among adolescents, Shellenberger decided that, as a lifelong environmental activist, leading energy expert, and father of a teenage daughter, he needed to speak out to separate science from fiction. Despite decades of news media attention, many remain ignorant of basic facts. Carbon emissions peaked and have been declining in most developed nations for over a decade. Deaths from extreme weather, even in poor nations, declined 80 percent over the last four decades. And the risk of Earth warming to very high temperatures is increasingly unlikely thanks to slowing population growth and abundant natural gas. Curiously, the people who are the most alarmist about the problems also tend to oppose the obvious solutions. What's really behind the rise of apocalyptic environmentalism? There are powerful financial interests. There are desires for status and power. But most of all there is a desire among supposedly secular people for transcendence. This spiritual impulse can be natural and healthy. But in preaching fear without love, and guilt without redemption, the new religion is failing to satisfy our deepest

psychological and existential needs.

Application of Systematic Review Methods in an Overall Strategy for Evaluating Low-Dose Toxicity from Endocrine Active Chemicals

Aug 31 2020 To safeguard public health, the US Environmental Protection Agency (EPA) must keep abreast of new scientific information and emerging technologies so that it can apply them to regulatory decision-making. For decades the agency has dealt with questions about what animal-testing data to use to make predictions about human health hazards, how to perform dose-response extrapolations, how to identify and protect susceptible subpopulations, and how to address uncertainties. As alternatives to traditional toxicity testing have emerged, the agency has been faced with additional questions about how to incorporate data from such tests into its chemical assessments and whether such tests can replace some traditional testing methods. Endocrine active chemicals (EACs) have raised concerns that traditional toxicity-testing protocols might be inadequate to identify all potential hazards to human health because they have the ability to modulate normal hormone function, and small alterations in hormone concentrations, particularly during sensitive life stages, can have lasting and significant effects. To address concerns about potential human health effects from EACs at low doses, this report develops a strategy to evaluate the evidence for such low-dose effects.

Room Feb 23 2020 Kidnapped as a teenage girl, Ma has been locked inside a purpose built room in her captor's garden for seven years. Her five year old son, Jack, has no concept of the world outside and happily exists inside Room with the help of Ma's games and his vivid imagination where objects like Rug, Lamp and TV are his only friends. But for Ma the time has come to escape and face their biggest challenge to date: the world outside Room.

The Summer Book Nov 14 2021 In *The Summer Book* Tove Jansson distills the essence of the summer—its sunlight and storms—into twenty-two crystalline vignettes. This brief novel tells the story of Sophia, a six-year-old girl awakening to existence, and Sophia's grandmother, nearing the end of hers, as they spend the summer on a tiny unspoiled island in the Gulf of Finland. The grandmother is unsentimental and wise, if a little cranky; Sophia is impetuous and volatile, but she tends to her grandmother with the care of a new parent. Together they amble over coastline and forest in easy companionship, build boats from bark, create a miniature Venice, write a fanciful study of local bugs. They discuss things that matter to young and old alike: life, death, the nature of God and of love. "On an island," thinks the grandmother, "everything is complete." In *The Summer Book*, Jansson creates her own complete world, full of the varied joys and sorrows of life. Tove Jansson, whose Moomintroll comic strip and books brought her international acclaim, lived for much of her life on an island like the one described in *The Summer Book*, and the work can be enjoyed as her closely observed journal of the sounds, sights, and feel of a summer spent in intimate contact with the natural world.

Checkout 19 Aug 23 2022 A NEW YORK TIMES 10 BEST BOOKS OF THE YEAR NAMED A BEST BOOK OF THE YEAR BY THE NEW YORKER AND VOGUE “Bennett writes like no one else. She is a rare talent, and Checkout 19 is a masterful novel.”

–Karl Ove Knausgaard From the author of the “dazzling. . . and daring” *Pond* (O magazine), the adventures of a young woman discovering her own genius, through the people she meets—and dreams up—along the way. In a working-class town in a county west of London, a schoolgirl scribbles stories in the back pages of her exercise book, intoxicated by the first sparks of her imagination. As she grows, everything and everyone she encounters become fuel for a burning talent. The large Russian man in the ancient maroon car who careens around the grocery store where she works as a checkout clerk, and slips her a copy of *Beyond Good and Evil*. The growing heaps of other books in which she loses—and finds—herself. Even the derailing of a friendship, in a devastating violation. The thrill of learning to conjure characters and scenarios in her head is matched by the exhilaration of forging her own way in the world, the two kinds of ingenuity kindling to a brilliant conflagration. Exceeding the extraordinary promise of Bennett’s mold-shattering debut, *Checkout 19* is a radical affirmation of the power of the imagination and the magic escape those who master it open to us all.

Judging Statutes Feb 17 2022 In an ideal world, the laws of Congress--known as federal statutes--would always be clearly worded and easily understood by the judges tasked with interpreting them. But many laws feature ambiguous or even contradictory wording. How, then, should judges divine their meaning? Should they stick only to the text? To what degree, if any, should they consult aids beyond the statutes themselves? Are the purposes of lawmakers in writing law relevant? Some judges, such as Supreme Court Justice Antonin Scalia, believe courts should look to the language of the statute and virtually nothing else. Chief Judge Robert A. Katzmann of the U.S. Court of Appeals for the Second Circuit respectfully disagrees. In *Judging Statutes*, Katzmann, who is a trained political scientist as well as a judge, argues that our constitutional system charges Congress with enacting laws; therefore, how Congress makes its purposes known through both the laws themselves and reliable accompanying materials should be respected. He looks at how the American government works, including how laws come to be and how various agencies construe legislation. He then explains the judicial process of interpreting and applying these laws through the demonstration of two interpretative approaches, purposivism (focusing on the purpose of a law) and textualism (focusing solely on the text of the written law). Katzmann draws from his experience to show how this process plays out in the real world, and concludes with some suggestions to promote understanding between the courts and Congress. When courts interpret the laws of Congress, they should be mindful of how Congress actually functions, how lawmakers signal the meaning of statutes, and what those legislators expect of courts construing their laws. The legislative record behind a law is

in truth part of its foundation, and therefore merits consideration.

Doing a Literature Review Oct 01 2020 ?This book can provide an excellent framework for bolstering what is often an experiential process - doing a literature review. It is best seen alongside the supervisor, as a guide, through the multidimensional sea of academic literature? - British Educational Research Journal Reviewing the literature for a research project can seem a daunting, even overwhelming task. New researchers, in particular, wonder: Where do I start? What do I do? How do I do it? This text offers students across the social sciences and humanities a practical and comprehensive guide to writing a literature review. Chris Hart offers

invaluable advice on how to: search out existing knowledge on a topic; analyse arguments and ideas; map ideas, arguments and perspectives; produce a literature review; and construct a case for investigating a topic. Doing a Literature Review contains examples of how to cite references, structure a research proposal and present a Master's thesis. It is published as a Set Book for The Open University Postgraduate Foundation Module (D820) The Challenge of the Social Sciences. `I have been waiting for this book for five years. It sets out a number of important dimensions involved in the process of literature review and by clear signposting, diagrams, and examples will help the student to carry out her or his review more systematically. Learning how to carry out a literature review has always entailed the experiential. While this is the best way of learning, it is only so providing that learning actually takes place during the experience (or by reflection afterwards). This book makes explicit those dimensions which could remain implicit or even missed by the student as they wade through all those books, papers, articles, and print-outs? - Kevin Maguire, Nottingham Trent University

In the Eye of the Wild Jan 16 2022 After enduring a vicious bear attack in the Russian Far East's Kamchatka Peninsula, a French anthropologist undergoes a physical and spiritual transformation that forces her to confront the tenuous distinction between animal and human. *In the Eye of the Wild* begins with an account of the French anthropologist Nastassja Martin's near fatal run-in with a Kamchatka bear in the mountains of Siberia. Martin's professional interest is animism; she addresses philosophical questions about the relation of humankind to nature, and in her work she seeks to partake as fully as she can in the lives of the indigenous peoples she studies. Her violent encounter with the bear, however, brings her face-to-face with something entirely beyond her ken—the untamed, the nonhuman, the animal, the wild. In the course of that encounter something in the balance of her world shifts. A change takes place that she must somehow reckon with. Left severely mutilated, dazed with pain, Martin undergoes multiple operations in a provincial Russian hospital, while also being grilled by the secret police. Back in France, she finds herself back on the operating table, a source of new trauma. She realizes that the only thing for her to do is to return to Kamchatka. She must discover what it means to have become, as the Even people call it, medka, a person who is half human, half bear. *In the Eye of the Wild* is a fascinating, mind-altering book about terror, pain, endurance, and self-transformation, comparable in its intensity of perception and originality of style to J. A. Baker's classic *The Peregrine*. Here Nastassja Martin takes us to the farthest limits of human being.

The Book of Why Jun 21 2022 A Turing Award-winning computer scientist and statistician shows how understanding causality has revolutionized science and will revolutionize artificial intelligence "Correlation is not causation." This mantra, chanted by scientists for more than a century, has led to a virtual prohibition on causal talk. Today, that taboo is dead. The causal revolution, instigated by Judea

Pearl and his colleagues, has cut through a century of confusion and established causality -- the study of cause and effect -- on a firm scientific basis. His work explains how we can know easy things, like whether it was rain or a sprinkler that made a sidewalk wet; and how to answer hard questions, like whether a drug cured an illness. Pearl's work enables us to know not just whether one thing causes another: it lets us explore the world that is and the worlds that could have been. It shows us the essence of human thought and key to artificial intelligence. Anyone who wants to understand either needs *The Book of Why*.

We Don't Know Ourselves: A Personal History of Modern Ireland Mar 06 2021 “[L]ike reading a great tragicomic Irish novel.” —James Wood, *The New Yorker* “Masterful . . . astonishing.” —Cullen Murphy, *The Atlantic* “A landmark history . . . Leavened by the brilliance of O'Toole's insights and wit.” —Claire Messud, *Harper's Winner • 2021 An Post Irish Book Award — Nonfiction Book of the Year •* from the judges: “The most remarkable Irish nonfiction book I've read in the last 10 years”; “[A] book for the ages.” A celebrated Irish writer's magisterial, brilliantly insightful chronicle of the wrenching transformations that dragged his homeland into the modern world. Fintan O'Toole was born in the year the revolution began. It was 1958, and the Irish government—in despair, because all the young people were leaving—opened the country to foreign investment and popular culture. So began a decades-long, ongoing experiment with Irish national identity. In *We Don't Know Ourselves*, O'Toole, one of the Anglophone world's most consummate stylists, weaves his own experiences into Irish social, cultural, and economic change, showing how Ireland, in just one lifetime, has gone from a reactionary “backwater” to an almost totally open society—perhaps the most astonishing national transformation in modern history. Born to a working-class family in the Dublin suburbs, O'Toole served as an altar boy and attended a Christian Brothers school, much as his forebears did. He was enthralled by American Westerns suddenly appearing on Irish television, which were not that far from his own experience, given that Ireland's main export was beef and it was still not unknown for herds of cattle to clatter down Dublin's streets. Yet the Westerns were a sign of what was to come. O'Toole narrates the once unthinkable collapse of the all-powerful Catholic Church, brought down by scandal and by the activism of ordinary Irish, women in particular. He relates the horrific violence of the Troubles in Northern Ireland, which led most Irish to reject violent nationalism. In O'Toole's telling, America became a lodestar, from John F. Kennedy's 1963 visit, when the soon-to-be martyred American president was welcomed as a native son, to the emergence of the Irish technology sector in the late 1990s, driven by American corporations, which set Ireland on the path toward particular disaster during the 2008 financial crisis. A remarkably compassionate yet exacting observer, O'Toole in coruscating prose captures the peculiar Irish habit of “deliberate unknowing,” which allowed myths of national greatness to persist even as the foundations were crumbling. Forty years in the making, *We Don't Know Ourselves* is a landmark work, a memoir and a national history that ultimately reveals how the two modes are entwined for all of us.

The Shallows: What the Internet Is Doing to Our Brains Apr 19 2022 New York Times bestseller • Finalist for the Pulitzer Prize "This is a book to shake up the world." —Ann Patchett Nicholas Carr's bestseller *The Shallows* has become a foundational book in one of the most important debates of our time: As we enjoy the internet's bounties, are we sacrificing our ability to read and think deeply? This 10th-anniversary edition includes a new afterword that brings the story up to date, with a deep examination of the cognitive and behavioral effects of smartphones and social media.

The Squaw Valley Review 2014 Feb 05 2021

This Is the Voice Apr 07 2021 A New York Times bestselling writer explores what our unique sonic signature reveals about our species, our culture, and each one of us. Finally, a vital topic that has never had its own book gets its due. There's no shortage of books about public speaking or language or song. But until now, there has been no book about the miracle that underlies them all—the human voice itself. And there are few writers who could take on this surprisingly vast topic with more artistry and expertise than John Colapinto. Beginning with the novel—and compelling—argument that our ability to speak is what made us the planet's dominant species, he guides us from the voice's beginnings in lungfish millions of years ago to its culmination in the talent of Pavarotti, Martin Luther King Jr., and Beyoncé—and each of us, every day. Along the way, he shows us why the voice is the most efficient, effective means of communication ever devised: it works in all directions, in all weathers, even in the dark, and it can be calibrated to reach one other person or thousands. He reveals why speech is the single most complex and intricate activity humans can perform. He travels up

the Amazon to meet the Piraha, a reclusive tribe whose singular language, more musical than any other, can help us hear how melodic principles underpin every word we utter. He heads up to Harvard to see how professional voices are helped and healed, and he ventures out on the campaign trail to see how demagogues wield their voices as weapons. As far-reaching as this book is, much of the delight of reading it lies in how intimate it feels. Everything Colapinto tells us can be tested by our own lungs and mouths and ears and brains. He shows us that, for those who pay attention, the voice is an eloquent means of communicating not only what the speaker means, but also their mood, sexual preference, age, income, even psychological and physical illness. It overstates the case only slightly to say that anyone who talks, or sings, or listens will find a rich trove of thrills in *This Is the Voice*.

Hong Kong without Us Oct 21 2019 *Hong Kong without Us* is a decentralized book of revolutionary poetry. Drawn directly from the voices of Hong Kong during its anti-extradition protests, the poems consist of submitted testimonies and found materials—and are all anonymous from end to end, from first speech to translated curation. This collected poetic documentation of protest is thus an authorless work that brings together many voices. The editors themselves are anonymous poets acting through the Bauhinia Project, an organization created to bring Hong Kong's struggles to the stage of transnational activism through lyric and language, in the same spirit of leaderlessness as the protests. This book is a glimpse into the movement's lives and voices. The poems here were either submitted as testimonies to the Bauhinia Project at an encrypted email address or collected as "found poems" from testimonies and protest materials on the streets, on social media, and on the news. Each was from an anonymous source in Chinese. They are a people's poetry: nameless, lowbrow, temporally bound, squeezed out from moments of gravity and strife. They are meant to reach out across the silence of oceans, through differences in language and culture.

Noise Apr 26 2020 From the Nobel Prize-winning author of *Thinking, Fast and Slow* and the coauthor of *Nudge*, a revolutionary exploration of why people make bad judgments and how to make better ones—"a tour de force" (*New York Times*). Imagine that two doctors in the same city give different diagnoses to identical patients—or that two judges in the same courthouse give markedly different sentences to people who have committed the same crime. Suppose that different interviewers at the same firm make different decisions about indistinguishable job applicants—or that when a company is handling customer complaints, the resolution depends on who happens to answer the phone. Now imagine that the same doctor, the same judge, the same interviewer, or the same customer service agent makes different decisions depending on whether it is morning or afternoon, or Monday rather than Wednesday. These are examples of noise: variability in judgments that should be identical. In *Noise*, Daniel Kahneman, Olivier Sibony, and Cass R. Sunstein show the detrimental effects of noise in many fields, including medicine, law, economic forecasting, forensic science, bail, child protection, strategy, performance reviews, and personnel selection. Wherever there is judgment, there is noise. Yet, most of the time, individuals and organizations alike are unaware of it. They neglect noise. With a few simple remedies, people can reduce both noise and bias, and so make far better decisions. Packed with original ideas, and offering the same kinds of research-based insights that made *Thinking, Fast and Slow* and *Nudge* groundbreaking *New York Times* bestsellers, *Noise* explains how and why humans are so

susceptible to noise in judgment—and what we can do about it.

The New York Times Book Review Dec 27 2022 A “delightful” (Vanity Fair) collection from the longest-running, most influential book review in America, featuring its best, funniest, strangest, and most memorable coverage over the past 125 years. Since its first issue on October 10, 1896, The New York Times Book Review has brought the world of ideas to the reading public. It is the publication where authors have been made, and where readers first encountered the classics that have enriched their lives. Now the editors have curated the Book Review’s dynamic 125-year history, which is essentially the story of modern American letters. Brimming with remarkable reportage and photography, this beautiful book collects interesting reviews, never-before-heard anecdotes about famous writers, and spicy letter exchanges. Here are the first takes on novels we now consider masterpieces, including a long-forgotten pan of Anne of Green Gables and a rave of Mrs. Dalloway, along with reviews and essays by Langston Hughes, Eudora Welty, James Baldwin, Nora Ephron, and more. With scores of stunning vintage photographs, many of them sourced from the Times’s own archive, readers will discover how literary tastes have shifted through the years—and how the Book Review’s coverage has shaped so much of what we read today.

Skills of the Warramunga Nov 02 2020 Early in 1946, former army officer, Jamie Munro, and his half-Aboriginal friend and colleague, Jack 'Jacko' O'Brien, who head the Commonwealth Investigation Service in Darwin, are called on to assist in the rescue of Colonel John Cook, a senior operative of MI6, who has been kidnapped by bandits and taken into the jungles of Malaya. With Jacko's half-sister, Sarah, a full-blood Aborigine, they arrive in Kuala Lumpur to find that they not only have to contend with the impenetrable jungle of the Malay peninsula, but also with a murderous and subversive organisation of Fascist criminals whose aim is to disrupt the creation of the Malayan Union by the British Military Authority, set to take place on 1st of April 1946, foment an uprising and take over control of the country. All the inherent bushcraft skills of the Warramunga are needed to rescue Colonel Cook as well as prevent catastrophic mayhem on the Malayan peninsula. This is the third book in the Warramunga trilogy.

Life and Fate Sep 12 2021 Based around the pivotal WWII battle of Stalingrad (1942-3), where the German advance into Russia was eventually halted by the Red Army, and around an extended family, the Shaposhnikovs, and their many friends and acquaintances, Life and Fate recounts the experience of characters caught up in an immense struggle between opposing armies and ideologies. Nazism and Communism are appallingly similar, 'two poles of one magnet', as a German camp commander tells a shocked old Bolshevik prisoner. At the height of the battle Russian soldiers and citizens alike are at last able to speak out as they choose, and without reprisal - an unexpected and short-lived moment of freedom. Grossman himself was on the front line as a war correspondent at Stalingrad - hence his gripping battle scenes, though these are more than matched by the drama of the individual conscience struggling against massive pressure to submit to the State. He knew all about this from experience too. His central character, Viktor Shtrum, eventually succumbs, but each delay and act of resistance is a moral victory. Though he writes unsparingly of war, terror and totalitarianism, Grossman also

tells of the acts of 'senseless kindness' that redeem humanity, and his message remains one of hope. He dedicates his book, the labour of ten years, and which he did not live to see published, to his mother, who, like Viktor Shtrum's, was killed in the holocaust at Berdichev in Ukraine in September 1941.
