For the national security intelligence community, it presents a concise distillation and classification of the national intelligence functions. To the private sector, it offers an unprecedented translation into lay terms of national intelligence principles and their application within and potentially outside of government. Whereas "intelligences sharing" has traditionally been a government-to-government transaction, the environment is now receptive to government-private sector interaction. The twenty-first century has brought with it considerable buzz surrounding the connections between science and literacy. Karen Worth and her colleagues have been at the center of this discussion for more than a decade, and they share their very practical ideas and insights. -Lori Fulton Author of *Science Notebooks: Writing About Inquiry* The voice of real teachers is loud and clear-the centerpiece of this very readable and profoundly helpful book. It will be extraordinarily helpful for anyone interested in using writing and talk to enhance the learning in a classroom where students have a direct experience with science as inquiry. -Harold Pratt Past NSTA president The case for cross-disciplinary collaboration is supported by moving testimonials from classroom teachers who joined the authors in their quest for a deeper understanding of the science-literacy connection. A must read for teachers in either domain. -Peter Dow Author of *Outdoor Inquiries: Taking Science Investigations Outside the Classroom* Essentials of Science and Literacy provides classroom teachers with a wealth of classroom tested and research-based best practices designed to engage students. It addresses one of the major shortcomings in many classrooms, providing students with the time and opportunity to make sense and to communicate their understanding of the science investigation they are engaged in. -Mike Klentschy Author of *Scaffolding Science Inquiry Through Lesson Design* Karen Worth and her colleagues understand the link between science and literacy connection.
