**Harley and the Davidsons** Sep 22 2019 This addition to the Badger Biographies series tells the story of four young inventors who shared a dream: to create the best motorized bicycle in America. Their turn of the century aspirations took them from a backyard machine shop to a highly successful business empire - and all in the span of just a few years. With grit, determination, and not a little elbow grease, Bill Harley and the Davidson brothers - Arthur, William, and Walter - used their engineering and machine-shop expertise to continually perfect their designs and present the best possible products to the American public. Along the way they made their mark on the racing circuit and introduced safety measures that continue to this day. After their deaths, their sons and daughters continued this legacy, buying back the company after it changed hands and re-establishing Harley-Davidson as the king of the motorcycle world. From the old Knucklehead, Panhead and Shovelhead motors to the Evolution, Revolution and Twin Cam engines that followed, the story of Harley and the Davidsons remains one of the great success stories of the 20th century.

*The Harley-Davidson Story* Nov 17 2021 *The Harley-Davidson Story: Tales from the Archives* is a fascinating, visually driven overview of the motor company's rich story, created in cooperation with the Harley-Davidson Museum. The story of Harley-Davidson is a classic American tale of spirit, invention, and the right idea at the right time. From its beginning in a small Milwaukee shed in 1903, William Harley and his cousins, the Davidson brothers, set in motion what would eventually become the world's most iconic motorcycle company. While other motorcycle companies rose and fell through the teens and 1920s, Harley went from strength to strength, whether introducing its first V-twin motor or dominating race tracks across America. The Milwaukee Miracle even prospered during WWII, building war bikes for the armed forces. By the 1950s, they'd buried their last American-built competitor, Indian, and gained a hold over the US market that they maintain to this day. A remarkable story deserves a remarkable space to recount it. Such is the Harley-Davidson Museum in Milwaukee, which opened in 2009. Harley-Davidson partnered with Motorbooks to create this book relaying Harley-Davidson's story, as told through the museum's displays and archive assets.

**More Than a Motorcycle** Dec 26 2019 In the late 1980s, Harley-Davidson beat back an assault by Japanese competitors and engineered a remarkable financial turnaround. But it subsequently faced an even more formidable challenge: maintaining and improving on its success in the absence of an external crisis. To answer this challenge, then-CEO Rich Teerlink, partnering with organizational consultant Lee Ozley, threw out the top-down strategies that had just saved the company and began building a different Harley-one that would be driven not by top management, but by employees at every level. What happened next is the stuff of turnaround legend. More Than a Motorcycle is the story behind the story of the purposeful transformation of an American icon, as told by the two individuals most deeply involved in that decade-long process. The book chronicles the victories and setbacks along Harley's difficult journey from a traditional "command-and-control" culture to an open, participative learning environment. Teerlink and Ozley deliver three fundamental messages: people are a company's only sustainable competitive advantage; there is no "quick fix" to effect lasting, beneficial organizational change; and leadership is not a person, but a process to which everyone must contribute. They provide practical, reality-tested prescriptions for critical tasks like developing employee alignment, building structures that support participation, and implementing effective reward programs. Finally, they draw lessons from the Harley experience--lessons about values, trust, and community--that apply broadly to any business. An against-the-odds story of a business road less traveled, this book encourages today's leaders to look around the next bend--and to give every employee a view of the road from the driver's seat.
