United States - Second Edition serves as both a primer on forfeiture law
for the newcomer to this area, as well as a handy resource for anyone
needing a comprehensive discussion of any of the recurring and evolving
forfeiture issues that arise daily in federal practice. The author is one of
the federal government's leading experts on asset forfeiture law. As a
federal prosecutor, he has been litigating asset forfeiture cases since the
late 1980's, was a Deputy Chief of the Justice Department's Asset
Forfeiture and Money Laundering Section for many years, and is now the
Chief of the Asset Forfeiture and Money Laundering Section in the U.S.
Attorney's Office in Baltimore, MD. Asset Forfeiture Law in the United
States - Second Edition is a completely revised and up-to-date treatise
that addresses important changes and significant developments in civil
and criminal forfeiture law. Every chapter has been rewritten as a result
of the explosive growth in this area of law and practice. This
comprehensive one-volume resource examines and explores the
outpouring of new case law stemming from federal law enforcement
agencies that include the FBI, DEA, IRS and Homeland Security. The
Second Edition continues to lead the practitioner, prosecutor, judge and
policy maker through the labyrinth of statutes, rules and cases that
govern this dynamic area of the law. Many countries in Europe, Asia and
Africa, as well as Australia and the Americas, have enacted asset

forfeiture statutes modeled on U.S. law, making the cases interpreting
the statutes relevant beyond the borders of the United States. The

Interactive Distributed Multimedia Systems (IDMS) and Protocols for
Mul- media Systems (PROMS) have been two successful series of
international events bringing together researchers, developers and
practitioners from academia and industry in all areas of multimedia
systems. These two workshops successfully merged in 2003 and now
constitute the MIPS workshop. After the outstanding MIPS 2003
workshop, organized in Naples, Italy, by
GiorgioVentreandRobertoCanonico,fromtheUniversityofNaplesFedericoII
, MIPS2004movedtoGrenoble,France.
Followingthegreattradition,MIPS2004 was intended to contribute to
scienti?c, strategic and practical advances in the area of distributed
multimedia applications, protocols and intelligent mana- ment tools, with
emphasis on their provision over novel network architectures. This is
undoubtedly a rather broad area, which is con?rmed by the large range
of topics that were addressed in the submitted (and accepted) papers.
This year the Call for Papers attracted 74 submissions, essentially from -
rope and Asia, plus a few contributions from North America, the Middle
East, and Africa, for a total of 20 countries. We would like to express our
warmest gratitude to all the authors, without whom organizing this event
would have been impossible! Thanks to the outstanding work of the
Program Committee and the ad- tional reviewers, 20 full-sized papers
and 5 additional short papers were ?nally accepted, which was not an
easy task. Like MIPS 2003, MIPS 2004 remained a highly selective event
(33% acceptance ratio, including the short papers) which is the best
warrant of a good program quality. From electronic ignition to electronic

I was born and raised in Rockland County, which until the mid-fifties, was a region of New York State characterized by small villages and farms just 18 miles or so from New York City. After high school and college and having seen enough of "progress" destroying this wonderful way of life, my wife and I moved to a small community a few miles from Cooperstown, New York, home of the Baseball Hall of Fame. After raising three daughters and a career in education I decided to change the tempo of life and began a new occupation as a full-time writer of automotive history. This was simply an extension of what I had been doing since my preadolescent years when my brother and I would collect sales brochures from any auto dealer who wouldn't show us the exit/door, since we obviously had no cash, no credit and no intention of buying a new car. Ever since I was in elementary school I was fascinated by the hopped-up Fords and Chevys (and even an occasional Plymouth) of the late '30's and '40's that the older "cool" boys drove to school. Recollections of those cars from long ago instantly came to mind when I first saw the PT Cruiser in 2000. Having previously written numerous articles and several books on Chrysler vehicles, my interest in the PT as the subject of a forthcoming volume was instantaneous. (97 - Sept 03) R to 53.
