Performance Analysis for Public and Nonprofit Organizations Oct 08 2020 "The book focuses on application of performance analysis tools, not the theory of performance management. This text is an effective learning tool for students in analytical technique courses in public administration and policy programs. With other texts, students may learn about a statistical concept and calculation, but still don't understand the managerial context where the statistical tool applies. Consequently, they often fail to understand the managerial importance of statistical tools they learn, and worse, fail to recognize the correct tool to use when a managerial issue rises. This book corrects this problem by providing a managerial context that bridges statistical concepts and the managerial reality. The managerial context is performance management, in which performance data are presented, monitored, and analyzed. It is in this performance management context that the usefulness and applicability of statistical tools are illuminated for the learner."--BOOK JACKET.

"Managing Nonprofit Organizations is the only introductory text on this subject that manages to do three critical things equally well: It's comprehensive, covering all the key topics leaders of NPOs need to know about; it's practical, providing lots of examples, case incidents, and experiential exercises that connect the content to the real world; and, best of all (and most unique compared to others), it's research-based, drawing on the latest and best empirical studies that look into what works and doesn't work in the world of nonprofit management." —Vic Murray, professor, School of Public Administration, University of Victoria "This book is a rarity—a text that can be used both as the focus for academic study and as a source of stimulating ideas for those practitioners who want to explore theories about management and how they can be applied so they can do a better job. Managing Public and Nonprofit Organizations Apr 25 2022 *Managing Public and Nonprofit Organizations* approaches public management learning in a unique way, examining more than 100 high-profile and little-known administrative failure and success stories to explore how failures happen, how they can be prevented, and how to replicate successes in other jurisdictions. Organized to complement a standard public management or organizational behavior textbook structure, and to satisfy NASPAA accreditation requirements, this book explores both traditional public administration functions (performance management, financial management, human-resource management, procurement management, policymaking, capital management, and information-technology management) and organizational concepts (organizational structure and organizational culture). Unlike a traditional casebook, the accompanying stories do not stop in the middle to ask the readers what they would do; instead readers are asked to consider how the events illuminate what public management means and how to make it most effective. The stories ground and give meaning to the book's review of principles and best practices. Stories include both well-known and highly reported stories of success and failure including Wikileaks, the Boston Marathon bombing, bankruptcy of Detroit, British Petroleum oil spill, 9/11 World Trade Center attack, decision to invade Iraq, Affordable Care Act website rollout, "Bridgewater" scandal, and the Brooklyn Navy Yard killings. The stories do not pass judgment on governments and nonprofits as institutions, but rather teach students and practitioners best management practices by example. Discussion questions are included at the end of each chapter to prompt classroom discussion.

Third Sector Management Jan 29 2020 Trying to do good deeds does not guarantee that a nonprofit organization will succeed. The organization must do good deeds well. This textbook offers a blueprint for nonprofit success, adopting a strategic perspective that assumes vision, mission, strategy, and execution as the pillars upon which success is built. While many experts on nonprofits argue that fundraising is the single key to success, William B. Werther Jr., and Evan M. Berman show that effective fundraising depends largely on how the nonprofit is positioned and how it performs. They address such issues as leadership and board development, strategic planning, staffing, fundraising, partnering, productivity improvement, and accountability. Emphasizing the context of nonprofits and detailing improvements that can be made by managers at all levels, the book strikes a balance between policy discussion and practical usefulness. Written for use in graduate courses in nonprofit management, *Third Sector Management* will also be invaluable to directors, staff, volunteers, and board members of nonprofit organizations.

**Comparative Corporate Governance of Non-Profit Organizations** Nov 28 2019 The economic importance of the non-profit sector is growing rapidly in the USA and Europe. However, the law has not kept abreast with its development. The European Court of Justice has extended certain freedoms of the EC Treaty to non-profit organisations, and more case law is expected to follow in the near future, but the observations, theories, solutions and legal and non-legal rules in this field are manifold. The chances of harmonising the law on a European level are slim. Despite these differences, a common core of international corporate governance problems and regulatory solutions can be seen. This volume of essays brings together a variety of international experts from both corporate governance and governance of non-profit organisations to compare the two areas and explore the lessons that can be learned regarding comparative corporate governance for non-profit organisations.
