Neil Shubin, the paleontologist and professor of anatomy who co-discovered Tiktaalik, the “fish with hands,” tells the story of our bodies as you've never heard it before. The basis for the PBS series. By examining fossils and DNA, he shows us that our hands actually resemble fish fins, our heads are organized like long-extinct jawless fish, and major parts of our genomes look and function like those of worms and bacteria. Your Inner Fish makes us look at ourselves and our world in an illuminating new light. This is science writing at its finest—enlightening, accessible and told with irresistible enthusiasm. Kafka on the Shore displays one of the world's great storytellers at the peak of his powers. Here we meet a teenage boy, Kafka Tamura, who is on the run, and Nakata, an aging simpleton who is drawn to Kafka for reasons that he cannot fathom. As their paths converge, acclaimed author Haruki Murakami enfolds readers in a world where cats talk, fish fall from the sky, and spirits slip out of their bodies to make love or commit murder, in what is a truly remarkable journey. Love On The Run... Colorado sheriff Dade Logan has waited twenty years to reunite with his long lost sister, Daisy. But when she finally turns up, they barely recognize each other. That's because the beautiful stranger isn't Daisy, but her childhood friend Maggie, on the run from an impending marriage. Moved by this last link to Daisy, Dade determines to bend any law that stands between him, his sister--and the intriguing Maggie... Maggie Sutton will risk anything to escape her fate, though accompanying the broad-shouldered sheriff in his pursuit of Daisy rattles her to the core. But as their search--and desire for one another--escalates, the two provoke a vicious bounty hunter, one who threatens their hopes for a future together... Praise for the novels of Janette Kenny "These are the western romances readers have enjoyed for decades."--Romantic Times on A Cowboy Christmas "Readers will enjoy every moment." --Romantic Times on One Real Man "With a cowboy like this, you can't lose!"--Linda Lael Miller on One Real Cowboy Explores the homogenization of American culture and the impact of the fast food industry on modern-day health, economy, politics, popular culture, entertainment, and food production. On the trail of a vicious criminal, agent Chance Mackenzie found the perfect bait for his trap: Sunny Miller. So Chance made himself the only man she could trust—and then arranged for her long-missing father to find out about them. What Chance hadn't foreseen was that Sunny had reasons of her own for hiding from her father—and now Chance's deception had brought them both one step closer to the end of everything they held dear.... A starred Booklist title, ALL DAY is a behind-the-bars, personal glimpse into the issue of mass incarceration via an unpredictable, insightful and ultimately hopeful reflection on teaching teens while they await sentencing. Told with equal parts raw honesty and unbridled compassion, ALL DAY recounts a year in Liza Jessie Peterson's classroom at Island Academy, the high school for inmates detained at New York City's Rikers Island. A poet and actress who had done occasional poetry workshops at the correctional facility, Peterson was ill-prepared for a full-time stint teaching a full GED curriculum program for the incarcerated youth. For the first time faced with full days teaching the rambunctious, hyper, and fragile adolescent inmates, "Ms. P" comes to understand the essence of her

predominantly Black and Latino students as she attempts not only to educate them, but to instill them with a sense of self-worth long stripped from their lives. "I have quite a spirited group of drama kings, court jesters, flyboy gangsters, tricksters, and wannabe pimps all in my charge, all up in my face, to educate," Peterson discovers. "Corralling this motley crew of bad-news bears to do any lesson is like running boot camp for hyperactive gremlins. I have to be consistent, alert, firm, witty, fearless, and demanding, and most important, I have to have strong command of the subject I'm teaching." Discipline is always a challenge, with the students spouting street-infused backtalk and often bouncing off the walls with pent-up testosterone. Peterson learns quickly that she must keep the upper hand-set the rules and enforce them with rigor, even when her sympathetic heart starts to waver. Despite their relentless bravura and antics—and in part because of it—Peterson becomes a fierce advocate for her students. She works to instill the young men, mostly black, with a sense of pride about their history and culture: from their African roots to Langston Hughes and Malcolm X. She encourages them to explore and express their true feelings by writing their own poems and essays. When the boys push her buttons (on an almost daily basis) she pushes back, demanding that they meet not only her expectations or the standards of the curriculum, but set expectations for themselves—something most of them have never before been asked to do. She witnesses some amazing successes as some of the boys come into their own under her tutelage. Peterson vividly captures the prison milieu and the exuberance of the kids who have been handed a raw deal by society and have become lost within the system. Her time in the classroom teaches her something, too—that these boys want to be rescued. They want normalcy and love and opportunity.

Multiple Hugo and Nebula award-winning author, Greg Bear is one of science fiction's most accomplished writers. Bold scientific speculation, riveting plots, and a fierce humanism reflected in characters who dare to dream of better worlds distinguish his work. Now Bear has written a mind-bendingly epic novel that may well be his masterpiece. Do you dream of a city at the end of time? In a time like the present, in a world that may or may not be our own, three young people—Ginny, Jack, and Daniel—dream of a doomed, decadent city of the distant future: the Kalpa. Ginny's and Jack's dreams overtake them without warning, leaving their bodies behind while carrying their consciousnesses forward, into the minds of two inhabitants of the Kalpa—a would-be warrior, Jebrassy, and an inquisitive explorer, Tiadba—who have been genetically retro-engineered to possess qualities of ancient humanity. As for Daniel: He dreams of an empty darkness—all that his future holds. But more than dreams link Ginny, Jack, and Daniel. They are fate-shifters, born with the ability to skip like stones across the surface of the fifth dimension, inhabiting alternate versions of themselves. And each guards an object whose origin and purpose are unknown: gnarled, stony artifacts called sum-runners that persist unchanged through all versions of time. Hunted by others with similar powers who seek the sum-runners on behalf of a terrifying, goddess-like entity known as the Chalk Princess, Ginny, Jack, and Daniel are drawn, despite themselves, into an all but hopeless mission to rescue the future—and complete the greatest achievement in human history.

The vote in the House of Lords as to who should inherit the Barrington family fortune has ended in a tie. The Lord Chancellor's deciding vote will cast a long shadow on the lives of Harry Clifton and Giles Barrington. Harry returns to America to promote his latest novel, while his beloved Emma goes in search of the little girl who was found abandoned in her father's office on the night he was killed. When the general election is called, Giles Barrington has to defend his seat in the House of Commons and is horrified to discover who the Conservatives select to stand against him. In 1957, Sebastian wins a scholarship to Cambridge, and a new generation of the Clifton family marches onto the page. But after Sebastian is expelled from school, he unwittingly becomes caught up in an international art fraud involving a Rodin statue that is worth far more than the sum it raises at auction. Does he become a millionaire? Does he go to Cambridge? Is his life in danger? *Best Kept Secret*, the third volume in Jeffrey Archer's bestselling series, will answer all these questions but, once again, pose so many more. An ambitious new work by a well-respected sociologist, *Information and Organizations* provides a bold perspective of the dynamics of organizations. Stinchcombe contends that the "information problem" and the concept of "uncertainty" provide the key to understanding how organizations function. In a delightful mix of large theoretical insights and vivid anecdotal material, Stinchcombe explores the ins and outs of organizations from both a macro and micro perspective. He reinterprets the work of the renowned scholars of business, Alfred Chandler, James March and Oliver Williamson, and looks in depth at corporations like DuPont and General Motors. Along the way, Stinchcombe explores subjects as varied as class consciousness, innovation, contracts and university administration. All of these analyses are distinguished by incisive thinking and creative new approaches to issues that have long confronted business people and those interested in organizational theory. A tour de force, *Information and Organizations* is a must-read for business people and scholars of many stripes. It promises to be a widely discussed and debated work. Originally published in 2007 For twenty thousand years, every observable phenomenon in the universe has been successfully explained by the Sarumpaet Rules: the laws governing the dynamics of the quantum graphs that underlie all the constituents of matter and the geometric structure of spacetime. Now Cass has stumbled on a set of quantum graphs that might comprise the fundamental particles of an entirely different kind of physics, and she has travelled three hundred and seventy light years to Mimosa Station, a remote experimental facility, in the hope of bringing this tantalising alternative to life. The “*novo-vacuum*” is predicted to begin decaying the instant it's created, but even a short-lived, microscopic speck could shed light on the origins of the universe, and test the Sarumpaet Rules more rigorously than ever before. Cass's experiment turns out to be more successful than anticipated: the *novo-vacuum* is more stable than the ordinary vacuum around it, and a region in which the new physics holds sway proceeds to expand out from Mimosa at half the speed of light. Six hundred years later, more than two thousand inhabited systems have been lost to the *novo-vacuum*. On the Rindler, a ship that has matched velocities with the encroaching border, people have come from throughout inhabited space to study the phenomenon. Most are Preservationists, hunting for a way to turn back the tide, but a few belong to another faction: Yielders, who believe that the challenge of adapting to survive on the far side of the border would reinvigorate a civilisation that has grown stale and insular. Tchicaya has come to the Rindler to join the Yielders, but when Mariama — a childhood friend whose example inspired him to abandon his own home world and traditions for a life of travel — arrives soon after, he is shocked to discover that she plans to help the Preservationists find a way to destroy the *novo-vacuum*. As a theoretical breakthrough leads to a sequence of experiments that begins to reveal the true richness of the world behind the border, tensions between the opposing factions grow. When a splinter group responds to these revelations with violent, unilateral action, Tchicaya and Mariama are forced into an uneasy alliance, and travel together through the border, balancing old and new loyalties against the fate of two incomparably different universes. *Cowboy Love* [Siren Publishing: The Lynn Hagen ManLove Collection: Erotic Alternative Paranormal Cowboy

If traditional film noir is a genre of mid-century black and white urban crime thrillers evoking an expressionist mood with its dark corners and back alleys, with its trench coats and shadows slanting through Venetian blinds in dusty offices where the scent of death hangs in a plume of coiling cigarette smoke and where mysterious women with golden hair and stiletto heels plead their case to a P.I. fighting inner demons, then film *soleil* is its modern or late-century reconfiguration, adapted to modern tastes and exploiting technical innovations, using as its most common setting dry sun-beaten highways that cut mercilessly through a parched, sagebrush-filled desert, its women in cowboy boots and jeans and the men deranged by their biological drives. The string of late century sunlit crime films officially began in 1984 with the release of *Blood Simple*, and soon included *Kill Me Again* (1989), *After Dark*, *My Sweet* (1990), and *One False Move* (1992), heralding the arrival of a new cinematic style that, unlike traditional noir, sometimes celebrated evil, rewarded greed, and in general indicated significant moral shifts in the culture.
