On the Backs of Tortoises Jul 18 2021 An insightful exploration of the iconic Galápagos tortoises, and how their fate is inextricably linked to our own in a rapidly changing world The Galápagos archipelago is often viewed as a last foothold of pristine nature. For sixty years, conservationists have worked to restore this evolutionary Eden after centuries of exploitation at the hands of pirates, whalers, and island settlers. This book tells the story of the islands' namesakes—the giant tortoises—as coveted food sources, objects of natural history, and famous icons of conservation and tourism. By doing so, it brings into stark relief the paradoxical, and impossible, goal of conserving species by trying to restore a past state of prehistoric evolution. The tortoises, Elizabeth Hennessy demonstrates, are not prehistoric, but rather microcosms whose stories show how deeply human and nonhuman life are entangled. In a world where evolution is thoroughly shaped by global history, Hennessy puts forward a vision for conservation based on reckoning with the past, rather than trying to erase it.

CHASE! A Tribute to the Keystone Cop Sep 19 2021 There have been many worthy books on the Keystone Film Company, Mack Sennett, and Mabel Normand—not to mention the countless volumes on Charlie Chaplin. But, despite their ongoing popularity, there has never been a full-length book devoted solely to the Keystone Cops. At least, not until now. A dozen or so film historians have come together to document and assess those clumsy constabularies. Containing insights into the Cops' place in cinema history, as well as fifty-six individual biographies, three hundred rare photographs, and a newly compiled filmography, *Chase!* is the ultimate tribute to the world's most comically inept police force. "An engaging, enlightening, and informative collection of essays by some of the most knowledgeable silent comedy experts around today, thanks to silent film historian Lon Davis. In addition, Lon and Keystone historian and author Brent Walker have provided a comprehensive listing of all the Sennett-produced Keystone Cops films. An essential addition to any silent film fan's library." - SilentsAreGolden.com

Flightsend Feb 22 2022 Flightsend is Charlie's new home, whether she likes it or not. Her mother sees it as an end to all that's gone so tragically wrong. They had been a proper family. Mum; her boyfriend, Sean; and Charlie, with a new baby sister on the way. But the baby died before she was born and everything changed. Gradually, Charlie's mother pushed Sean away, before resigning from her job and selling the house. Charlie is certain that the move to a ramshackle cottage, miles from anywhere, can only make things worse. She couldn't be more wrong. For Charlie's mum there's a new business and the fresh start that she knew she needed. And for Charlie there's a new job, new

friends, a newly discovered talent for art, and new feelings for two very different men. It's a summer of beginnings, not ends; a summer that Charlie will never forget.

*Heirs of the Founders* Sep 07 2020 From the two-time Pulitzer Prize finalist, bestselling historian, and author of *Our First Civil War* comes "a historical spellbinder" (The Christian Science Monitor) about a trio of political giants in nineteenth-century America—and their battle to complete the unfinished work of the Founding Fathers and decide the future of our democracy. In the early 1800s, three young men strode onto the national stage, elected to Congress at a moment when the Founding Fathers were beginning to retire to their farms. Daniel Webster of Massachusetts, a champion orator known for his eloquence, spoke for the North and its business class. Henry Clay of Kentucky, as dashing as he was ambitious, embodied the hopes of the rising West. South Carolina's John Calhoun, with piercing eyes and an even more piercing intellect, defended the South and slavery. Together these heirs of Washington, Jefferson and Adams took the country to war, battled one another for the presidency and set themselves the task of finishing the work the Founders had left undone. Their rise was marked by dramatic duels, fierce debates, scandal and political betrayal. Yet each in his own way sought to remedy the two glaring flaws in the Constitution: its refusal to specify where authority ultimately rested, with the states or the nation, and its unwillingness to address the essential incompatibility of republicanism and slavery. They wrestled with these issues for four decades, arguing bitterly and hammering out political compromises that held the Union together, but only just. Then, in 1850, when California moved to join the Union as a free state, "the immortal trio" had one last chance to save the country from the real risk of civil war. But, by that point, they had never been further apart. Thrillingly and authoritatively, H. W. Brands narrates an epic American rivalry and the little-known drama of the dangerous early years of our democracy.

**Fifty Words for Rain** Dec 31 2019 A Good Morning America Book Club Pick and New York Times Bestseller! From debut author Asha Lemmie, "a lovely, heartrending story about love and loss, prejudice and pain, and the sometimes dangerous, always durable ties that link a family together." —Kristin Hannah, #1 New York Times–bestselling author of *The Nightingale* Kyoto, Japan, 1948. "Do not question. Do not fight. Do not resist." Such is eight-year-old Noriko "Nori" Kamiza's first lesson. She will not question why her mother abandoned her with only these final words. She will not fight her confinement to the attic of her grandparents' imperial estate. And she will not resist the scalding chemical baths she receives daily to lighten her skin. The child of a married Japanese aristocrat and her African American GI lover, Nori is an outsider from birth. Her grandparents take her in, only to conceal her, fearful of a stain on the royal pedigree that they are desperate to uphold in a changing Japan. Obedient to a fault, Nori accepts her solitary life, despite her natural intellect and curiosity. But when chance brings her older half-brother, Akira, to the estate that is his inheritance and destiny, Nori finds in him an unlikely ally with whom she forms a powerful bond—a bond their formidable grandparents cannot allow and that will irrevocably change the lives they were always meant to lead. Because now that Nori has glimpsed a world in which perhaps there is a place for her after all, she is ready to fight to be a part of it—a battle that just might cost her everything. Spanning decades and continents, *Fifty Words for Rain* is a dazzling epic about the ties that bind, the ties that give you strength, and what it means to be free.

*Lord of the Flies* May 04 2020 Golding's iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new *Suggestions for Further Reading* by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

*Letters of a Woman Homesteader* Nov 29 2019 "Warmly delightful, vigorously affirmative." - The Wall Street Journal. Told with vivid gusto by a young, fiercely determined widow, this towering

classic of American frontier life paints a candid portrait of her work, travels, neighbors, and harsh existence on a Wyoming ranch in the early 1900s. Includes 6 original illustrations by N.C. Wyeth.

*How to Blow Up a Pipeline* Aug 26 2019 Property will cost us the earth The science on climate change has been clear for a very long time now. Yet despite decades of appeals, mass street protests, petition campaigns, and peaceful demonstrations, we are still facing a booming fossil fuel industry, rising seas, rising emission levels, and a rising temperature. With the stakes so high, why haven't we moved beyond peaceful protest? In this lyrical manifesto, noted climate scholar (and saboteur of SUV tires and coal mines) Andreas Malm makes an impassioned call for the climate movement to escalate its tactics in the face of ecological collapse. We need, he argues, to force fossil fuel extraction to stop--with our actions, with our bodies, and by defusing and destroying its tools. We need, in short, to start blowing up some oil pipelines. Offering a counter-history of how mass popular change has occurred, from the democratic revolutions overthrowing dictators to the movement against apartheid and for women's suffrage, Malm argues that the strategic acceptance of property destruction and violence has been the only route for revolutionary change. In a braided narrative that moves from the forests of Germany and the streets of London to the deserts of Iraq, Malm offers us an incisive discussion of the politics and ethics of pacifism and violence, democracy and social change, strategy and tactics, and a movement compelled by both the heart and the mind. Here is how we fight in a world on fire.

**The Keystone Advantage** Aug 19 2021 Today, many companies operate within a complex network of firms that all depend on each other for success. In this book, authors Marco Iansiti and Roy Levien use the powerful example of biological ecosystems to show how companies can leverage

these emerging business networks for long-term success. The book's title, "The Keystone Advantage", is taken directly from biology - it refers to "keystone species", which proactively maintain the healthy functioning of their entire ecosystem for a simple reason: their own survival depends on it. In the same way, say the authors, companies can protect and ensure their own success by deliberately fostering the combined health of the network they operate in.

**Centralia** Oct 09 2020 Centralia is the saga of a Pennsylvania community consumed by an underground mine fire. The town, founded in 1866, has often been embroiled in tragedy and controversy. Beginning with the infamous Molly Maguires, Centralia was confronted with the murder of its founder and an assault upon its Catholic priest, who cursed the town, saying, "One day this town will be erased from the face of the earth." Almost one hundred years later, a vein of coal that ran underneath the town caught fire and has burned since 1962. In the 1990s, the state of Pennsylvania declared eminent domain and forced most of the town's sixteen hundred residents to leave. Ten people remain in Centralia today. This book chronicles many of the images and stories from this fascinating and colorful Pennsylvania community.

**Rescuing the Planet** Jun 04 2020 An urgent, resounding call to protect 50 percent of the earth's land by 2050—thereby saving millions of its species—and a candid assessment of the health of our planet and our role in conserving it, from the award-winning author of *The Experience of Place* and veteran New Yorker staff writer. "An upbeat and engaging account of the remarkable progress being made to preserve vast wild spaces for animals to roam." —The Wall Street Journal Beginning in the vast North American Boreal Forest that stretches through Canada, and roving across the continent, from the Northern Sierra to Alabama's Paint Rock Forest, from the Appalachian Trail to a ranch in Mexico, Tony Hiss sets out on a journey to take stock of the "superorganism" that is the earth: its land, its elements, its plants and animals, its greatest threats--and what we can do to keep it, and ourselves, alive. Hiss not only invites us to understand the scope and gravity of the problems we face, but also makes the case for why protecting half the land is the way to fix those problems. He highlights the important work of the many groups already involved in this fight, such as the Indigenous Leadership Initiative, the Yellowstone to Yukon Conservation Initiative, and the global animal tracking project ICARUS. And he introduces us to the engineers, geologists, biologists, botanists, oceanographers, ecologists, and other "Half Earthers" like Hiss himself who are allied in their dedication to the unifying, essential cause of saving our own planet from ourselves. Tender,

impassioned, curious, and above all else inspiring, *Rescuing the Planet* is a work that promises to make all of us better citizens of the earth.

Even more important, it's practical, effective, and easy—you will walk away with specific suggestions you can incorporate into your own yard. If you're concerned about doing something good for the environment, Nature's Best Hope is the blueprint you need. By acting now, you can help preserve our precious wildlife—and the planet—for future generations.

**From Memory to Memorial** Jun 16 2021 On September 11, 2001, Shanksville, Pennsylvania, became a center of national attention when United Airlines Flight 93 crashed into a former strip mine in sleepy Somerset County, killing all forty passengers and crew aboard. This is the story of the memorialization that followed, from immediate, unofficial personal memorials to the ten-year effort to plan and build a permanent national monument to honor those who died. It is also the story of the unlikely community that developed through those efforts. As the country struggled to process the events of September 11, temporary memorials—from wreaths of flowers to personalized T-shirts and flags—appeared along the chain-link fences that lined the perimeter of the crash site. They served as evidence of the residents' need to pay tribute to the tragedy and of the demand for an official monument. Weaving oral accounts from Shanksville residents and family members of those who died with contemporaneous news reports and records, J. William Thompson traces the creation of the monument and explores the larger narrative of memorialization in America. He recounts the crash and its sobering immediate impact on area residents and the nation, discusses the history of and controversies surrounding efforts to permanently commemorate the event, and relates how locals and grief-stricken family members ultimately bonded with movers and shakers at the federal level to build the Flight 93 National Memorial. A heartfelt examination of memory, place, and the effects of tragedy on small-town America, this fact-driven account of how the Flight 93 National Memorial came to be is a captivating look at the many ways we strive as communities to forever remember the events that change us.
